Creation in Contemporary Experience David Moffett-Moore, 2014-04-16 Do the things we believe about God as creator make any difference in the way we act in the world Yes what we believe about God as creator impacts our theology and action in many ways In this book Dr David Moffett Moore will examine some of these implications by looking at topics as diverse as quantum physics and chaos theory hermeneutics ethics and how we tell stories of faith Can one accept the major theories of science including evolution and still be a faithful believer What do these findings of science mean for the way we do theology in the 21st century Dr Moffett Moore not only believes that we can accept the findings of science and still be faithful Christians he believes that discoveries in fields such as physics and biology can help us talk about God in a more relevant and compelling way than we ever have before When we talk about God in this new way we will also find a new call to live in a way that is faithful both to the wonders of the physical Creation and also to scripture This study is designed for individual reading and study Though it does not include questions and other traditional elements of a study guide it would still be an excellent guide for small group study on these topics
