Quantitative Approaches To Man:

Approaches to Human Geography Stuart Aitken, Gill Valentine, 2006-01-27 Approaches to Human Geography is the essential student primer on theory and practice in Human Geography. It is a systematic review of the key ideas and debates informing post-war geography, explaining how those ideas work in practice. Avoiding jargon while attentive to the rigor and complexity of the ideas that underlie geographic knowledge, the text is written for students who have not met philosophical or theoretical approaches before. This is a beginning guide to geographic research and practice. **Approaches to Human**

Geography Stuart C. Aitken, Gill Valentine, 2014-12-01 The book covers some of the traditionally most obtuse and difficult to grasp philosophical ideas that have influenced geographers' geography. The fact that these are presented in an inclusive and accessible manner is a key strength. Many students have commented that the chapters they have read have encouraged them to read more in this field, which is fantastic from a lecturer's perspective. Richard White, Sheffield Hallam University. A new edition of the classic Approaches text for students, organised in three sections which overview and explain the history and philosophy of Human Geographies in all its applications by those who practise it. Section One: Philosophies (Positivist Geography, Humanism, Feminist Geographies, Marxism, Structuration Theory, Human Animal Realism, Postmodern Geographies, Poststructuralist Theories, Actor Network Theory, Postcolonialism, Geohumanities, Technologies). Section Two: People, Institutions and Cultures (Places and Contexts, Memories and Desires, Understanding Place, Personal and Political, Becoming a Geographer, Movement and Encounter, Spaces and Flows, Places as Thoughts). Section Three: Practices (Mapping and Geovisualization, Quantification, Evidence and Positivism, Geographic Information Systems, Humanism, Activism, Feminist Geographies, Poststructuralist Theories, Psychoanalysis, Environmental Inquiry, Contested Geographies and Culture Wars). Fully updated throughout and with eight brand new chapters, this is the core text for modules on history, theory and practice in Human Geography. *Men, Masculinities and Methodologies* B. Pini, B. Pease, 2013-08-29 This book contributes to the growing literature on men and masculinities but does so through a methodological lens. It addresses methodological approaches and challenges for feminist and pro-feminist studies of men and masculinities.

Human Security Studies: Theories, Methods And Themes Sorpong Peou, 2014-03-31 Human Security Studies: Theories, Methods and Themes examines the concept of human security from different theoretical and methodological perspectives and shows how they help shed light on the different themes of global intervention. Liberal perspectives, represented by global legalism and developmentalism, share the optimism that human security can be ensured and enhanced through strengthening global governance. Realists remain skeptical about this liberal vision. While also critical of the liberal promise, critical theorists and feminists offer radical perspectives on human security. All these perspectives help explain the challenges of military intervention for human protection, micro-disarmament, international criminal justice, smart sanctions, human rights and democracy promotion and human development. Person-centred Nursing Research: Methodology, Methods and Outcomes Jan Dewing, Brendan McCormack, Tanya McCance, 2021-04-26 This book is the first ever to offer a contemporary collection of different perspectives on person centredness in international doctoral nursing research The research in the book is based on the ideas and values of personhood and person centeredness which have been used and can be seen to guide research approaches inform research designs and theorize research findings Further a specific framework for person centred nursing is embedded throughout the research studies presented in the text The Person centred Nursing Framework PCNF developed by Brendan McCormack and Tanya McCance in 2010 is recognized as a nursing theory and this book further develops it as a basis for research and for advancing person centredness in nursing The framework informs all stages of the research process from design through to dissemination The book is structured into a number of highly engaging chapters written by doctoral candidates and recently graduated candidates The opening and

closing chapters written by the editors place the subsequent chapters in a global context of person centredness and nursing. The potential for person centred nursing research to be a global movement is recognized and debated. The subsequent chapters lead readers through philosophical ideas, methodologies and methods whilst also offering reflective and honest insights into learning how to become a person centred researcher. This field is growing and developing but yet there is no specific book available. As a result, researchers spend considerable time and effort translating existing research methodologies into person centred perspectives. This book fills this gap and acts as a key resource for future nurse researchers. The text is intended for and benefits nursing doctoral candidates, masters candidates and academic staff who teach and supervise research candidates; it may also appeal to other graduate learners. The book has international contributions which makes it appealing internationally. **div** **Young People's Understandings of Men's Violence**

Against Women Nancy Lombard, 2016-03-09 Globally, nationally and locally, men's violence against women is an endemic social problem and an enduring human rights issue. Unlike men who are most likely to be victims of stranger assaults and violence, official data shows that women are most likely to be attacked, beaten, raped and killed by men known to them, either partners or family members. Research has maintained that to challenge and prevent men's violence against women, changing the attitudes and behaviour of young people is essential. This ground-breaking book presents the first investigation into what younger people think about men's violence against women. It does this by locating their constructions and understandings within the temporal and spatial location of childhood. Through challenging the perception that young people are too young to know about violence or to offer opinions on it, Nancy Lombard demonstrates the ways to talk to younger people about men's violence. Through confronting preconceptions of younger people's existing knowledge, capabilities and understanding, she demonstrates that this is a subject which young people can confidently discuss. **Introducing Human Geographies** Paul Cloke, Philip Crang, Mark Goodwin, 2013-12-05 Introducing Human Geographies is the leading guide to human geography for undergraduate students, explaining new thinking on essential topics and discussing exciting developments in the field. Presented in three parts with 60 contributions written by expert international researchers, this text addresses the central ideas through which human geographers understand and shape their subject. Part I: Foundations engages students with key ideas that define human geography's subject matter and approaches through critical analyses of dualisms such as local/global, society/space and human/nonhuman. Part II: Themes explores human geography's main sub-disciplines with sections devoted to biogeographies, cartographies, cultural geographies, development geographies, economic geographies, environmental geographies, historical geographies, political geographies, population geographies, social geographies, urban and rural geographies. Finally, Part III: Horizons assesses the latest research in innovative areas from mobilities and securities.
