century master Sepharial 1864 1929 was one of the leading astrologers in the early 20th century English astrological revival
Primaries were his favorite means of forecasting Primaries unlike simple transits or secondary directions are not immediately
obvious to the average student So in this book the author starts with the basic definitions He then explains how to calculate
directions in mundo directions in the zodiac as well as parallel directions He suggests methods of organization and describes
what effects primary directions may produce In the process he gives an overview of the three main schools of forecasting The
Fatalists the Casuists and the Idealists and gives the pros and cons of each Sepharial then discusses the two major
individuals behind primaries These are Claudius Ptolemy who invented the semi arc primary method in the second century
AD and the 17th century Italian monk Placidus de Titis who devised the complex house system that enabled primaries to be
calculated easily and rapidly Sepharial next tackles directions under Poles which were a favorite of R C Smith the first of
several men known as Raphael Then the resolution of problems unique to Primaries The proper method to calculate the Part
of Fortune Oblique Ascension Descension rather than simple zodiacal longitudes various unique challenges with primary
directions and the moon and the true way to calculate directions to house cusps along with some novel shortcuts This book
originally entitled Directional Astrology was the revised and expanded successor to the author's earlier Prognostic Astrology
It is also superior to his better known Primary Directions Made Easy Using this system Sepharial made many notable
forecasts most famously that of the end of World War I and the abdication of the Kaiser Interest in this fascinating system has
