**Readings in Marxist Sociology** T. B. Bottomore, Patrick Goode, 1983      **Marxism Versus Sociology** Martin Shaw, 1974 This is a partisan guide to reading It is intended to aid sociology students to work towards and within the tradition of marxism      *Marx's Scientific Dialectics* Paul Paolucci, 2007 This book examines both problems in traditional readings of Marx's texts and how he used several methods of science to inform his dialectical thinking historical materialist research political economic analyses and his communist project A case is made for Marx's continuing methodological relevance      *Marx and Modernity* Robert Antonio, 2002-08-30 In this illuminating and concise collection of readings Karl Marx emerges as the first theorist to give a comprehensive social view of the birth and development of capitalist modernity that began with the Second Industrial Revolution and still exists today      **Readings from Emile Durkheim** Prof Kenneth Thompson, 2012-10-12 Emile Durkheim is regarded as a founding father of sociology and is studied in all basic sociology courses This handy textbook is a key collection of translations from Durkheim's major works      Karl Kautsky and the Social Science of Classical Marxism Kautsky, 2022-05-16      **Crime And Capitalism** David Greenberg, 2010-06-10 Classic and contemporary viewpoints on crime      **Pt. Deendayal Upadhyay Ideology & Preception - Part - 1** D B Tengadi , *Classes* Paul Kamolnick, 1988 In *Classes* A Marxist Critique Paul Kamolnick has produced what may prove to be the most fundamental critique of Erik Olin Wright's class structure analysis to date The recent publication of Wright's *Classes* has raised a number of central questions regarding his continuing project on the class structures of advanced capitalist societies Has Wright now totally abandoned Marxism in favor of orthodox neo classical economics social psychology and Weberian stratification theory How does Wright's latest argument relate to his earlier work especially his critique of Paulantzas What is the meaning of Wright's dependence on Jon Elster John Roemer and the rational actor subject grounded in the doctrine self proclaimed methodological individualism Following an extended critical Preface Kamolnick first situates Wright within the social formation of a sociological and Althusserian Marxism while arguing the basic continuity between Wright's earlier and later work on class Though Marxism must itself always remain a social formation Kamolnick argues that Wright rejects Marxism in favor of bourgeois academic sociology In chapters two and three kamolnick reveals how Wright's new theory of class consciousness is incapable of producing a knowledge of class structure and how Wright is led to rely ultimately on non Marxist bourgeois practices of science and knowledge production in order to overcome this *Classes* A Marxist Critique ends by considering the implications for Wright's new transnational data set of his failure to ground a knowledge of class structure and finally by arguing for the new directions Marxist class analysis should take in the 1980s and beyond The thrust of Kamolnick's argument is the challenge for Marxists to revolutionize present sociologized practices of the labor process objectivity knowledge production and Marxism itself Class analysis must completely break with abstract sociologism and ground itself thoroughly within the concrete process of self object      **Marx, Engels and Liberal Democracy** Michael

Levin,1989-02-09 A study investigating how the founders of Marxism came to terms with the emergence of liberal democracy as a political system It examines in language without jargon how they defined democracy and how they evaluated the liberal constitutional state by placing their ideas in historical context      **SAGE Readings for Social Problems** Benjamin Drury,2021-02-23 SAGE Readings for Social Problems is a convenient and economical option for instructors who want to introduce students to scholarly literature in their social problems courses It contains 16 short readings on topics covered in typical courses including economic inequality race gender crime substance abuse education health medicine the environment family and the social construction of social problems The articles in this collection were all chosen because they are accessible to undergraduate avoid complicated statistical analysis and demonstrate the range of methodological approaches to studying social problems      Revolutionary Studies Paul Le Blanc,2018-01-12 With characteristic clarity and insight historian and activist Paul Le Blanc offers a sweeping survey of the key contributions of Marxist theory exploring its relevance to twentieth century revolutionary movements and figures Paul Le Blanc Has written on and participated in the US labor radical and civil rights movements and is author of numerous books      **Social Movements** Stanford M. on extensive familiarity with the relevant literatures however it also provides a full appreciation of the significance of this case by placing it within both the history and current framework of employee organisation and industrial relations in Greece and the development of Greece as a peripheral capitalist society in a global economy By exploring the issue of employee participation in this way Dr Psimmenos not only makes a unique original contribution to the study of industrial organisation and management worker relations in Europe but also shows the impact which the institutions and processes of globalisation have upon a society and economy like Greece part of the European Union and also subject to the constraints of international capitalism Globalisation and Employee Participation will be welcomed by academics and researchers in sociology politics industrial relations and political economy as well as those concerned with the history and present state of Greece and other Mediterranean societies It is a valuable scholarly addition to the literature in these areas

Radical and Marxist Theories of Crime Paul B. Stretesky, 2017-03-02 The essays selected for this volume show how radical and Marxist criminology has established itself as an influential critique since it emerged in the late 1960s Unlike orthodox criminology which emphasizes individual level explanations of criminal behavior radical and Marxist criminology emphasizes power inequality and structures especially those related to class as key factors in crime law and justice This collection of essays draws attention to the way in which structural forces shape and influence both individual and institutional for example governmental behavior highlights neglected crime corporate governmental state corporate and environmental which causes more extensive damage than the street crimes examined by orthodox criminology and discusses the ways in which law and criminal justice processes reinforce power structures and contribute to class control

**Theories of Modern Capitalism (Routledge Revivals)** Tom Bottomore, 2010-01-22 First published in 1985 Theories of Modern Capitalism provides a succinct study of Marxist and non Marxist theories of Capitalism its recent development and the prospects of a transition to socialism The study begins with a critical examination and comparison of four major theories of capitalism in the works of Marx Weber Schumpeter and Hayek This is followed by an analysis of the most recent phase of capitalism which has been conceptualised by Marxists thinkers in various ways as organised capitalism state monopoly or late capitalism Finally Bottomore considers the question of a transition to socialism in the diverse interpretations which have been offered by Marxists on one side and by Weber Schumpeter and Hayek on the other Theories of Modern Capitalism will be valuable in a wide range of courses in social and political theory and will also have an appeal to a broader readership concerned with issues of social and economic policy

*Marxism and the Proletariat* Stephen Perkins, 1993 In an unusual approach to Marxist studies Perkins uses the category of the proletariat as the key to which to demarcate different schools of thought within Marxism and consequently to assess their degree of fidelity to Marx's own thought He examines the contribution to this perspective made by Lukacs and demonstrates how Lukacs is able to account for the apparent failure of Marxism in the political conditions of advanced capitalism

**Marx and the Politics of Abstraction** Paul Paolucci, 2011-03-05 Many scholars see science and politics as mutually exclusive

realms where the latter's influence contaminates former's purity Karl Marx's critics often interpret him within this framework where his value laden judgments render his analysis of capitalism moot Though defenders argue that Marx rejects an objective/subjective dichotomy this book offers a different interpretation Through the method of critique Marx examines problems and biases in putatively neutral forms of scientific knowledge specifically models that fail to capture the relations of power and knowledge dominant in capitalist society By incorporating these relations into his abstractions and tracing their historical movement Marx's corrective to malformed approaches to scientific knowledge more readily lays bare capitalist society's exploitative and distortive nature This book demonstrates these principles and applies them to conventional sociological methods theories of religion and class analysis
