Annual Catalogue Nebraska Wesleyan University, 1902. **The Disappearance of the Social in American Social Psychology** John D. Greenwood, 2003-11-24. *The Disappearance of the Social in American Social Psychology* is a critical conceptual history of American social psychology. In this challenging work, John Greenwood demarcates the original conception of the social dimensions of cognition, emotion, and behaviour, and of the discipline of social psychology itself that was embraced by early twentieth-century American social psychologists. He documents how this fertile conception of social psychological phenomena came to be progressively neglected as the century developed to the point that scarcely any trace of the original conception of the social remains in contemporary American social psychology. In a penetrating analysis, Greenwood suggests a number of subtle historical

reasons why the original conception of the social came to be abandoned stressing that none of these were particularly good reasons for the neglect of the original conception of the social By demonstrating the historical contingency of this neglect Greenwood indicates that what has been lost may once again be regained *The Social Influence Processes* James T. Tedeschi, 2017-07-12 Social psychologists have always been concerned with two person interactions and the factors enabling one person to gain dominance Although social psychology has devised a revolutionary set of techniques to investigate the phenomenon of power hypotheses are too often ambiguously stated research programs end in cul de sacs and experiments take on the character of one shot studies In an attempt to stimulate new directions in research and to provide cumulative emphasis on the development of scientific theory in the area of power relations Tedeschi has assembled original and path breaking essays from a dozen outstanding scholars and researchers in the behavioral sciences More tightly integrated than leading books in the field of power relations *The Social Influence Processes* focuses on two person interactions A full explanation of the terms power and influence is followed by an analysis of the major variables in connections between two persons that must be taken into account in a scientific theory of social influence The subsequent chapters respond to the categories established attempting a comprehensive construction of social reality and offering suggestions and techniques for measuring and ordering its complexity Particular areas of research and theory are isolated for consideration in depth such topics as personality as a power construct Power and Personality by Henry L Minton influence in exchange theory The Tactical Use of Social Power by Andrew Michener and Robert W Suchner and leadership through charisma Interpersonal Attraction and Social Influence by Elaine Walster and Darcy Abrahams In the final chapter Tedeschi Thomas Bonoma and Barry R Schlenker attempt to provide a general theory of social influence processes as they affect the target individual by reviewing the research literature in their own theoretical terms This remarkable volume will be of interest to students as well
