David Gold, Catherine L. Hobbs, 2013-05-02 Historians of rhetoric have long worked to recover women's education in reading and writing but have only recently begun to explore women's speaking practices from the parlor to the platform to the varied types of institutions where women learned elocutionary and oratorical skills in preparation for professional and public life This book fills an important gap in the history of rhetoric and suggests new paths for the way histories may be told in the future tracing the shifting arc of women's oratorical training as it develops from forms of eighteenth century rhetoric into institutional and extrainstitutional settings at the end of the nineteenth century and diverges into several distinct streams of community embodied theory and practice in the twentieth Treating key rhetors genres settings and movements from the early republic to the present these essays collectively challenge and complicate many previous claims made about the stability and development of gendered public and private spheres the decline of oratorical culture and the limits of women's oratorical forms such as elocution and parlor rhetorics and women's responses to rhetorical constraints on their public speaking Enriching our understanding of women's oratorical education and practice this cutting edge work makes an important contribution to scholarship in rhetoric and communication **Learning Directory**, 1972 **Encyclopedia of Rhetoric and Composition** Theresa Enos, 2013-10-08 First Published in 1996 Routledge is an imprint of Taylor Francis an informa company *Contrastive Rhetoric Revisited and Redefined* Clayann Gilliam Panetta, 2000-11-01 The theory of contrastive rhetoric was first put forth by Robert Kaplan in the mid 1960s to explain the differences in writing and discourse between students who were native speakers of English and their international counterparts Over the past three decades contrastive rhetoric theory has been used primarily by linguists in language centers and involved in ESL teaching As the number of international students in American universities has continued to grow contrastive rhetoric has become increasingly relevant to all disciplines and to rhetoric and composition in particular This volume breaks important new ground in its examination of contrastive rhetoric in the exclusive context of composition The editor has assembled contributors with varying areas of specialty to demonstrate how the traditional definition of contrastive rhetoric theory can be applied to composition in new and innovative ways and how it can be redefined through the lens of addressing difference issues in writing Thus the volume as a whole clarifies how the basic principles of contrastive rhetoric theory can help composition instructors to understand writing and rhetorical decisions With the inclusion of current research on multicultural issues this collection is appropriate for all instructors in ESL writing including teachers in rhetoric composition and linguistics It can also be used as an advanced text for students in these areas Wherever it is employed it is certain to offer significant new insights into the application of contrastive rhetoric within the composition discipline **Journal of**
