De Gruyter Handbook of Entrepreneurial Finance David Lingelbach, 2022-05-09 As of early 2022 seven of the ten largest firms in the world by market capitalization had been funded through various types of entrepreneurial finance This handbook provides an up to date survey of what we know about this significant phenomenon in all its forms and where our knowledge about it needs to head from here The handbook embraces a wide range of established and emerging academic and practitioner voices across the globe to explore the theoretical and practical flux and tension in the field Until recently most studies have taken a supply side perspective focusing on the perspective of those who provide funding to new ventures This book takes a different demand side perspective beginning with the entrepreneur and gradually broadening our view to include close by and then more distant funding sources Following this approach it is organized into four parts detailing the individual level founders resources bricolage and bootstrapping effectuation and portfolio entrepreneurship the inner circle informal financing business groups incubators and accelerators the wider world formal debt microfinance venture capital corporate venture capital business angels government funding and family offices and emerging perspectives non Western perspectives gender indigenous perspectives post conflict and disaster zones and ethics The introduction considers the general state of the field while the conclusion takes on additional topics relevant to entrepreneurial finance such as decentralized finance big data behavioral economics financial innovation and COVID 19 as well as possible ways in which entrepreneurial finance can have a greater impact on other disciplines This handbook will be a core reference work for researchers practitioners and policy makers seeking an up to date academic survey of

entrepreneurial finance It can also be used as a primary text in Ph D seminars in entrepreneurship entrepreneurial finance and finance Instructors in Master s level courses in entrepreneurial finance and venture capital will also find the book of benefit

**Higher Education in the United States** James J. F. Forest, Kevin Kinser, 2002-06-21 Surveys the changing landscape of American higher education from academic freedom to virtual universities from campus crime to Pell Grants from the Student Privacy Act to student diversity In the years following World War II college and university enrollment doubled students revolted faculty unionized and community colleges evolved Tuition and technology soared as did the number of first generation minority and women students These changes radically transformed the American system of postsecondary education Today that system is in trouble Its aging professoriate prepares for retirement but low academic salaries can no longer attract the best minds to replace them A flood of corporate dollars funds commercial research but money for basic research the seedbed of American scientific preeminence has dried up Colleges and universities also face heated competition with for profit education providers for students faculty and external financial support along with the costs of providing remedial education to growing numbers of students who are unprepared for postsecondary education Higher Education in the United States provides a comprehensive analysis of these issues and others that scholars and practitioners of higher education study discuss and grapple with on a daily basis

**Participation Programs in Work Organizations** Aviad Bar-Haim, 2002-05-30 Employee participation programs have many faces many definitions many forms and they change all the time For some people they are meant to solve every problem in the workplace For others they are ways to reduce resistance to management and its efforts to bring about organizational change Still others see them as totally redundant and a hindrance to efficiency and the implementation of good management practices To make sense of it all Bar Haim integrates historically thematically analytically the wide but often incoherent knowledge we have about these programs and in doing so portrays them in a clear useful multidimensional manner The result is a work of scholarship and practical guidance that students scholars researchers and executives will find important an action oriented source of vital information Bar Haim shows that participation programs in work organizations have always attempted to solve three basic human problems problems stemming from industrial democracy and equality work alienation and occupational and managerial effectiveness To do this he uses a rare multidimensional technique He describes and analyzes the processes and behavior of participation participants and organizational forms using a variety of conceptual and theoretical frames drawn from the social and management sciences He enhances our understanding of participation programs on micro and macro levels and then provides practical guidelines from the real world experience of other scholars and executives Among the several ironies he discovers are that the roles of enthusiasts opponents and skeptics changed during the course of a jubilee of these programs By integrating a large body of research and suggesting a formal model to evaluate existing employee programs and projected ones his book attempts to ease the enigmatic ambivalence we have toward worker participation in general In fact he shows

that by better understanding the dynamics of participation programs it is possible for those who desire such programs to create construct and maintain better ones *ECMLG 2016 - Proceedings of the 12th European Conference on Management, Leadership and Governance* , Proceedings of the 12th European Conference on Management Leadership and Governance
