Educating for Peace in a Time of "permanent War" Paul R. Carr, Bradley J. Porfilio, 2012 What is the meaning of peace why should we study it and how should we achieve it Although there are an increasing number of manuscripts curricula and initiatives that grapple with some strand of peace education there is nonetheless a dearth of critical cross disciplinary international projects books that examine peace education in conjunction with war and conflict Within this volume the authors contend that war military conflict violence are not a nebulous far away mysterious venture rather they argue that we are all collectively involved in perpetrating and perpetuating militarization conflict violence inside and outside of our own social circles Therefore education about and against war can be as liberating as it is necessary If war equates killing can our schools avoid engaging in the examination of what war is all about If education is not about peace then is it about war Can a society have education that willfully avoids considering peace as its central objective Can a democracy exist if pivotal notions of war and peace are not understood practiced advocated and ensconced in public debate These questions according to Carr and Porfilio and the contributors they have assembled merit a critical and extensive reflection This book seeks to provide a range of epistemological policy pedagogical curriculum and institutional analyses aimed at facilitating meaningful engagement toward a more robust and critical examination of the role that schools play and can play in framing war militarization and armed conflict and significantly the connection to peace

Churchill, Gerald Levy, 2011-06-15 The Enigmatic Academy is a provocative look at the purpose and practice of education in America Authors Christian Churchill and Gerald Levy use three case studies a liberal arts college a boarding school and a Job Corps center to illustrate how class bureaucratic and secular religious dimensions of education prepare youth for participation in American foreign and domestic policy at all levels The authors describe how schools contribute to the formation of a bureaucratic character how middle and upper class students are trained for leadership positions in corporations government and the military and how the education of lower class students often serves more powerful classes and institutions Exploring how youth and their educators encounter the complexities of ideology and bureaucracy in school The Enigmatic Academy deepens our understanding of the flawed redemptive relationship between education and society in the United States Paradoxically these three studied schools all prepare students to participate in a society whose values they oppose **Putting Peace into Practice** ,2022-06-08 This book examines the role and limits of policies in shaping attitudes and actions toward war violence and peace Authors examine militaristic language and metaphor effects of media violence on children humanitarian intervention sanctions peacemaking sex offender treatment programs nationalism cosmopolitanism community and political forgiveness to identify problem policies and develop better ones [Moral Responsibility, Statecraft and Humanitarian Intervention](#) Cathinka Vik, 2015-06-12 This book explores the moral complexity of statecraft in the context of decision making on armed intervention in the post Cold War era This book adds to the debate on humanitarian intervention by analyzing the moral complexity of statecraft when confronted with situations of severe human rights violations Through a comparative case study of President Bill Clinton administration s failure to intervene in the Rwanda

genocide 1994 the George W Bush administration's tepid response to the Darfur atrocities 2003 07 and the Barack Obama administration's leadership behind the limited U N intervention in Libya 2011 it explores the factors domestic and international that influence decision making about humanitarian intervention These cases show not only how international moral concerns often compete with interest based and domestic concerns but how decision makers are often confronted by competing moral imperatives In such situations it is often not clear which imperatives should be followed In an increasingly interconnected world this book examines how we expect state leaders to balance different moral responsibilities This book will be of much interest to students of humanitarian intervention the Responsibility to Protect human rights US foreign policy African politics and IR in general **The SAGE Encyclopedia of War: Social Science Perspectives** Paul

what that means for the future of peace and sovereignty throughout the world **Winning** Francesco Duina,2013-08-25 Why winning doesn't always lead to happiness Most of us are taught from a young age to be winners and avoid being losers But what does it mean to win or lose And why do we care so much Does winning make us happy Winning undertakes an unprecedented investigation of winning and losing in American society what we are really after as we struggle to win our collective beliefs about winners and losers and much more Francesco Duina argues that victory and loss are not endpoints or final destinations but gateways to something of immense importance to us the affirmation of our place in the world But Duina also shows that competition is unlikely to provide us with the answers we need Winning and losing are artificial and logically flawed concepts that put us at odds with the world around us and ultimately ourselves Duina explores the social and psychological effects of the language of competition in American culture Primarily concerned with our shared obsessions about winning and losing Winning proposes a new mind set for how we can pursue our dreams and in a more satisfying way find our proper place in the world Hamilton and Philosophy Aaron Rabinowitz,Robert Arp,2017-07-01 In Hamilton and Philosophy professional thinkers expose examine and ponder the deep and controversial implications of this runaway hit Broadway musical One cluster of questions relates to the matter of historical accuracy in relation to entertainment To what extent is Hamilton genuine history or is it more a reflection of America today than in the eighteenth century What happens when history becomes dramatic art and is some falsification of history unavoidable One point of view is that the real Alexander Hamilton was an outsider and any objective approach to Hamilton has to be that of an outsider Politics always involves a debate over who is on the margins and who is allowed into the center Then there is the question of emphasizing Hamilton's revolutionary aspect when he was autocratic and not truly democratic But this can be defended as presenting a contradictory personality in a unique historical moment Hamilton's character is also one that blends ambition thirst for fame and concern for his immortal legacy with inability to see his own limitations yet combined with devotion to honor and the cultivation of virtue Hamilton's evident ambition led him to be likened to Macbeth and Shakespearean tragedy can explain much of his life The Spiritual Roots of Restorative Justice Michael L. Hastings,2000 How do mobilization for war and the actual war effort affect the environment How do ecological conditions encourage war What are possible non violent solutions to the ecological conflict dynamic Ecology of War Peace attempts to answer these questions in readable prose with an unapologetic bias toward non violence **Cultures of Peace** Elise Boulding,2000-05-01 Renowned sociologist Elise Boulding offers an eminent collection of essays that emphasizes her study of civil society over the past fifty years While most media and academic attention focuses on the extreme violence in today's society Elise Boulding notes an equally significant presence of cultures and societies of peace Here in a volume that

represents a life's work she revisits her theme of the connection among family, community and government and offers enriching perspectives and advice on how to fuel the process of peace. Boulding examines structural violence in terms of the major institutional obstacles to a more peaceful future, the tension between the states and the people trapped inside them, the tension between the techno sphere and the biosphere and between global systems and local know how. She describes social movements around the world that are developing alternative ways of handling the great diversity of human biospheric needs on the planet. In addition, Boulding brings together her experiences to empower the peace building activities if we are to do better in the twenty first century than we have done in the twentieth century. Gandhi and the Psychology of Nonviolence, Volume 1 V. K. Kool, Rita Agrawal, 2020-11-06

The first of two volumes, this book examines Gandhi's contribution to an understanding of the scientific and evolutionary basis of the psychology of nonviolence through the lens of contemporary researches on human cognition, empathy, morality and self control. While psychological science has focused on those participants that delivered electric shocks in Professor Stanley Milgram's famous experiments, these books begin from the premise that we have neglected to fully explore why the other participants walked away. Building on emergent research in the psychology of self control and wisdom, the authors illustrate what Gandhi's life and work offers to our understanding of these subjects who disobeyed and defied Milgram. The authors analyze Gandhi's actions and philosophy as well as original interviews with his contemporaries to elaborate a modern scientific psychology of nonviolence from the principles he enunciated and which were followed so successfully in his Satyagrahas. Gandhi, they argue, was a practical psychologist from whom we can derive a science of nonviolence which, as Volume 2 will illustrate, can be applied to almost every subfield of psychology but particularly to those addressing the most urgent issues of the 21st century. This book is the result of four decades of collaborative work between the authors. It marks a unique contribution to studies of both Gandhi and the current trends in psychological research that will appeal in particular to scholars of social change, peace studies and peace psychology and serve as an exemplar in teaching one of modern psychology's hitherto neglected perspectives.
