Random Descent A Novel:

Random Descent : a Novel Katherine Govier, 1980 **The Cambridge Guide to Women's Writing in English** Lorna Sage, 1999-09-30 This Guide aims to consolidate and epitomise the re-reading of women's writing that has gone on in the last twenty-five years. This is an opportunity for stock-taking a timely project when so much writing has been rediscovered, reclaimed and republished. There are entries on writers, on individual texts and on general terms, genres and movements, all printed in a single alphabetical sequence. The earliest written documents in medieval English, the visionary writings of Julian of Norwich and Margery Kempe, are covered in an historical and geographical sweep that takes us up to the present day. The book reflects the spread of literacy, the history of colonisation and the development of post-colonial cultures, using and changing the English language. The entries are written by contributors from all the countries covered. The result is a work of reference with a unique feeling for the vitality, wealth and diversity of women's writing. *Novel Gazing* Eve Kosofsky Sedgwick, 1997-12-15 *Novel Gazing* is the first collection of queer criticism on the history of the novel. The contributors to this volume navigate new territory in literary theory with essays that implicitly challenge the hermeneutic of suspicion widespread in current critical theory. In a stunning introductory essay, Eve Kosofsky Sedgwick delineates the possibilities for a criticism that would be reparative rather than cynical or paranoid. The startlingly imaginative essays in the volume explore new critical practices that can weave the pleasures and disorientations of reading into the fabric of queer analyses. Through discussions of a diverse array of British, French and American novels, including major canonical novels, best-sellers, children's fiction and science fiction, these essays explore queer worlds of taste, texture, joy and ennui, focusing on such subjects as flogging, wizardry, exorcism, dance, Zionist desire and Internet sexuality. Interpreting the works of authors as diverse as Benjamin Constant, Toni Morrison, T. H. White and William Gibson, along with canonical queer modernists such as James Proust, Woolf and Cather, contributors reveal the wealth of ways in which selves and communities succeed in extracting sustenance from the objects of a culture whose avowed desire has often been not to sustain them. The dramatic reframing that these essays perform will make the significance of *Novel Gazing* extend beyond the scope of queer studies to literary criticism in general. Contributors: Stephen Barber, Renu Bora, Anne Chandler, James Creech, Tyler Curtain, Jonathan Goldberg, Joseph Litvak, Michael Lucey, Jeff Nunokawa, Cindy Patton, Jacob Press, Robert F. Reid, Pharr, Eve Kosofsky Sedgwick, Melissa Solomon, Kathryn Bond Stockton, John Vincent, Maurice Wallace, Barry Weller. **The Literary History of Alberta Volume Two** George Melnyk, 1998 In this, the companion to the landmark volume *The Literary History of Alberta Volume One: From Writing on Stone to World War Two*, George Melnyk examines Alberta literature in the second half of the twentieth century. At last, Melnyk argues, Alberta writers have found their voice and their accomplishments have been remarkable. The contradictory landscape, the stereotypes of the Indian, the Mountie and the Cowboy, and the language of the Other speaking from the margins, these elements all left their impressions on the consciousness of early Alberta. But writers in the last few

decades have turned this inheritance to their advantage to create compelling stories about this place and its people Today Melnyk discovers Alberta writers can appreciate not only this achievement but also its essential source the symbolic communication of Writing on Stone The Literary History of Alberta Volume Two extends the study of Alberta s cultural history to the present day It is a vital text for anyone interested in Alberta s vibrant literary culture

Reading Smell in Eighteenth-Century Fiction Emily C. Friedman, 2016-06-27 Scent is both an essential and seemingly impossible to recover aspect of material culture Scent is one of our strongest ties to memory yet to remember a smell without external stimuli is almost impossible for most people Moreover human beings specifically Western humans ability to smell has been diminished through a process of increased emphasis on odor removal hygienic practices that emphasize de odorization rather than the covering of one odor by another While other intangibles of the human experience have been placed into the context of the eighteenth century novel scent has so far remained largely sidelined in favor of discussions of the visual the aural touch and taste The past decade has seen a great expansion of our understanding of how smell works physiologically psychologically and culturally and there is no better moment than now to attempt to recover the traces of olfactory perceptions descriptions and assumptions Reading Smell provides models for how to incorporate olfactory knowledge into new readings of the literary form central to our understanding of the eighteenth century and modernity in general the novel The multiplication and development of the novel overlaps strikingly with changes in personal and private hygienic practices that would alter the culture s relationship to smell This book examines how far the novel can be understood through a reintroduction of olfactory information After decades of reading for all kinds of racial cultural gendered and other sorts of absences back into the novel this book takes one step further to consider how the recovery of forgotten or overlooked olfactory assumptions might reshape our understanding of these texts Reading Smell includes wide scale research and focused case studies of some of the most striking or prevalent uses of olfactory language in eighteenth century British prose fiction Highlighting scents with shifting meanings across the period bodies tobacco smelling bottles and sulfur Reading Smell not only provides new insights into canonical works by authors like Swift Smollett Richardson Burney Austen and Lewis but also sheds new light on the history of the British novel as a whole

Mokyr,1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential
