Rapid Assessment Of The Biodiversity And Social Aspects Of The Aquatic Ecosystem:

Global Biodiversity T. Pullaiah, 2021-03-18 This new four volume set Global Biodiversity provides a wealth of insightful information on the biodiversity of selected nations around the world The volumes provide informative summaries of the available data on both wild and cultivated plants wild and domesticated animals and microbes of the different nations selected

A Rapid Marine Biodiversity Assessment of the Coral Reefs of Northwest Madagascar Sheila Anne McKenna, Gerald R. Allen, 2005 This volume 31 in the series reports the results of a marine survey in 2002 off the northwestern coast of Madagascar This marine area is one that many conservationists think has the greatest potential in all of Madagascar for the development of both ecotourism and marine protected areas The survey documented a rich variety of coral mollusk and fish species and the report makes further recommendations for conservation in the region

A Rapid Biological Assessment of North Lorma, Gola and Grebo National Forests, Liberia Peter Hoke, 2007 Liberia's national forests are among the last refuges in West Africa for large migrating mammals This volume summarizes the findings of a biodiversity survey of three forests as part of the Liberia Forestry Initiative an effort to rehabilitate and reform Liberia's threatened woodlands The survey found each forest to harbor a wealth of biodiversity and a significant number of species of conservation concern Researchers here document the discovery of six species new to science report eighteen new findings for Liberia and present conservation recommendations based on survey results

Rapid biological assessment of three classified forests in southeastern Guinea Heather E. Wright, 2006 This report presents the biological results and conservation recommendations of a 2003 expedition into the forests of southeast Guinea whose plant and animal species have been little known Researchers led by a team from the Center for Applied Biodiversity Science found 540 species of plants and over 400 animal species with particular diversity among birds

A Rapid Assessment of the Biodiversity and the Social Aspects of the Aquatic Ecosystems of the Orinoco Delta and Gulf of Paria, Venezuela Carlos A; Alonso Lasso (Leeanne E. et al), 2007

A Biological Assessment of the Terrestrial Ecosystems of the Draw River, Boi-Tano, Tano Nimiri and Krokosua Hills Forest Reserves, Southwestern Ghana Jennifer McCullough, Jan Decher, David Guba Kpelle, 2005 This Rapid Assessment Program Bulletin reports the findings of an expedition in 2003 into four forest reserves in southwestern Ghana that were recently designated as globally significant biodiversity areas by the Ghanaian government The survey documented more than 1 300 plant and animal species with one amphibian species new to science and makes specific recommendations for conserving the biological resources of these areas

The State of the World's Land and Water Resources for Food and Agriculture Food and Agriculture Organization of the United Nations, 2013-06-17 The State of the World's Land and Water Resources for Food and Agriculture is FAO's first flagship publication on the global status of land and water resources It is an advocacy report to be published every three to five years and targeted at senior level decision

makers in agriculture as well as in other sectors SOLAW is aimed at sensitizing its target audience on the status of land resources at global and regional levels and FAO's viewpoint on appropriate recommendations for policy formulation SOLAW focuses on these key dimensions of analysis i quantity quality of land and water resources ii the rate of use and sustainable management of these resources in the context of relevant socio economic driving factors and concerns including food security and poverty and climate change This is the first time that a global baseline status report on land and water resources has been made It is based on several global spatial databases e g land suitability for agriculture land use and management land and water degradation and depletion for which FAO is the world recognized data source Topical and emerging issues on land and water are dealt with in an integrated rather than sectoral manner The implications of the status and trends are used to advocate remedial interventions which are tailored to major farming systems within different geographic regions

Indicators and Surrogates of Biodiversity and Environmental Change David

Lindenmayer, Philip Barton, Jennifer Pierson, 2015-11-02 Ecological indicators and surrogates are used widely by resource managers to monitor and understand complex biota and ecosystem processes Their potential to guide complex resource management has meant they have been proposed for use in all ecosystems worldwide Despite extensive research into indicators and surrogates there remains much controversy about their use in addition to major issues and knowledge gaps associated with their identification testing and application Indicators and Surrogates of Biodiversity and Environmental Change provides insights into the use of indicators and surrogates in natural resource management and conservation where to use them where not to use them and how to use them Using an ecological approach the chapters explore the development application and efficacy of indicators and surrogates in terrestrial aquatic marine and atmospheric environments The authors identify current gaps in knowledge and articulate the future directions for research needed to close those gaps This book is written by the world's leading thinkers in the area of indicators and surrogates It is the first major synthesis of learnings about indicators and surrogates and will be a critical resource for the vast number of people developing and applying them in ecosystems around the world It will be an essential resource for scientists policy makers and students with interests in surrogates and indicators

Water ecosystem services Martin-Ortega, Julia, Ferrier, Robert C., Gordon, Iain J., Khan,

Shahbaz, Cambridge, UK, Cambridge University Press, 2015-04-30 This comprehensive volume describes how ecosystem services based approaches can assist in addressing major global and regional water challenges such as climate change biodiversity loss and water security in the developing world by integrating scientific knowledge from different disciplines such as hydrological modelling environmental economics psychology and international law Empirical assessments at the national catchment and regional levels are used to critically appraise this systemic approach and the merits and potential limitations are presented The practicalities of this approach with regard to water resources management nature conservation and sustainable business practices are discussed and the role of society in underpinning the concept of ecosystem services is

Integrated Coastal Zone Management of Coral Reefs Kent Gustavson,Richard M. Huber,H. Jack Ruitenbeek,2000 The applied research indicates that to improve awareness park education programs should be targeted specifically to the user groups primarily through outreach programs Further the Park s management programs should be highlighted particularly the beneficial tangible products and services benefits the Park provides to each user group The closer the tie between reef conditions and business earnings the greater the users support for reef conservation Coral reefs are sometimes referred to as canaries of the sea because of their early warning ability to show near shore oceanic stress Because of their biological diversity they are also called rainforests of the sea Coral reefs are vital to the well being of millions of people Coral reef managers and government officials trying to save their valuable national resources have turned to research on coral reefs for help The research presented in this publication merits a great deal of notice because the output is useful for decision support and training tools in integrated coastal zone management ICZM The work on cost effectiveness analysis has developed integrated economic and ecological models relying extensively on fuzzy logic procedures to model impacts and effects of interventions within the reef environment By contrast the marine system valuation work provides economic

valuations of coral reefs demonstrating the use of different modeling methods and treating key policy issues within this context This publication will interest coastal zone experts and managers worldwide *Implementing Environmental Flows: Lessons for Policy and Practice* David Tickner,Nitin Kaushal,Robert Alexander Speed,Rebecca Elizabeth Tharme,2020-10-08 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least ten articles all centered on a particular subject With their unique mix of varied contributions from Original Research to Review Articles Frontiers Research Topics unify the most influential researchers the latest key findings and historical advances in a hot research area Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office frontiersin.org about contact Politics and Development in a Transboundary Watershed Joakim Öjendal,Stina Hansson,Sofie Hellberg,2011-11-25 Water and its governance is becoming a global concern partly because it is turning into a goods in short supply with devastating effects on literally billions of people but also because it is the carrier of global warming whether through irregular weather patterns or through flooding water is how global warming will be felt The lion s share of the globally available fresh water resources is to be found in transboundary systems In spite of its significance the generated knowledge on how to deal with transboundary waters is weak and leaves policy makers with seemingly unavoidable trade off dilemmas and prioritizations often with detrimental effects In order to disentangle this predicament this volume works with one case the Lower Mekong Basin and covers state of the art academic and practitioners knowledge and hence appeals to a wide audience The topic this volume addresses is situated in the nexus of an IR International Relations approach focussing on transboundary politics and its inclination to remain within the sphere of state sovereignty and national interest on the one hand and Development studies with its imperatives on participation planning and intervention on the other The dilemma we argue of better understanding transboundary water management lies in how to understand how these two rationalities can be simultaneously nurtured Audience This book will be relevant to scholars as it provides cutting edge research and students since it covers the primary debates in the field interested in resource management regional politics and development issues in the area It also addresses the global debate on transboundary water management and presents an in depth case of one of the globally most sophisticated attempts at pursuing sustainable river basin management Finally practitioners and policymakers would benefit greatly because all contributions have explicit policy relevance launching suggestion on improvements in water management
