Electromagnetic Processes at High Energies in Oriented Single Crystals Vladimir Nikolaevich Ba?er, V. M. Katkov, Vladimir Moiseevich Strakhovenko, 1998 The book is devoted to processes at the interaction of high energy charged particles and photons with crystals Among them are the creation of electron positron pair by photon in crystalline field the radiation of particles in this field and connected with these effects the new type of electromagnetic showers in crystals the channeling of fast particles in crystal and channeling radiation At high energies the processes of quantum electrodynamics QED in intense external fields play an important role in crystals The first third of the book contains a new formulation of QED in external fields which is valid for any external field including an essentially nonuniform one and has vast applications

Nuclear Science Abstracts , 1976 **Radiation and Solid State Physics, Nuclear and High Energy Physics, Mathematical Physics** Pier P Delsanto, Albert W Saenz, 1998-05-06 The first of two volumes presenting an overview of the important research areas in which Professor H berall has done his life s work and constitutes a festschrift for this distinguished physicist Each chapter is intended to serve as a bridge between advanced textbooks and the most recent research literature thereby providing a valuable reference for active researchers as well as for graduate students

Quantum Electrodynamics Kinoshita Toichiro, 1990-07-31 Quantum electrodynamics is an essential building block and an integral part of the gauge theory of unified electromagnetic weak and strong interactions the so called standard model Its failure or breakdown at some level would have a most profound impact on the theoretical foundations of elementary particle physics as a whole Thus the validity of QED has been the subject of intense experimental tests over more than 40 years of its history This volume presents an up to date review of high precision experimental tests of QED together with comprehensive discussion of required theoretical work **Energy Research Abstracts** , 1995 High Energy Physics Index , 1990

In Conclusion: A Collection Of Summary Talks In High Energy Physics James D Bjorken, 2003-10-21 This invaluable volume is a collection of conference talks by James D Bjorken who has made a huge impact on particle physics and the development of the Standard Model The earliest of these talks was given in 1965 and the latest in 1990 The book provides from a personal perspective a glimpse of the complex evolution of the field over those highly productive decades In Conclusion A Collection of Summary Talks in High Energy Physics is aimed at a broad spectrum of particle physicists and students both experimental and theoretical

High-Energy Radiation from Magnetized Neutron Stars Peter Mészáros, 1992-06 Neutron stars the most extreme state of matter yet confirmed are responsible for much of the high energy radiation detected in the universe Mészáros provides a general overview of the physics of magnetized neutron stars discusses in detail the radiation processes and transport properties relevant to the production and propagation of high energy radiation in the outer layers of these objects and reviews the observational properties and theoretical models of various types of neutron star sources

High Energy Physics Glenn Cunningham, 2019-07-07 Particle physics also high energy physics is the branch of physics that studies the nature of the particles that constitute matter and radiation Although the word particle can refer to various types of very small objects particle physics usually investigates the irreducibly smallest detectable particles and the fundamental interactions necessary to explain their behaviour By our current understanding these elementary particles are excitations of the quantum fields that also govern their interactions The currently dominant theory explaining these fundamental particles and fields along with their dynamics is called the Standard Model Thus modern particle physics generally investigates the Standard Model and its various possible extensions e g to the newest known particle the Higgs boson or even to the oldest known force field gravity Written in a clear pedagogic style by active researchers this book will prepare a beginner to work in the field and at the same time will also provide useful reference material for active researchers
