Reading Images Narrative Discourse And Reception In The Thirteenth Century Illuminated Apocalypse:

Reading Images Suzanne Lewis, 1995-11-24 *Reading Images* focuses on the multi layered relationships between the textual image and its reader viewer in the Apocalypse manuscripts produced in England during the thirteenth century a period of profound changes in the social and cultural fabric The exponential expansion in the production and dissemination of illuminated manuscripts that occurred at this time provided a critical cultural mechanism for the creation of new technologies of the self As the Apocalypse narrative was visualized in pictures it became a powerful paradigm within which problematic contemporary experiences such as anti Judaism the later Crusades and expectations of the world s end could be defined *Reading Images* explores the kinds of contemporary mythologies that constitute ideology a realm in which visual representation becomes an agent rather than a reflector of social change

The Queen Mary Psalter Anne Rudloff Stanton, 2001 Illuminated manuscripts are among the more intimate works of art surviving from the medieval period The Queen Mary Psalter c 1316 21 has long been recognized as one of the most outstanding English Gothic manuscripts Its devotional texts are framed by an encyclopedic series of narrative images painted in a delicate and courtly style The psalms are introduced by an Old Testament preface in which tinted drawings are explained by French captions The psalm decoration incorp a combination of framed illuminations of the life of Christ at the beginnings of important psalms and tinted drawings in the bottom margin of every page that tell stories ranging from the bestiary to the lives of the saints Winner of the 2000 Millennium Award 100 illus *Postcolonising the Medieval Image* Eva Frojmovic, Catherine E. Karkov, 2017-03-16

Postcolonial theories have transformed literary historical and cultural studies over the past three decades Yet the study of medieval art and visualities has in general remained Eurocentric in its canon and conservative in its approaches *Postcolonising* as the eleven essays in this volume show entails active intervention into the field of medieval art history and visual studies through a theoretical reframing of research This approach poses and elicits new research questions and tests how concepts current in postcolonial studies such as diaspora and migration under represented artistic cultures accented art making displacement intercultural versus transcultural hybridity presence absence can help medievalists to reinvigorate the study of art and visuality Postcolonial concepts are deployed in order to redraft the canon of medieval art thereby seeking to build bridges between medievalist and modernist communities of scholars Among the varied topics explored in the volume are the appropriation of Roman iconography by early medieval Scandinavian metalworkers multilingualism and materiality in Anglo Saxon culture the circulation and display of Islamic secular ceramics on Pisan churches cultural negotiation by Jewish minorities in Central Europe and the Iberian peninsula Holy Land maps and medieval imaginative geography and the uses of Thomas Becket in the colonial imaginary of the Plantagenet court *Narrating Medicine in Middle English Poetry* Eve Salisbury, 2022-08-11 Exploring medical writing in England in the 100 years after the advent of the Great Mortality this book examines the storytelling practices of poets patients and physicians in the midst of a medieval public health crisis and

demonstrates how literary narratives enable us to see a kinship between poetry and the healing arts Looking at how we can learn to diagnose a text as if we were diagnosing a body Salisbury provides new insights into how we can recuperate the voices of those afflicted by illness in medieval texts when we have no direct testimony She considers how we interpret stories told by patients in narratives mediated by others ways that women factor into the shaping of a medical canon how medical writing intersects with religious belief and memorial practices governed by the Church and ways that regimens of health benefit a population in the throes of an epidemic

Women in Christianity in the Medieval Age

Laura Kalas, Roberta Magnani, 2024-12-10 This volume offers a comprehensive introduction to and investigation of the multivocality of women's experience in the Middle Ages In medieval Europe women saw their role in the Christian Church and society progressively confined to conflicting models of femininity epitomised by the dichotomy of Eve Mary Classical views of gender predicated on misogynistic dichotomies which confined women to matter and the corruption of the flesh were consolidated in powerful male dominated clerical institutions and widely disseminated Towards the end of the Middle Ages however women's corporeality and somatic spirituality contributed to and influenced burgeoning modes of piety centred around the cult of the Virgin Mary and the veneration of the suffering body of Christ on the Cross This shift in devotional practices afforded women as bodily beings the space for an increased level of self expression self realisation and authority Ranging from philosophical and theological enquiry to education and art as well as medical sciences and popular beliefs the essays in this collection account for the complexities and richness of the conceptualisations and lived experiences of medieval Christian women The book will be especially relevant to students and scholars of religion and history with an interest in medieval studies and gender Whilst expounding the key strands of thinking in the field it engages with and contributes to some of the latest scholarly research

Memory and Commemoration in Medieval Culture Elma Brenner,Meredith Cohen,Mary Franklin-Brown,2016-04-22 In medieval society and culture memory occupied a unique position It was central to intellectual life and the medieval understanding of the human mind Commemoration of the dead was also a fundamental Christian activity Above all the past and the memory of it occupied a central position in medieval thinking from ideas concerning the

family unit to those shaping political institutions Focusing on France but incorporating studies from further afield this collection of essays marks an important new contribution to the study of medieval memory and commemoration Arranged thematically each part highlights how memory cannot be studied in isolation but instead intersects with many other areas of medieval scholarship including art history historiography intellectual history and the study of religious culture Key themes in the study of memory are explored such as collective memory the links between memory and identity the fallibility of memory and the linking of memory to the future as an anticipation of what is to come Cross, Crown & Community David J. B. Trim, Peter J. Balderstone, 2004 The values and institutions of the Christian Church remained massively dominant in early modern English society and culture but its theology liturgy and unity were increasingly disputed The period was overall one of institutional conformity and individual diversity the centrality of Christian religion was universally acknowledged yet the nature of religion and of religious observance in England changed dramatically during the Reformation Renaissance and Restoration Further because English culture was still biblical and English society was still religious the state involved itself in ecclesiastical matters to an extraordinary extent Successive political and ecclesiastical administrations were committed to helping each other but their attempts to mould religious beliefs and customs were effectively attempts to modify English culture Church and state were complementary yet because they were ultimately distinct estates they could work only at best uneasily in partnership with each other Cultural output is thus an ideal lens for examining this period of tension in the church state and society of England The case studies contained in this volume examine the intersection of politics religion and society over the entire early modern period through distinct examples of cultural texts produced and cultural practices followed *Encyclopedia of Comparative Iconography* Helene E. Roberts, 2013-09-05 First published in 1998 The Encyclopedia of Comparative Iconography compares the uses of iconographic themes from mythology the Bible and other sacred texts literature and popular culture in works of art through various periods cultures and genres Art historians now tend to study narrative themes depicted in works of art in relation to such subjects as gender and sexuality politics and power ownership and possession ceremony and ritual legitimacy and authority The Encyclopedia of Comparative Iconography reflects these new approaches by ordering the themes of various iconographic sources in particular biblical mythological and literary texts according to these new emphases Each handsomely illustrated entry discusses the major relevant iconographic narratives and the historical background of each theme A list of selected works of art that accompanies each essay guides the reader to examples in art that depict the theme under discussion Each essay includes a list of suggested reading that provides further sources of information about the themes A general bibliography of reference books is listed separately and can be used in association with all the essays With 119 entries written by 42 experts the Encyclopedia of Comparative Iconography is an important reference work for art historians students of art history artists and the general reader
