Handbook of Reading Research, Volume IV Michael L. Kamil, P. David Pearson, Elizabeth Birr Moje, Peter Afflerbach, 2011-03-17 The Handbook of Reading Research is the research Handbook for the field Each volume has come to define the field for the period of time it covers Volume IV follows in this tradition. The editors extensively reviewed the reading research literature since the publication of Volume III in 2000 as portrayed in a wide array of research and practitioner based journals and books to identify the themes and topics covered As in previous volumes the focus is on reading research rather than a range of literate practices When taken as a set the four volumes provide a definitive history of reading research Volume IV brings the field authoritatively and comprehensively up to date Children's Competencies **Development in the Home Learning Environment** Frank Niklas, Caroline Cohrssen, Simone Lehrl, Amy R. Napoli,2021-08-02 Reading Fluency Asaid Khateb, Irit Bar-Kochva, 2016-05-11 The book is dedicated to the blessed memory of Prof Zvia Breznitz whose groundbreaking research has made a tremendous impact on the understanding of fluency in reading The book presents a multidimensional perspective of recent research and reviews on fluency in reading The first part presents recent brain imaging findings from studies into the neurobiological basis of reading as well as cognitive and language studies exploring the underlying factors of fluency in reading and its development. The second part comprises reviews of intervention studies that address reading ability and in particular fluency in reading The book provides a unique multilingual perspective on reading research by including studies of readers of different orthographies and speakers of different languages Both scientists exploring the different aspects of reading and language and clinicians of reading intervention will find this book not only of great interest but extremely useful in its clear and in depth presentation of current reading research Quadrilingual Education in Singapore Rita Elaine Silver, Wendy D. Bokhorst-Heng, 2016-01-21 This book explores Singapore s language education system Unlike previous volumes which discuss the bilingual requirement for learning it focuses on Singapore's quadrilingual system bringing together articles on each of the four languages English Mandarin Malay and Tamil as well as articles that examine more than one language It highlights past successes current concerns and future directions for language education The book focuses on classroom pedagogy in all four official languages showcasing how languages are taught and learned in Singapore as a basis for better understanding the system from the inside out The authors present empirical classroom based studies on language pedagogy in all four languages as well as updated information on the current socio political context and how it has influenced attempts at pedagogical innovation Consideration is given to the dialectical relationship between policy and practice. The chapters also include discussions of preschool age learning influences of language policy home literacy practices and commentaries by international language in education scholars This approach also provides a basis for international comparison especially for those who are interested in fostering English proficiency while maintaining one or more national languages The volume is particularly important in light
