Raisons Pratiques:

After Bourdieu David L. Swartz, Vera L. Zolberg, 2006-02-28 critical evaluations of his work notably papers by Rodney Benson 4 Rogers Brubaker Nick Crossley and John Myles Indeed it is the 1985 article by Rogers Brubaker that can truly be said to have served as one of the best introductions to Bourdieu's thought for the American social scientific public It is for this reason that we include it in the present collection Intellectual origins orientations We begin by providing an overview of Bourdieu's life as a scholar and a public intellectual The numerous obituaries and memorial tributes that have appeared following Bourdieu's untimely death have revealed something of his life and career but few have stressed the intersection of his social origins career trajectory and public intellectual life with the changing political and social context of France This is precisely what David Swartz's In memoriam attempts to accomplish In it he emphasizes the coincidence of Bourdieu's young and later adulthood with the period of decolonization the May 1968 French university crisis the opening up of France to privatization of many domains previously entrusted to the state that providence and most threatening to post World War II reforms the emergence of globalization as the hegemonic structure of the 21st century An orienting theme throughout Bourdieu's work warns against the partial and fractured views of social reality generated by the fundamental subject/object dichotomy that has plagued social science from its very beginning

The Other Rise of the Novel in Eighteenth-Century French Fiction Olivier Delers, 2015-09-01 The rise of the novel paradigm and the underlying homology between the rise of a bourgeois middle class and the coming of age of a new literary genre continues to influence the way we analyze economic discourse in the eighteenth century French novel Characters are often seen as portraying bourgeois values even when historiographical evidence points to the virtual absence of a self-conscious and coherent bourgeoisie in France in the early modern period Likewise the fact that the nobility was a dynamic and diverse group whose members had learned to think in individualistic and meritocratic terms as a result of courtly politics is often ignored The Other Rise of the Novel calls for a radical revision of how realism the language of self-interest and commercial exchanges and idealized noble values interact in the early modern novel It focuses on two novels from the seventeenth century Furetière's Roman bourgeois and Lafayette's Princesse de Clèves and four novels from the eighteenth century Prevost's Manon Lescaut Graffigny's Lettres d'une Pruvienne Rousseau's La Nouvelle Héloïse and Sade's Les infortunes de la vertu It argues that eighteenth century French fiction does not reflect material culture mimetically and that character action is best analyzed by focusing on the social and discursive exchanges staged by the text rather than by trying to create parallels between specific behavior and actual historical changes The novel produces its own reality by transforming characters and their stories into alternative social models different articulations of how individuals should define their economic relations to others The representation of interpersonal relations often highlights personal conceptions of private interest that cannot be easily reconciled with the traditional narrative of a transition towards economic modernity Realism then is not only about

verisimilar storytelling and psychological depth it is an epistemological questioning about the type of access to reality that a particular genre can give its readers *Absolutely Postcolonial* Peter Hallward,2001 This innovative book provides an incisive critique of well established positions in postcolonial theory and a dramatic expansion in the range of interpretative tools available Peter Hallward gives substantial readings of four significant writers whose work invites to varying degrees a singular interpretation of postcolonialism Edouard Glissant Charles Johnson Mohammed Dib and Severo Sarduy Using a singular interpretation of postcolonialism is central to the argument this book makes and to understanding the postcolonial paradigm **Bourdieu on Religion** Terry Rey,2014-12-05 Pierre Bourdieu was one of the most influential social theorists of our time He developed a series of concepts to uncover the way society works and to challenge assumptions about what society is His ideas illuminate how individuals and groups find value and meaning and so have rapidly come to be seen as hugely productive in analysing how religion works in society Bourdieu on Religion introduces students to Bourdieu s key concepts cultural social and symbolic capital habitus and field and his challenge to the structures of social inequality This study will be invaluable to any student interested in the relationships between religion class and social power **Social Bonds as Freedom** Paul Dumouchel,Reiko Gotoh,2015-08-01 Central to discussions of multiculturalism and minority rights in modern liberal societies is the idea that the particular demands of minority groups contradict the requirements of equality anonymity and universality for citizenship and belonging The contributors to this volume question the significance of this dichotomy between the universal and the particular arguing that it reflects how the modern state has instituted the basic rights and obligations of its members and that these institutions are undergoing fundamental transformations under the pressure of globalization They show that the social bonds uniting groups constitute the means of our freedom rather than obstacles to achieving the universal **Pierre Bourdieu** Michael James Grenfell,2014-09-19 The French social philosopher Pierre Bourdieu is now recognised as one of the major thinkers of the twentieth century In a career of over fifty years Bourdieu studied a wide range of topics education culture art politics economics literature law and philosophy Throughout these studies Bourdieu developed a highly specialised series of concepts that he referred to as his thinking tools which were used to uncover the workings of contemporary society Pierre Bourdieu Key Concepts highlights his most important concepts and examines them in detail Each chapter deals with an individual concept and is written to be of immediate use to the student with little or no previous knowledge of Bourdieu This new edition of the leading text is entirely revised and updated and includes new essays on Methodology Politics and Social Space **The Spirit of Luc Boltanski** Simon Susen,Bryan S. Turner,2014-11-01 What is the relevance of Luc Boltanski s pragmatic sociology of critique to central issues in contemporary social and political analysis In seeking to respond to this question this book contains critical commentaries from prominent social theorists attempting to map out the influence and broad scope of Boltanski s oeuvre **Ricoeur and the Post-Structuralists** Johann Michel,2014-10-31 In this important and original book Johann Michel paves the way for a

greater understanding of Paul Ricoeur's philosophy by exploring it in relation to some major figures of contemporary French thought Bourdieu Derrida Deleuze Foucault and Castoriadis Although the fertile dialogue between Ricoeur and various structuralist thinkers is well documented his position in relation to the post structuralist movement is less widely understood Does Ricoeur's philosophy stand in opposition to post structuralism in France or on the contrary is it in fact a unique variation of that movement This book defends the latter statement Michel speaks of post structuralisms in the plural form and engages them in a dynamic confrontation between Ricoeur and his contemporaries in the French intellectual scene The result is a better understanding of Ricoeur's thought and also of the distinctive issues that emerge through confrontation between Ricoeur and each of these post structuralist thinkers

Empire of Meaning François Dosse, 1999 An outgrowth of Dosse's History of Structuralism Empire of Meaning is an extended encounter with some of the most influential French intellectuals Through interviews and readings Dosse reveals what has become of the intellectuals of the generation of 68 as they have tried to work out the implications of their revolt against structuralism and

the problem of cold war existence Paul Ricoeur Bruno Latour Isabelle Stengers Roger Chartier Marcel Gauchet Dany Robert Dufour and Michel Serres are among the many figures whose words and work unfold in these pages **Cow Up a Tree** LEARN Group,2000 Western societies are calling for speedy change in agriculture and the agrifood industries to incorporate new quality criteria into the goods they produce To promote these changes what scientists must develop are not universally implementable technical solutions but self diagnosis methods to be used by agricultural producers and their advisors They also need to evolve new procedures for research intervention in collective organisations There is a need for new individual and collective learning and organisation processes based on transdisciplinarity and co learning among researchers development professionals decision makers and farmers In this book scientists from ten industrialised countries describe and reflect on their theoretical and practical experience of the different forms of learning they experimented with

Hyperconnectivity Dominique Carré,Geneviève Vidal,2018-10-08 The use of digital information and communication technologies would be the traces of a social acceptability of the exploitation of all data in the context of negotiations of uses This is the reason why the users present themselves actors and contributors of the hyperconnectivity We would thus witness a new form of dissemination inviting user experience and social innovations It is thus the victory of subordination by negotiated renunciation A new form of serving no longer that of the 1980s with the counters and other services which have become uncontrolled services excepted when the users are overcome by restrictive ergonomics revealing too much the subordination device which joins the prescription apparently without an injunction The lure is at its height when users and broadcasters come together to produce the services and goods composing the business model until the very existence of the companies in particular the pure players Crowdsourcing becomes legitimate consumers create the content deliver the data the basis of the service sold in a painless way because free access most of the time indirect financing the providers make available and administer the service networks Interfaces representing considerable costs also reputation to attract the attention of other consumers or contributors In these conditions the environmental stakes are considerable so we propose another way of considering them not as they are dealt with material and pollution but according to the prism of the relational practices analyzed in this volume *Les Joies du Solfège* Maximin CATINEAU, **The Plural Actor** Bernard

Lahire,2011-02-07 The individual that the social sciences take as an object is most often studied in a particular context or from a single dimension The actor is analysed as a student worker consumer spouse reader sportsperson a voter etc However in societies where individuals live often through simultaneously and successively heterogeneous and sometimes contradictory social experiences each person inevitably carries a plurality of roles ways of seeing feeling and acting The aim of this study is to consider the ways in which this plurality of worlds and experiences are incorporated into the being of each individual and to observe the individual s actions in a variety of settings In addition to his sociological viewpoint the author engages with psychology history anthropology and philosophy His reflections lead him to embark on a program of psychological sociology

to highlight the complexities of this plural view of the social

Negotiating Identities, Language and Migration in Global London Cangbai Wang, Terry Lamb, 2024-01-16 This book explores the transnational practices of migrant groups in global London illustrating the complex relations between migrants and the city in the context of globalisation The chapters offer a starting point to examine migrants and the city from a comparative perspective by bringing together case studies of diverse migrant communities They use languaging as the central concept in the development of an interdisciplinary framework that creates an opportunity to talk across disciplines to engage with key issues crisscrossing migration cities and language The book promotes language based or language sensitive research drawing on the plurilingual repertoires and the language and translanguaging practices of migrant communities as the tool for data collection and ethnographic fieldwork This approach generates fresh insights into the complex issues of diasporic identities belonging and place making which have broad implications for migration studies in post Brexit Britain and beyond
