few bibliophiles have sought to preserve the original material and no one has seriously attempted to catalogue it. It is true that he brought together two large libraries of Rara Arithmetica but he was neither a true book lover nor a true scholar for he gathered his treasures purposely to see them dispersed, his commercial spirit scattering at random what should have been kept intact for the use of scholars. Prince Boncompagni, the most learned of all collectors in this domain, lived to see an unappreciative city ignore his offer to make his magnificent library permanent and at his death it was scattered abroad as had been the lesser ones of Kloss and De Morgan. The third great collection of early textbooks which has been made in recent years is that of Mr Plimpton. Of the libraries of arithmetics printed before the opening of the seventeenth century, his is the largest that has ever been brought together, not excepting Boncompagni's, and it may well be doubted if another so large will again be collected by one man. De Morgan was able to examine in the British Museum and elsewhere less than a hundred arithmetics written before 1601, including all editions, but Mr Plimpton has more than three hundred, a number somewhat in excess of that reached by Boncompagni. Indeed, there are few arithmetics of much importance that are not found in one edition or another in his library. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com).
