*Raising a Responsible Child: Practical Steps to Successful Family Relationships* Don C. Dinkmeyer, Gary D. McKay, 1973  
All parents would agree that adequate preparation for life requires a sense of responsibility. Few know how to foster responsibility; however, commonly it is felt that one must teach responsibility. Punishment, rewards, and bribes are the tools of the teaching process. These methods are generally unsuccessful as a parent cannot teach responsibility; he must give it to the child and let him learn how to handle it. As children learn to accept responsibility, they begin to enjoy being responsible. They gain confidence and feel worthwhile. Back cover

**Indirect Parenting Interventions, Neuroscience and the Parent-Child Relationship** Thomas W. Roberts, 2024-10-21

This volume explores indirect parenting behavior that changes the structure of the parent-child relationship, examining the ecological dimension of parenting in addition to nurturance and control. Drawing on neuroscientific research in parenting, it provides a model for how children learn implicitly and how parents can relate to children through indirect means. Roberts argues that first-order parenting techniques, teaching specific behaviors to reduce unwanted child behaviors, are overused. He examines and offers guidance on how indirect interventions that place emphasis on the interactional components of the parent-child relationship, such as modeling, storytelling, reframing, humor, and paradox, can support parents and children in developing positive relationships. Addresses the latest brain research and its application to parent-child interactions. Introduces the student to aspects of the parent-child relationship that are not covered in most courses. Useful to clinicians who work directly with parents. Offers a perspective on parenting that differs from most parenting models. Facilitates awareness of how unconscious and nonverbal communication affects parenting. Serves to deepen the relationship with the child and curb unwanted behavior. Indirect Parenting Interventions, Neuroscience and the Parent-Child Relationship will be thought-provoking reading for students and scholars of parenting and family systems as well as clinicians who work directly with parents, giving them a broader perspective in dealing with parent-child interactions.

**Beyond Behavior Management** Jenna Bilmes, 2013-01-15

Why do children do the things they do? What can teachers do to manage it all? While there is not a simple method for understanding and managing all behaviors or all children, teachers can give young children the social and emotional tools needed to grow and thrive on their own. Developed and tested in the classroom, Beyond Behavior Management is a strength-based approach to guiding and managing young children's behavior by helping them build and use essential life skills: attachment, collaboration, self-regulation, adaptability, contribution, and belonging into the daily life of the early childhood classroom. As a result, children will learn to exhibit more pro-social behaviors, work better as a community, and become excited and active learners. This edition includes two new chapters and content reflecting early learning standards, new research, cultural diversity, and strategies to strengthen the home-school connection. Discussion and reflection questions, exercises, journal assignments, child profile.

templates a planning worksheet and sample scripts are also included Jenna Bilmes is an early childhood consultant and an instructional designer for WestEd Child and Family Services She is a frequent presenter to teachers administrators and counselors nationally and internationally
