Reading Matters Narrative In The New Media Ecology:

Reading Matters Joseph Tabbi, Michael Wutz, 2018-05-31 The convergence of twentieth century narrative and technology is one of the most important developments in current literary study A decade after the founding of the Society for Literature and Science and the appearance of such influential books as Kathleen Woodward's *Culture of Information* and William Paulson's *The Noise of Culture* Joseph Tabbi and Michael Wutz have edited a landmark volume to summarize this still emerging field Twelve original essays and the editors' introductory overview show how these theoretical concerns can contribute to the practical study of narrative *Reading Matters* covers the range of contemporary literature from the canonical novels of high modernism and postmodernism through subjects new to the academic agenda such as cyberpunk and hypertext fiction In an age that has proclaimed the death of the novel many times over the contributors argue persuasively for the continued vitality of literary narrative By responding in ingenious ways to the capabilities of other media they assert the novel has enlarged and redefined its territory of representation and its range of techniques and play while maintaining its viability in the new media assemblage

Narrative Across Media Marie-Laure Ryan, 2004-01-01 Narratology has been conceived from its earliest days as a project that transcends disciplines and media The essays gathered here address the question of how narrative migrates mutates and creates meaning as it is expressed across various media Dividing the inquiry into five areas face to face narrative still pictures moving pictures music and digital media *Narrative across Media* investigates how the intrinsic properties of the supporting medium shape the form of narrative and affect the narrative experience Unlike other interdisciplinary approaches to narrative studies all of which have tended to concentrate on narrative across language supported fields this unique collection provides a much needed analysis of how narrative operates when expressed through visual gestural electronic and musical means In doing so the collection redefines the act of storytelling Although the fields of media and narrative studies have been invigorated by a variety of theoretical approaches this volume seeks to avoid a dominant theoretical bias by providing instead a collection of concrete studies that inspire a direct look at texts rather than relying on a particular theory of interpretation A contribution to both narrative and media studies *Narrative across Media* is the first attempt to bridge the two disciplines

Media Ecologies of Literature Susanne Beyerlipp, Ralf Haekel, Johannes Schlegel, 2022-11-03 This book explores the media ecologies of literature the ways in which a literary text is interwoven in its material technical performative praxeological affective and discursive network and which determine how it is experienced and interpreted Through novel approaches to the complex contingent and interdependent environments of literature this volume demonstrates how questions about the mediality of literature particularly in the wake of digitization shed a new light on our understanding of textuality reading platforms and reception processes By drawing on recent developments in advanced media theory *Media Ecologies of Literature* emphasizes the productivity of innovative reconceptualizations of literature as a medium in its own right In an intentionally wide historical scope the essays engage with

literary texts from the Romantic to the contemporary period from Charlotte Smith and Oscar Wilde to A L Kennedy and Mark Z Danielewski from the traditionally printed novel to audiobooks and reading apps The Bloomsbury Handbook of Electronic Literature Joseph Tabbi, 2017-11-30 Winner of the 2017 N Katherine Hayles Award for Criticism of Electronic Literature A CHOICE Outstanding Academic Title 2018 The digital age has had a profound impact on literary culture with new technologies opening up opportunities for new forms of literary art from hyperfiction to multi media poetry and narrative driven games Bringing together leading scholars and artists from across the world The Bloomsbury Handbook of Electronic Literature is the first authoritative reference handbook to the field Crossing disciplinary boundaries this book explores the foundational theories of the field contemporary artistic practices debates and controversies surrounding such key concepts as canonicity world systems narrative and the digital humanities and historical developments and new media contexts of contemporary electronic literature Including guides to major publications in the field The Bloomsbury Handbook of Electronic Literature is an essential resource for scholars of contemporary culture in the digital era

The Poetics of Genre in the Contemporary Novel Tim Lanzendörfer, 2015-11-19 The Poetics of Genre in the Contemporary Novel investigates the role of genre in the contemporary novel taking its departure from the observation that numerous contemporary novelists make use of popular genre influences in what are still widely considered to be literary novels it sketches the uses of the work and the value of genre It suggests the value of a critical look at texts genre use for an

analysis of the contemporary moment From this it develops a broader perspective suggesting the value of genre criticism and taking into view traditional genres such as the bildungsroman and the metafictional novel as well as the kinds of amalgamated forms which have recently come to prominence In essays discussing a wide range of authors from Steven Hall to Bret Easton Ellis to Colson Whitehead the contributors to the volume develop their own readings of genre s work and valence in the contemporary novel

Cognitive Fictions Joseph Tabbi, 2002 Bringing together cognitive science and literary analysis to map a new media ecology Cognitive Fictions limns an evolutionary process in which literature must find its place in an artificial environment partly produced and thoroughly mediated by technological means Joseph Tabbi provides a penetrating account of a developing consciousness emerging from the struggle between print and electronic systems of communication Central to Tabbi s work is the relation between the arrangement of communicating modules that cognitive science uses to describe the human mind and the arrangement of visual verbal and aural media in our technological culture He looks at particular literary works by Thomas Pynchon Richard Powers David Markson Lynne Tillman Paul Auster and others as both inscriptions of

thought consistent with distributed cognitive models and as self creations out of the media environment The first close reading of contemporary American writing in the light of systems theory and cognitive science Cognitive Fictions makes needed sense of how the moment by moment operations of human thought find narrative form in a world increasingly defined by competing and often incompatible representations Book jacket **Thomas Pynchon in Context** Inger H.

Subjects of Substance Julian Henneberg,2020-07-02 Recent U S literature has both been informed by and critically engaged with materialist conceptions of selfhood Over the past decades disciplines like neuroscience and evolutionary biology have increasingly recast the human self as a malleable construct produced by physiological processes In a parallel development literary authors have created their own conceptions of somatic subjectivity in conjunction or contrast with scientific and medical discourses Subjects of Substance examines the forms functions and effects of materialist models of mind in selected memoirs and novels Authors discussed include Michael W Clune Don DeLillo Kay Redfield Jamison Siri Hustvedt Richard Powers Elyn R Saks and David Foster Wallace **Beyond the Screen** Jörgen Schäfer,Peter

Gendolla,2015-07-15 While literature in computer based and networked media has so far been experienced by looking at the computer screen and by using keyboard and mouse nowadays human machine interactions are organized by considerably more complex interfaces Consequently this book focuses on literary processes in interactive installations locative narratives and immersive environments in which active engagement and bodily interaction is required from the reader to perceive the literary text The contributions from internationally renowned scholars analyze how literary structures interfaces and genres change and how transitory aesthetic experiences can be documented archived and edited **Latin American Literature**

and Mass Media Edmundo Paz Soldán,Debra A. Castillo,2001 This volume examines Latin American literature in the context of a complimentary audiovisual culture dominated by mass media such as photography film and the Internet The articles gathered here all of them published for the first time critically assess Latin American media theories Garcia Canclini et al pointing out their strengths and shortcomings show how literary works have been able to sustain their visibility in a highly competitive media ecology accommodating to pop and mass culture while at the same time reaffirming the authority of the

literary intellectual Overall the book's foregrounding of the impact of mass media on Latin American literature opens the critical debate on an increasingly essential subject

Faulkner's Media Romance Julian Murphet, 2017-07-13 This book treats William Faulkner's major fiction from *Flags in the Dust* through to *Absalom Absalom* to a searching reappraisal under the spotlight of a media historical inquiry It proposes that Faulkner's inveterate attraction to the paradigms of romance was disciplined and masked by the recurrent use of metaphorical figures borrowed from the new media ecology Faulkner dressed up his romance materials in the technological garb of radio gramophony photography and cinema along with the transportational networks of road and air that were being installed in the 1920s His modernism emerges from a fraught but productive interplay between his anachronistic predilection for chivalric chich's and his extraordinarily knowledgeable interest in the most up to date media institutions and forms Rather than see Faulkner as a divided author who worked for money in the magazines and studios while producing his serious fiction in despite of their symbolic economies this study demonstrates how profoundly his mature art was shot through with the figures and dynamics of the materials he publicly repudiated The result is a richer and more nuanced understanding of the dialectics of his art

In Ballast to the White Sea Malcolm Lowry, 2014-10-16 *In Ballast to the White Sea* is Malcolm Lowry's most ambitious work of the mid 1930s Inspired by his life experience the novel recounts the story of a Cambridge undergraduate who aspires to be a writer but has come to believe that both his book and in a sense his life have already been written After a fire broke out in Lowry's squatter's shack all that remained of *In Ballast to the White Sea* were a few sheets of paper Only decades after Lowry's death did it become known that his first wife Jan Gabriel still had a typescript This scholarly edition presents for the first time the once lost novel Patrick McCarthy's critical introduction offers insight into Lowry's sense of himself while Chris Ackerley's extensive annotations provide important information about Lowry's life and art in an edition that will captivate readers and scholars alike

Dismantlings Matt Tierney, 2019-12-15 For the master's tools the poet Audre Lorde wrote will never dismantle the master's house *Dismantlings* is a study of literary political and philosophical critiques of the utopian claims about technology in the Long Seventies the decade and a half before 1980 Following Alice Hilton's 1963 admonition that the coming years would bring humanity to a crossroads machines for HUMAN BEINGS or human beings for THE MACHINE Matt Tierney explores wide ranging ideas from science fiction avant garde literatures feminist and anti racist activism and indigenous eco philosophy that may yet challenge machines of war control and oppression *Dismantlings* opposes the language of technological idealism with radical thought of the Long Seventies from Lorde and Hilton to Samuel R Delany and Ursula K Le Guin to Huey P Newton John Mohawk and many others This counter lexicon retrieves seven terms for the contemporary critique of technology Luddism a verbal and material combat against exploitative machines communion a kind of togetherness that stands apart from communication networks cyberculture a

historical conjunction of automation with racist and militarist machines distortion a transformative mode of reading and writing revolutionary suicide a willful submission to the risk of political engagement liberation technology a synthesis of appropriate technology and liberation theology and thanatopography a mapping of planetary technological ethics after Auschwitz and Hiroshima Dismantlings restores revolutionary language of the radical Long Seventies for reuse in the digital present against emergent technologies of exploitation subjugation and death **Paper Empire** Joseph Tabbi, Rone Shavers, 2007 Celebrates and illuminates the legacy of one of America's most innovative and consequential 20th century novelists In 2002 following the posthumous publication of William Gaddis's collected nonfiction and his final novel and Jonathan Franzen's lengthy attack on him in The New Yorker a number of partisan articles appeared in support of Gaddis's legacy In a review in The London Review of Books critic Hal Foster suggested a reason for disparate responses to Gaddis's reputation Gaddis's unique hybridity his ability to write in the gap between two dispensations between science and literature theory and narrative and different orders of linguistic imagination Gaddis 1922-1998 is often cited as the link between literary modernism and postmodernism in the United States His novels The Recognitions JR Carpenter's Gothic and A Frolic of His Own are notable in the ways that they often restrict themselves to the language and communication systems of the worlds he portrays Issues of corporate finance the American legal system economics simulation and authenticity bureaucracy transportation and mass communication permeate his narratives in subject setting and method The essays address subjects as diverse as cybernetics theory the law media theory race and class music and the perils and benefits of globalization The collection also contains a memoir by Gaddis's son an unpublished interview with Gaddis from just after the publication of JR and an essay on the Gaddis archive newly opened at Washington University in St Louis The editors acknowledge that we live in an age of heightened global awareness But as these essays testify few American writers have illuminated as poignantly or incisively just how much the systemic forces of capitalism and mass communication have impacted individual lives and identity imparting global dimensions to private pursuits and desires than William Gaddis
