Improving Adult Literacy Instruction National Research Council, 2012-08-27

More than an estimated 90 million adults in the United States lack the literacy skills needed for fully productive and secure lives. The effects of this shortfall are many. Adults with low literacy have lower rates of participation in the labor force and lower earnings when they do have jobs, for example. They are less able to understand and use health information. And they are less likely to read to their children, which may slow their children's own literacy development. At the request of the U.S. Department of Education, the National Research Council convened a committee of experts from many disciplines to synthesize research on literacy and learning in order to improve instruction for those served in adult education in the U.S.

The committee's report *Improving Adult Literacy Instruction: Options for Practice and Research* recommends a program of research and innovation to gain a better understanding of adult literacy learners, improve instruction, and create the supports adults need for learning and achievement. *Improving Adult Literacy Instruction: Developing Reading and Writing*, which is based on the report, presents an overview of what is known about how literacy develops the component skills of reading and writing and the practices that are effective for developing them. It also describes principles of reading and writing instruction that can guide those who design and administer programs or courses to improve adult literacy skills. Although this is not intended as a how-to manual for instructors, teachers may also find the information presented here to be helpful as they plan and deliver instruction.

Improving Adult Literacy Instruction National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Learning Sciences: Foundations and Applications to Adolescent and Adult Literacy, 2012-04-26. A high level of literacy in both print and digital media is required for negotiating most aspects of 21st century life, including supporting a family, education, health, civic participation, and competitiveness in the global economy. Yet more than 90 million U.S. adults lack adequate literacy. Furthermore, only 38 percent of U.S. 12th graders are at or above proficient in reading. *Improving Adult Literacy Instruction* synthesizes the research on literacy and learning to improve literacy instruction in the United States and to recommend a more systemic approach to research, practice, and policy. The book focuses on individuals ages 16 and older who are not in K-12 education. It identifies factors that affect literacy development in adolescence and adulthood in general and examines their implications for strengthening literacy instruction for this population. It also discusses technologies for learning that can assist with multiple aspects of teaching, assessment, and accommodations for learning. There is inadequate knowledge about effective instructional practices and a need for better assessment and ongoing monitoring of adult students' proficiencies, weaknesses, instructional environments, and progress, which might guide instructional planning. *Improving Adult Literacy Instruction* recommends a program of research and innovation to validate, identify the boundaries of, and extend current knowledge to improve instruction for adults and adolescents outside school. The book is a valuable resource for curriculum developers, federal agencies such as the Department of Education, administrators, educators, and funding agencies.

Applying Research in Reading Instruction for Adults Susan McShane, 2013-01-27. Reading is the most basic of skills. Reading provides access to other skills and knowledge, facilitates life-long learning, and opens doors to opportunity. The National Institute for Literacy is authorized by the U.S. Congress to collect and disseminate information on the components of reading and the findings from scientific research. The National Center for Family Literacy fully endorses the national emphasis on reading and the efforts to promote scientifically based reading instruction for children and adults. We offer this resource for adult education teachers who want to build and strengthen adults' reading skills. We hope that adult education instructors in family literacy, Adult Basic Education, and other basic skills programs will find it useful. We know that large numbers of adult learners need to improve their

reading skills And yet many instructors in adult education programs do not teach reading explicitly for several reasons The assessments used in most programs don't reveal the complexities of adults' reading needs Teachers often have only fragmentary knowledge about reading instruction Many have not had specific preparation in this area Most classes include adults with extremely varied skills making specifically targeted individualized instruction difficult if not impossible Teachers are challenged to find ways to incorporate reading instruction into their regular classroom schedules routines and lessons This book was written with these realities in mind It aims first to build background knowledge about reading and scientifically based reading instruction The language and format are teacher friendly using student and classroom illustrations and sample instructional activities to make research principles concrete for readers The focus in applying the research is on modeling thinking planning and problem solving in the context of fictional adult education settings The student and class profiles in these illustrations are based on actual assessment data from adult literacy research studies a reminder to readers of this book that it is a practical resource for use with real adult learners We titled this book *First Steps* because we know that no single resource can provide all the answers everything that's required to change practice But we believe this is a valuable resource for a teacher's professional development journey By building a basic understanding of research based reading instruction and offering suggestions for starting off in the right direction we hope to whet teachers' appetites for further learning As teachers and programs become more capable of applying research based principles for reading assessment and instruction the real winners should be adult learners and their families Improved literacy skills may allow these adults to take giant steps in the journey of lifelong learning We are privileged to play a part in this important effort
