*The Encyclopedia of the Industrial Revolution in World History* Kenneth E. Hendrickson III, 2014-11-25. As editor, Kenneth E. Hendrickson III notes in his introduction: "Since the end of the nineteenth century, industrialization has become a global phenomenon. After the relative completion of the advanced industrial economies of the West after 1945, patterns of rapid economic change invaded societies beyond western Europe, North America, the Commonwealth, and Japan. In *The Encyclopedia of the Industrial Revolution in World History*, contributors survey the Industrial Revolution as a world historical phenomenon rather than through the traditional lens of a development largely restricted to Western society. *The Encyclopedia of the Industrial Revolution in World History* is a three-volume work of over 1,000 entries on the rise and spread of the Industrial Revolution across the world. Entries comprise accessible but scholarly explorations of topics from the aerospace industry to zaibatsu. Contributor articles not only address topics of technology and technical innovation but emphasize the individual human and social experience of industrialization. Entries include generous selections of biographical figures and human communities with articles on entrepreneurs, working men and women, families, and organizations. They also cover legal developments, disasters, and the environmental impact of the Industrial Revolution. Each entry also includes cross references and a brief list of suggested readings to alert readers to more detailed information. *The Encyclopedia of the Industrial Revolution in World History* includes over 300 illustrations as well as artfully selected extended quotations from key primary sources, from Thomas Malthus' *Essay on the Principle of Population* to Arthur Young's look at Birmingham, England, in 1791. This work is the perfect reference work for anyone conducting research in the areas of technology, business, economics, and history on a world historical scale."
