Hardaway,2011-02-18 This meticulously documented work sets forth the major causes of the greatest asset bubble in world economic history the American housing bubble which began in 1940 and collapsed in 2007 In the aftermath of the American housing collapse in 2007 many ask why The Great American Housing Bubble The Road to Collapse asks a different and more fundamental question how the bubble was created in the first place To answer that question it examines the causes both political and economic of the American housing bubble created between 1940 and 2007 Those causes encompass everything from federal income tax subsidies for housing to local exclusionary policies banking accounting real estate appraisal and credit agency rating practices and policies The book also takes into account the impact of greed government regulation speculation and psychology including blind faith in investment advisors on the creation of the greatest asset bubble in the economic history of the world The author takes a comparative historical approach examining the current crisis in the light of notorious bubbles of the past In the end he concludes that the events precipitating the most recent collapse can be traced at least in part not to too little government regulation but to too much

*Making Tax Sense* M. Kevin McGee,2019-03-15 Our tax system is a mess And the reason for that mess is our tax system is incoherent A well designed tax system is like a good jigsaw puzzle all the pieces fit together snugly so when the whole thing is fully assembled it forms a coherent picture But our current tax system is disjointed with parts that don t logically fit

together That results in inconsistencies complexity loopholes and distorted incentives We need a tax system that make sense As this book shows however making a traditional income tax coherent is an impossible goal But coherence is achievable if we adjust our target and complete the switch to a consumed income tax a system that taxes all income not when it is earned but when that income is consumed The move towards a consumed income tax was begun decades ago when we first adopted IRAs and other tax deferred savings accounts We just needed to complete the evolution The book explores a variety of tax issues among them savings small businesses owner occupied houses and corporations and develops seven groups of recommended changes These changes would result in a tax system that would be pro growth by eliminating the existing disincentives to saving and investment But the tax system would also remain progressive with the wealthy taxed as much as and perhaps even more than currently That combination could make the recommended changes attractive to members of both parties and might bring to a close the political seesaw in tax policy that we've experienced over that last several decades
