Ralph Waldo Emerson (May 25, 1803 – April 27, 1882) known professionally as Waldo Emerson was an American essayist, lecturer, and poet who led the Transcendentalist movement of the mid-19th century. He was seen as a champion of individualism and a prescient critic of the countervailing pressures of society, and he disseminated his thoughts through dozens of published essays and more than 1,500 public lectures across the United States. Emerson gradually moved away from the religious and social beliefs of his contemporaries, formulating and expressing the philosophy of Transcendentalism in his 1836 essay "Nature." Following this ground-breaking work, he gave a speech entitled "The American Scholar" in 1837, which Oliver Wendell Holmes Sr. considered to be America's Intellectual Declaration of Independence.

**Emerson's Essays** Ralph Waldo Emerson, 2018-08-24 Emerson's Essays By Ralph Waldo Emerson To discover what a young man is good for and to equip him for the path he is to strike out in life regardless of any other consideration is the great duty to which he calls attention. He makes men self-reliant. He reveals to the eyes of the idealist the magnificent results of practical activity and unfolds before the realist the grandeur of the ideal world of thought. No man is to allow himself through prejudice to make a mistake in choosing the task to which he will devote his life. Emerson's essays are as it were printed sermons, all having this same text: The wealth and harmony of his language overpowered and entranced me anew. But

even now I cannot say wherein the secret of his influence lies What he has written is like life itself the unbroken thread ever lengthened through the addition of the small events which make up each day s experience      Self-Reliance and Other Essays
