Quantitative Marxism:

Quantitative Marxism Paul Dunne, 1991-01-08 This book seeks to establish a constructive and useful interaction between empirical data and research methods on the one hand and Marxist theory and analysis on the other. It shows that it is possible to operationalise Marxist concepts either by using orthodox data and reinterpreting it or by constructing data which are more congruent with Marxist notions. The contributions deal with a wide range of theoretical, methodological and policy related issues. Among the substantive issues discussed are unemployment and structural change, uneven development and industrial restructuring and the financial sector. Quantitative Marxism will be of interest to students and academics in economics and political economy as well as to a broader audience interested in contemporary social and economic policy.

Rethinking Marxism The Rethinking Marxism Editorial Collective, 2023-05-31 First published in 2006. This issue highlights both the often undervalued practice of translation and the significance of rereading and rethinking classic Marxian texts with a symposium on Joseph Buttigieg's new edition of Antonio Gramsci's *Prison Notebooks*. *Marx's 'Grundrisse' and Hegel's 'Logic' (RLE Marxism)* Hiroshi Uchida, 2015-04-17 Marx's *Grundrisse* is acknowledged as the vital link between Marx's early and late work. It is also a crucial text in elucidating Marx's debt to the idealist philosopher G. W. F. Hegel. This book, first published in 1988, is the first full-length study of that relationship in a thorough textual analysis which makes the connections explicit and also the *Grundrisse*'s relations to the works of Adam Smith and Aristotle. This book argues that Marx's critique of political economy and his critique of Hegel are double interrelated. Not only did Marx adapt Hegelian logic in order to analyse the economic categories crucial to modern society but it is argued that those logical categories were themselves seen as reflections of the productive processes of contemporary commercial society. Uchida reveals a conceptual structure common to the apparently rarefied world of Hegelian conceptual logic and to the supposedly common-sensical world of economic science. Demonstrating this is a considerable achievement and it allows us to consider precisely what is valuable today in Marx's critical commentary on this conceptual structure and on the type of society in which it is manifested. Uchida's subject like Marx's is the force of capital on modern life. [International Taxation and Capitalism](#) Andrés Blanco, 2025-02-04 The book introduces a novel approach to international taxation through the lens of heterodox economic and social theories in particular Marxism. The book argues that the radical reorganization of the international tax system that has been underway for the last few decades, initiated by the OECD and furthered by the G20 and the European Union, is a response to changes in the global structure of capitalism, especially in terms of center periphery. Through both normative analysis and empirical evidence, the book shows that the global tax system emerging from these changes consolidates the regulatory and tax revenue control of the central states. It also demonstrates that this consolidation and centralisation is designed to enable the dominance of multinational corporations in the global economy. This path of international taxation is explained in the book through certain general concepts of Marxian economic theory such as the accumulation of capital and the tendency of the

rate of profit to fall along with other specific developments such as the unequal participation of the different regions of the world in the capitalist system and a general theory of money that incorporates elements proposed by some sectors of post Keynesianism This book is invaluable reading for anyone interested in global capitalism the financial system heterodox economics and Marxist theory **Encyclopedia of Critical Political Science** Clyde W. Barrow,2024-03-14 An indispensable and exemplary reference work this Encyclopedia adeptly navigates the multidisciplinary field of critical political science providing a comprehensive overview of the methods approaches concepts scholars and journals that have come to influence the discipline s development over the last six decades **Marxism** Max Eastman,2021-12-01 First published in 1941 *Marxism Is it Science* was written to present the author s criticisms of Marxism and in doing so to further exemplify his Method of Instruction first proposed in an earlier work The book is divided into six parts to provide six complete presentations of Marxism and why the author considers it unscientific The six different approaches varying in focus and complexity work together to give the reader a detailed overview of Marxism and the authors critique of it

Confronting Capitalism in the 21st Century Marc Silver,2019-04-23 This book analyzes key aspects of Marx s *Capital* with an eye towards its relevance for an understanding of issues confronting us in the 21st Century The contributions to this volume suggest that while aspects of Marx s original analysis must be adjusted to take into account changes that have occurred since its initial publication in 1867 his overall perspective remains necessary for understanding the nature of crises in 21st century Part I emphasizes the central concepts Marx employed in *Capital* including exploitation capital accumulation

commodity fetishism and his use of dialectics as a method for baring the underlying relations that define capitalism Parts II and III extend that focus by addressing the concept of value fictitious capital credit and financialization Parts IV and V offer analyses of several concrete manifestations of contemporary crises from national contexts Europe Latin America China and the United States The volume argues that we have to combat the imperatives of capitalism to move towards a more humane and egalitarian future

Marxian Economics: A Reappraisal Riccardo Bellofiore,1998-02-12 Springing from a conference held in Bergamo University on the occasion of the centenary of the publication by Engels of the third book of Capital the papers collected in these two volumes reinstate Marx's as the first genuinely evolutionary economic theory In this the capitalist process incessantly brings about states which will by themselves generate the next ones Thus as Schumpeter remarked Marx was the first to visualise what even at the present time is still the economic theory of the future for which we are slowly and laboriously accumulating stone and mortar statistical facts and functional equations

The Discourse of Domination Ben Agger,1992 The Discourse of Domination tackles nothing less than the challenge of giving critical theory a new grip on current problems and restoring the left's faith in the possibility of enlightened social change Agger steers a course between orthodox Marxism and orthodox anti Marxism bringing the concepts of ideology dialectic and domination out of the academy and making them into a living medium of political self expression

Marx's Revenge Meghnad Desai,2020-05-05 In this provocative and enthusiastically revisionist book the distinguished economist Meghnad Desai argues that capitalism's recent efflorescence is something Karl Marx anticipated and indeed would in a certain sense have welcomed Capitalism as Marx understood it would only reach its limits when it was no longer capable of progress Desai argues that globalization in bringing the possibility of open competition on world markets to producers in the Third World has proved that capitalism is still capable of moving forwards Marx's Revenge opens with a consideration of the ideas of Adam Smith and Hegel It proceeds to look at the nuances in the work of Marx himself and concludes with a survey of more recent economists who studied capitalism and attempted to unravel its secrets including Joseph Schumpeter John Maynard Keynes and Friedrich Hayek
