and at the same time gives an encyclopaedic overview of major topics associated with vocalization from molecular cellular level to behavior and cognitive processing It is written in a strictly scientific way but clear enough to serve not only for specialized researchers in different fields of neuroscience but also for academic teachers of neuroscience including behavioural neuroscience affective neuroscience clinical neuroscience neuroethology biopsychology neurolinguistics speech pathology and other related fields and also for research fellows graduate and other advanced students who widely need such a source publication The first comprehensive handbook on what we know about vocalization in Mammals Carefully edited the handbook provides an integrated overview of the area International list of highly regarded contributors including Jaak Panksepp Washington State University David McFarland Oxford John D Newman NIH Unit on Developmental Neuroethology Gerd Poeggel Leipzig Shiba Keisuke Chiba City Japan and others tightly edited by a single well regarded editor who has edited a special issue in Behavioral Brain Research on the topic before
