Raising Good Children Thomas Lickona, 2012-05-02 Raising decent, caring, and responsible children is the most complex and challenging job in every parent's life and an increasingly difficult one in today's society. Here is the most authoritative book available on this crucial subject: a valuable and sensitive guide for parents who want their children to grow up with lifelong positive values. Based on fascinating research, this groundbreaking work by psychologist and educator Dr. Thomas Lickona describes the predictable stages of moral development from birth to adulthood. And it offers you down-to-earth advice and guidance for each stage: Seven caring ways to discipline terrible twos; Why your preschooler lies and how to handle it; What to do about a four-year-old's back talk; How to handle your seven-year-old's endless negotiations about what's fair; Why teens have trouble with peer pressure and how to help them; How to talk to your child about drugs, drinking, and sex; How to help children of any age reason more clearly about what's right and wrong. PLUS: A list of more than one hundred children's books that teach moral values and much more. An excellent book on a vastly neglected aspect of raising children.

Dr. Fitzhugh Dodson, author of *How to Parent* and *How to Father*: We have been waiting for a book like this for a long time: a readable work that translates a moral development into parents' language and experience.

Dolores Curran, author of *Traits of a Healthy Family*: Truly integrates a moral development theory into a consistent approach to childrearing. Word-of-mouth recommendations from parent to parent may lift it to the level of popularity once held by Dr. Spock's book on child care.

Counterpredators Bill Kortenbach, 2012-12-14 *Counterpredators* is a modern solution to an ancient problem: Parents face the overwhelming responsibility of training their children to navigate the threat environment and safely molding them into powerful, self-aware, authentic adults. At the same time, many parents do not themselves possess the necessary skill set, and when their children sense this, they begin to adopt questionable heroes and role models. In the natural world, animal parents train their young by repeatedly exposing them to hazard while demonstrating efficient risk management, yet our society teaches us to do the exact opposite: Shelter and protect our children from whatever might harm them. As a result, many children are profoundly unprepared to deal with real threat. Since both animal and human young are equally vulnerable, it is easy to spot the weak link: The unprepared human parent. To solve this problem, parents need to assume a powerful new identity: something unique and elemental that rivets the attention and imagination of their children. They must become counterpredators: individuals who have the skill and the will to engage and overcome human threats. *Counterpredators* is the story of how to achieve this transition using cutting-edge methodology: Survival Response Conditioning. The re-activation of dormant subconscious survival skills, combined with high-pressure, scenario-based experiences, produces rapid, permanent change and provides the launch pad for an unbreakable bond of love and respect between parents and children.
