Self-authorship Marcia B. Baxter Magolda,1999 This book is intended to help college faculty create conditions in which students learn to construct knowledge in their disciplines and achieve self authorship A significant and often overlooked dimension mediating learning and self authorship centers on learners ways of knowing or their assumptions about the nature limits and certainty of knowledge A learner who assumes that all knowledge is certain expects to hear answers from an authority figure in contrast a learner who views knowledge as relative expects to explore multiple viewpoints By taking a constructive developmental approach the author demonstrates how students ability to construct knowledge is intertwined

with the development of their assumptions about knowledge itself and their role in creating it She shows how the structure of constructive developmental teaching hinges on three principles validating students ability to know situating learning in students experience and defining learning as teachers and students mutually constructing meaning The book also takes abstract pedagogical principles and translates them into practical approaches Supporting English Learners in the Classroom Eric M. Haas,Julie Esparza Brown,2019-05-03 This resource offers educators evidence based best practices to help them address the individual needs of English learners with academic challenges and those who have been referred for special education services The authors include guidance and specific tools to help districts schools and classrooms use multi tiered systems of support MTSS and other interventions Struggling Readers Can Succeed Nina L. Nilsson,Sandra E. Gandy,2013-05-01 In spite of No Child Left Behind and the support provided by Response To Intervention significant numbers of students continue to struggle with literacy This text addresses learning related needs of individual students in addition to interventions for the challenges they face Struggling readers represent many different ethnicities socio economic levels languages and dialects in any combination and possess an even wider variety of social cultural motivational literacy and real world experiences Through the presentation of case studies this book considers these factors and their influence on literacy development and suggests ways to adapt research based instructional strategies and approaches as well as classroom practices to address them It also includes related recommended resources The text appeals to the concerns of classroom teachers reading specialists and faculty in teacher education programs as well as anyone looking for practical research based ways to further the literacy development of individuals who struggle to read *Academic Constraints in Rhetorical Criticism of the New Testament* J. David Hester Amador,J. David Hester,1999-01-01 Rhetorical criticism promised to bring New Testament studies into a new era that approached the Bible as a document of persuasive discourse Major proponents of this approach suggested that its potential lies in its democratization of biblical interpretation To date that promise has never been fulfilled The reasons can be found by exploring the rhetoric of these rhetorical critics Such an exploration uncovers systems of disciplinary constraints and discursive habits that keep rhetoric firmly within traditional units of academic biblical interpretation The promise of rhetoric can only be fulfilled by shattering all notions of a rhetorical programme of biblical interpretation *Handbook of Learning Disabilities, Second Edition* H. Lee Swanson,Karen R. Harris,Steve Graham,2014-08-13 This comprehensive handbook reviews the major theoretical methodological and instructional advances that have occurred in the field of learning disabilities With contributions from leading researchers the volume synthesizes a vast body of knowledge on the nature of learning disabilities their relationship to basic psychological and brain processes and how students with these difficulties can best be identified and treated Findings are reviewed on ways to support student performance in specific skill areas m including language arts math science and social studies m as well as general principles of effective instruction that cut across academic domains Authoritative and up to date the book

also examines the concepts and methods that guide learning disability research and identifies promising directions for future investigation *Minding the Marginalized Students Through Inclusion, Justice, and Hope* Jose W. Lallas, Heidi Luv Strikwerda, 2021-07-26 While the issue of advancing equity occupies the pages of many education journals across the world and pursuing it in schools and classrooms is a common instructional goal there is an obvious absence of established school policies combined with pedagogies on how to achieve educational equity
