*Development Education in Japan* Yuri Ishii, 2003-05-09 This book aims to provide an explanation for the slow introduction of Development Education in Japan. *Educational Restructuring in the Context of Globalization and National Policy* Holger

Daun, 2002 This study posits that global change is being driven mainly by financial forces, new patterns of economic growth, and market ideology. Weidman, W. James

Jacob, 2012-01-01 We are pleased to introduce this inaugural volume in the PSCIE Series *Beyond the Comparative: Advancing Theory and Its Application to Practice*, which expands on the life work of University of Pittsburgh Professor Rolland G.

Paulston. 1929-2006 Recognized as a stalwart in the field of comparative and international education, Paulston's most widely recognized contribution is in social cartography. He demonstrated that mapping comparative international and development

education (CIDE) is no easy task, and depending on the perspective of the mapper, there may be multiple cartographies to chart. The 35 contributors to this volume, representing a range of senior and junior scholars from various CIDE backgrounds and

perspectives, celebrate the life and work of Paulston by addressing issues, perspectives, and approaches related to charting the future course of the field. The volume reports on new research in several genres, as well as conceptual analysis. As the title suggests, authors were encouraged to go beyond established canons of CIDE. The cover art, *The CIDE Theoretical Compass*,

was conceptualized by the editors and depicts that theory selection and theory generation are an ongoing and important process in comparative international and development education (CIDE). The image was designed by artist Natalie Jacob, which

positions the CIDE Theoretical Compass over Rolland G. Paulston's 1993 concentric circle map. *Third World Education* Anthony R. Welch, 2002-05-03

This book debunks the argument that quality in education can only be achieved by limiting or trading off equality. The quality of schooling is a major issue for Third World nations across the globe. However, there is no single measure which is universally accepted. Whether it is, as some economists might argue, an issue of the number of desks

per classroom, or one of national sovereignty, is widely disputed. Defining equality in education becomes increasingly difficult in an era of globalization in which there exists a wide gap between rich and poor, both within and between nations. In the

context of an international move towards New Right politics and neo-liberal economic ideologies, both the quality and equality

of education are imperiled This book argues that any worthy definition of quality education must include the interests and participation of the underprivileged **Learning Democracy and Citizenship** Michelle Schweisfurth, Lynn Davies, Clive Harber, 2002-01-01 In recent years there has been a shift in discourse internationally towards a greater recognition of the importance of democratic governments and institutions and an explicit support for the development of democracy and citizenship through education This book celebrates this shift with a diverse range of contributions How democracy and citizenship are conceived practised and researched in different national and educational contexts is explored in this collection which brings together commentary from schoolchildren and international experts researchers and practitioners writers from the south and the north and from established and new democracies This volume will be appreciated by anyone with an interest in learning more about education citizenship and democracy **Resources in Education** , 1999-04

Gender Issues in International Education Maggie Wilson, Sheena Erskine, 2013-10-31 This book discusses equal opportunity for education in a global context Research findings from all over the world including Africa Asia Australia Europe and North America are presented Wilson and Erskine have compiled chapters addressing current gender issues as well as specific problems facing policy makers and professionals alike **The Third Delight** Rui Yang, 2018-10-24 Globalization and internationalization are salient features of our times in significant modern and post modern social theories This study contributes to the literature and delineates a comprehensive picture of China s higher education internationalization with an analysis of its costs and benefits set in an international comparative perspective **The Bloomsbury Handbook of Method in Comparative and International Education** Matthew A. M. Thomas, Tavis D. Jules, Michele Schweisfurth, Robin Shields, 2025-03-27 This handbook provides an overview of research concepts methodologies approaches and methods used regularly in the field of comparative and international education As an interdisciplinary field CIE does not espouse a singular or consistent research method Instead researchers generally utilize or are inspired by approaches from a wide range of disciplines including economics anthropology sociology political science philosophy and more Given this diversity this book helps readers understand the unique ways researchers employ method in comparative and international education The handbook includes contributions from leading researchers based in Australia Japan Norway Spain the UK the USA etc and each chapter includes a practical research example focused on a common topic throughout the book It includes four sections covering core concepts methodology approaches and methods and analysis with chapters as diverse as autoethnography Indigenous approaches international large scale assessments and social network analysis among others The book is a partner volume to the Bloomsbury Handbook of Theory in Comparative and International Education Politics of Classroom Life Nobuo K. Shimahara, 2014-04-08 The growing economic competition among the world s industrialized and developing nations has spurred comparisons and examinations of national school systems An important aspect of any school system is school and classroom management which is an indicator of the ultimate goals that a nation has for its future workers In this volume

international scholars examine the daily life of elementary school classrooms in six nations with complex economies and international presence and salient minority and immigrant populations. These original essays analyze contemporary classroom management practices and policies as well as their historical and theoretical frameworks.
