Rational Design Of International Institutions:

The Rational Design of International Institutions Barbara Koremenos, 2001 *The Rational Design of International Institutions* Barbara Koremenos, Charles Lipson, Duncan Snidal, 2003-12-08 International institutions vary widely in terms of key institutional features such as membership scope and flexibility In this 2004 book Barbara Koremenos Charles Lipson and Duncan Snidal argue that this is so because international actors are goal seeking agents who make specific institutional design choices to solve the particular cooperation problems they face in different issue areas Using a Rational Design approach they explore five features of institutions membership scope centralization control and flexibility and explain their variation in terms of four independent variables that characterize different cooperation problems distribution number of actors enforcement and uncertainty The contributors to the volume then evaluate a set of conjectures in specific issue areas ranging from security organizations to trade structures to rules of war to international aviation Alexander Wendt appraises the entire Rational Design model of evaluating international organizations and the authors respond in a conclusion that sets forth both the advantages and disadvantages of such an approach **The Oxford Handbook of International**

The Concertation Impulse in World Politics Andrew F. Cooper, 2023-11-30 This book unravels the centrality of contestation over international institutions under the shadow of crisis Breaking with the widely accepted image in the mainstream US centric literature of an advance of global governance supported by pillars of institutionalized formality Andrew Cooper points to the retention of a habitual impulse towards concertation related to informal institutionalism Rather than endorsing the view that world politics is moving inexorably towards a multilateral rules based order he places the onus on the resilience of a hierarchical self selected concert model that combines a stigmatized legacy with the ability to reproduce in an array of associational formats Relying for conceptual guidance on the recovery of a valuable component in the intellectual contribution of Hedley Bull a compelling case is made that concertation represents a fundamental institution as a peer competitor to multilateralism In effect the debate over institutional design is recast away from an emphasis on utilitarian maximization towards a wider set of cardinal and highly contested questions the nature of rules at the global level the salience of institutional clubs and the meaning and impact of in equality and cooperation coordination among states across the incumbent West non incumbent Global South divide
