Nature and Scripture in the Abrahamic Religions: Up to 1700 (2 vols) Scott Mandelbrote, Jitse van der Meer, 2009-01-31 The four companion volumes of Nature and Scripture in the Abrahamic Religions contribute to a contextual evaluation of the mutual influences between scriptural exegesis and hermeneutics on the one hand and practices or techniques of interpretation in natural philosophy and the natural sciences on the other We seek to raise the low profile this theme has had both in the history of science and in the history of biblical interpretation Furthermore questions about the interpretation of scripture continue to be provoked by current theological reflection on scientific theories We also seek to provide a historical context for renewed reflection on the role of the hermeneutics of scripture in the development of theological doctrines that interact with the natural sciences Contributors are Peter Barker Paul M Blowers James J Bono Pamela Bright William E Carroll Kathleen M Crowther Maurice A Finocchiaro Carlos Fraenkel Miguel A Granada Peter Harrison Kenneth J Howell Eric Jorink Kerry V Magruder Scott Mandelbrote Charlotte Methuen Robert Morrison Richard J Oosterhoff Volker R Remmert T M Rudavsky Stephen D Snobelen Jitse M van der Meer and Rienk H Vermij

Theistic Evolution J. P. Moreland, Stephen C. Meyer, Christopher Shaw, Ann K. Gauger, Wayne Grudem, 2020-06-20 Winner of the ECPA Book of the Year Award for Bible Reference Works Many prominent Christians insist that the church must yield to contemporary evolutionary theory and therefore modify traditional biblical ideas about the creation of life They argue that God used albeit in an undetectable way evolutionary mechanisms to produce all forms of life Featuring two dozen highly credentialed scientists philosophers and theologians from Europe and North America this volume contests this proposal documenting evidential logical and theological problems with theistic evolution making it the most comprehensive critique of theistic evolution yet produced Explains why theistic evolution is not congruent with a biblical worldview Features nineteen essays written by well known experts in their fields Designed to be used as a textbook for courses on religion and evolution Accessible for those without expertise in the subject

Kepler's Cosmological Synthesis Patrick J. Boner, 2013-06-17 The cosmology of Johannes Kepler remains a mystery On the one hand Kepler's speculations on spiritual faculties are seen as the remnants of Renaissance philosophy On the other his comparison of the cosmos to a clock summons the mechanical metaphor that shaped modern science This book explores the inseparable connections between Kepler's vitalistic views and his more enduring accomplishments in astronomy The key argument is that Kepler's celestial biology served as a bridge between his revolutionary astronomy and other less scientific interests particularly astrology Kepler's Cosmological Synthesis sheds new light on one of the foundational figures of the Scientific

Revolution By uncovering a new form of coherence in Kepler's world picture it traces the unlikely intersections of mechanism and vitalism that transformed the fabric of the heavens **Like A Pelting Rain** Roland Cap Ehlke, 2018-04-10 When it comes to analyzing today's culture people talk about politics economics and even morals Like a Pelting Rain The Making of the Modern Mind goes deeper and looks at the spiritual condition of Western civilization How we arrived at where we are is the long and complex interplay of theology and culture Understanding the trends of the times does not necessitate accepting them God calls upon Christians to contend for the faith The Holy Spirit is still at work and the Gospel remains the power of God for the salvation of all who believe **Encyclopedia of Christian Education** George Thomas Kurian, Mark A. Lamport, 2015-05-07 Christianity regards teaching as one of the most foundational and critically sustaining ministries of the Church As a result Christian education remains one of the largest and oldest continuously functioning educational systems in the world comprising both formal day schools and higher education institutions as well as informal church study groups and parachurch ministries in more than 140 countries In The Encyclopedia of Christian Education contributors explore the many facets of Christian education in terms of its impact on curriculum literacy teacher training outcomes and professional standards This encyclopedia is the first reference work devoted exclusively to chronicling the unique history of Christian education across the globe illustrating how Christian educators pioneered such educational institutions and reforms as universal literacy home schooling Sunday schools women's education graded schools compulsory education of the deaf and blind and kindergarten With an editorial advisory board of more than 30 distinguished scholars and five consulting editors The Encyclopedia of Christian Education contains more than 1 200 entries by 400 contributors from 75 countries These volumes covers a vast range of topics from Christian education History spanning from the church's founding through the Middle Ages to the modern day Denominational and institutional profiles Intellectual traditions in Christian education Biblical and theological frameworks curricula missions adolescent and higher education theological training and Christian pedagogy Biographies of distinguished Christian educators This work is ideal for scholars of both the history of Christianity and education as well as researchers and students of contemporary Christianity and modern religious education The Fall of Man and the Foundations of Science Peter Harrison, 2007-12-20 See **Interpreting Kuhn** K. Brad Wray, 2021-07-08 One might wonder if there is anything new to say about Thomas Kuhn and his views on science Scholarship on Kuhn though has changed dramatically in the last 20 years This is so for a number reasons *Nature and Scripture in the Abrahamic Religions: God, Scripture and the rise of modern science (1200-1700)* Jitse M. van der Meer, Scott Mandelbrote, 2008 These volumes describe how the development of the different styles of interpretation found in reading scripture and nature have transformed ideas of both the written word and the created world Perspectives on Science and Christian Faith , 2006 **Nature and Scripture in the Abrahamic Religions: 1700-Present** Scott Mandelbrote, Jitse van der Meer, 2009-01-31 The four companion volumes of Nature and Scripture in the Abrahamic Religions contribute to a contextual evaluation of the

mutual influences between scriptural exegesis and hermeneutics on the one hand and practices or techniques of interpretation in natural philosophy and the natural sciences on the other. We seek to raise the low profile this theme has had both in the history of science and in the history of biblical interpretation. Furthermore, questions about the interpretation of scripture continue to be provoked by current theological reflection on scientific theories. We also seek to provide a historical context for renewed reflection on the role of the hermeneutics of scripture in the development of theological doctrines that interact with the natural sciences. Davis, Henri Wijnandus de Knijff, Marwa Elshakry, Richard England, Menachem Fisch, George Harinck, Bernhard Kleeberg, Scott Mandelbrote, G. Blair Nelson, Alexei V. Beyond Borders Néstor Herrán, Tayra Lanuza-Navarro, Josep Simon, 2009-05-27. How does scientific knowledge circulate? Does scientific communication shape the making of science? Is the making of science a national endeavour or does it have an international or transnational dimension? Are teaching and research equally relevant in this endeavour? How can history of science react to the challenges posed by the changing practices of science in historical context? *Beyond Borders* is a book generated at the heart of these fundamental questions. In the last decades, the history of science has attained a high degree of disciplinary maturity and sophistication. However, perception of disciplinary crisis is apparent behind calls for the search of new big pictures and their implementation in teaching and communicating the history of science to wider audiences. Temporal and narrative fragmentation are seen as major drawbacks hindering the development of the discipline. In addition, national linguistic and methodological division is increasingly afflicting its practice. Like other areas in the humanities and in contrast to the sciences, the history of science has nowadays a pronounced local character which clearly constrains its intellectual output. Challenging this state of affairs is a major aim of this book, which argues for a resolute call for intellectual and methodological pluralism and internationalism. Through a broad diversity of subjects, periods, and geographies, covering from studies of sixteenth-century astrological texts to contextual analysis of twentieth-century X-ray spectroscopy, this collection of papers and historiographical essays offers a fresh overview of the field and its major questions. *Beyond Borders* revisits five major topics in history of science: namely, the early modern map of knowledge, pedagogy and science, science popularization, science and the nation, and the geography of scientific centres and peripheries. Engaging with a broad diversity of historiographical and methodological approaches in an international perspective, *Beyond Borders* is a rich and plural manifesto contributing to the reflective appraisal of history of science as a discipline.
