EXAMS AND SPEED READING Silviu Vasile, There are many books programs and speed reading trainings that offer information but few that offer value There are more and more people who want to teach you about speed reading which is basically great It s just that there from the information about this extraordinary field you have to be able to extract the essence and be able to pass it on I ve been studying speed reading for the last 15 years I have done it with passion and dedication I have made speed reading an important goal and I have lived in the culture of speed reading I have spent thousands of hours thinking about what is important in this area and I think I have come to understand the importance of speed reading for the mind and body What I present in my books is information that you can put to use immediately getting good and great results What you start building today will become the cornerstone of your personal and professional success tomorrow The more you decide to invest in valuable knowledge the more it will transform you and make you a person capable of climbing step by step to the place where you can reap the full fruits of your labour It s a long road to get there and I d be lying to you if I said it was an easy road You need a lot of willpower and discipline to be able to take those exams that life offers you as a chance to find out who you really are and what are the things that limit you inside All those inner limitations will stop you in your tracks block you or turn you back even when you may have very little left to finish What you learn from speed reading will help you make choices and not just any choices but choices that will bring real change to your life Think of yourself as living in a consumer world and if you look back you will see that you have bought many products and services that you have not used You ve bought a subscription you didn t use or a fitness machine you used a few times and then forgot about it When you bought it you promised yourself that you would use it every day and yet you didn t It happened

because you didn't live or don't live long enough in the culture of that thing You don't realize how important it is and how much you need to exercise otherwise you would find the time and energy to exercise regularly maybe even daily *SILVER COURSE \* SPEED READING* Silviu Vasile, If you forget too quickly and too easily important things fundamental information and this negatively affects your personal and professional performance this forgetfulness becomes a problem for your development If you don't have a trained memory or if you haven't mastered speed reading techniques very well then all is not lost This book can help you for the next period but also for your whole life from now on You are the most qualified person who knows or needs to know what you are doing with your life where you are going and what your goals are for the future Think of yourself right now at this moment as the sum of the investments you have made over time up to the present moment Whether you are happy or not you have yourself to congratulate or to blame If you know what you want then you will continue to invest in your future If you're uncertain then you'll indulge in commonality and mediocrity If you've failed to perform so far or if you have but feel you can and deserve to do better then your answer is speed reading Just understand that speed reading is only your first step to success Speed reading teaches you what to read and how to read You need to give speed reading a chance Don't start off sceptically thinking that speed readers are just charlatans because you've got certain benchmarks milestones to guide you I've succeeded in this area and you certainly will too I have overcome my condition as a mediocre student then you will succeed in doing the same You are no different from successful people We all have the same huge potential Thanks to the activation of this potential we can read quickly and increase our personal value permanently What I'm suggesting to you through speed reading is to accumulate assets that bring you residual income extra energy and residual time that you can reinvest What I propose is that you invest resources in speed reading and brilliance When you are a genius person then whatever comes into your life you will be able to find solutions opportunities to evolve and embrace new life principles The first benefit of speed reading is improved memory The weaker your memory the more information gaps there will be and these gaps will decrease your personal performance You are a sum of memories If tomorrow you start forgetting important things then your life will never be the same Memory is not a quality you were born with and don't have to do anything for Memory is a medium to long term investment and depending on the capital you choose to invest you will get results If you take it seriously from high school and then train your memory during college and when you finish college you don't hang your degree on a nail but continue the training then you are already a successful person This course will only answer a number of questions and confirm what you already know **Swift Viewing** Charles R.
