## **Riding The Tiger The Politics Of Economic Reform In Post Mao China:**

**Riding the Tiger** Gordon White,1993 Analyzes the political origins and impact of the post Mao programme of market orientated reform in China focusing on key areas of policy institutions and social dynamics White argues that the Deng reforms have radically changed the nature of Chinese society and is leading to political pluralism *Mao's China And Post-mao China: Revolution, Recovery And Rejuvenation* Robert Weatherley,2022-09-06 If the history of modern China was written as a book its author would be accused of losing touch with reality During the twentieth century China underwent two revolutions a number of wars endured a radical and destabilising form of communism and then hurried quickly towards a system of open market economics whilst remaining under the control of a nominally communist party Currently the fastest growing economy in the world with an increasingly sophisticated and expanding military China is widely expected to emerge as the world s next superpower eclipsing the United States in the not too distant future However not everything is going smoothly for Beijing Unemployment rates are spiralling inequality is rife and official corruption at all levels remains an Achilles heel for the Chinese Communist Party despite Xi Jinping s best endeavours to wipe it out Worst of all environmental degradation is at such a serious level that it threatens the success of the Chinese economy and the stability of Chinese society Against this scarcely believable backdrop and based on a series of lectures seminars and research conducted by the author Mao s China and Post Mao China captures the dynamics dynamism and disasters of Chinese politics since the establishment of the People s Republic of China in 1949 This advanced textbook identifies three key themes that have underpinned the post revolutionary era the so called three Rs Revolution Recovery and Rejuvenation and is essential reading for anyone interested in the politics of modern China at the undergraduate and postgraduate level *The Politics of China's Accession to the World Trade Organization* Hui Feng,2006-01-16 Grounded on a series of first hand interviews with Chinese government officials this book examines China s accession to the World Trade Organization providing an inside look at Chinese WTO accession negotiations Presenting a systematic political economy model in analyzing Beijing s decision making mechanisms the book argues that China s WTO policy making is a state led leadership driven and top down process Feng explores how China s determined political elite partly bypassed and partly restructured a largely reluctant and resistant bureaucracy under constant pressure from an increasingly globalized international system By addressing China s accession to the WTO from a political analysis perspective the book provides a theoretically informed and intriguing examination of China s foreign economic policy making regime The book highlights contemporary debates relating to state and institutionalist theory and provides new and useful insights into a significant development of this century *Endogenous Origins of Economic Reforms in India and Chin* Rajiv G. Maluste,2011-07 Attitudinal change in the context of economic reforms has been referred to in Rodrik and Subramanian 2005 DeLong 2003 Kohli 1989 and Panagariya 2004 2008 This dissertation provides empirical support for this literature establishing an earlier start for India s economic policy

liberalisation than presented in stylized accounts. It demonstrates the endogenous nature of the origins of these policy shifts. Attitudinal change literature had directed attention to the need for further research into India's policy changes of the early 1980s and for studying broader comparability issues in other developing countries. This research makes a contribution towards filling these gaps. This dissertation shows that India started its economic liberalisation under the Indira Gandhi administration from 1980 to 1984. These findings depart from the conventional view that India's economic policy changes were initiated by the Narasimha Rao government in 1991 or by the Rajiv Gandhi administration in the mid to late 1980s. The dissertation establishes that policy shifts of the early 1980s had endogenous origins in the political leadership's attitudinal changes. The Indira Gandhi administration of the early 1980s revisited the statist policies of its previous tenure from 1966 to 1977. The new approach entailed more openness towards private enterprise, scaling back the role of the public sector and starting India's integration into the global economy. The dissertation also discusses the comparable role of attitudinal changes at the start of China's policy liberalisation led by Deng Xiaoping from 1978 to 1982. It focuses on the significance and challenges faced by China's political leadership in bringing about societal attitudinal change. The dissertation concludes by drawing comparisons between India and China, developing a linkage between their endogenous attitudinal changes and economic policy liberalisation.

**The Nature of Chinese Politics: From Mao to Jiang** Jonathan Unger, 2016-09-16. This book describes and analyzes how politics among the Chinese leadership has operated and evolved from the period of Mao's court up to the present day. Part I explores politics under Mao and Deng. For this section, the five leading western analysts of elite Chinese politics, Lowell Dittmer, Lucian Pye, Frederick Teiwes, Andrew Nathan, and Tsou Tang, have contributed major papers that measure the empirical evidence against political science theory, recent Chinese history, and Chinese political culture. Part II explores and analyzes the ongoing changes in Chinese politics during Jiang's tenure and includes analyses by almost all the leading English language scholars in the field.

Disenfranchised Joel Andreas, 2019. In the decades following World War II, factories in many countries not only provided secure employment and a range of economic entitlements but also recognized workers as legitimate stakeholders, enabling them to claim rights to participate in decision making and hold factory leaders accountable. In recent decades, as employment has become more precarious, these attributes of industrial citizenship have been eroded, and workers have increasingly been reduced to hired hands. As Joel Andreas shows in *Disenfranchised*, no country has experienced these changes as dramatically as China. Drawing on a decade of field research, including interviews with both factory workers and managers, Andreas traces the changing political status of workers inside Chinese factories from 1949 to the present, carefully analyzing how much power they have actually had to shape their working conditions.

Reed, Karen Turner-Gottschang, Anne F. Thurston, 1994-02-01. Being prepared in China says one researcher can mean the difference between a headache and a productive day. Acclaimed by readers, this friendly and practical volume, now updated with important new information, offers all the details academic visitors need to make long term stays in China productive, comfortable and fun. Academic opportunities have been revived in the years since the Tiananmen Square event and the book opens with an overview of what we have learned from our academic exchanges with China, the opportunities now available and resources for more information. To help visitors prepare for daily life, the book covers everything from how to obtain the correct travel documents to what kinds of snack foods are available in China, from securing accommodations to having the proper gift for your Chinese dinner host. Frank discussions on the research and academic environments in China will help students, investigators and teachers from their initial assignment to a danwei or work unit to leaving the country with research materials intact. The book offers practical guidelines on working with Chinese academic institutions and research assistants, arranging work related travel, managing working relationships, resolving language issues and perhaps most important, understanding Chinese attitudes and customs toward study, research and work life. New material in this edition includes an expanded section on science and social science field work with a discussion of computers, which ones work best in China, how to arrange to bring your computer in, where to find parts and supplies, how to obtain repairs and more. Living costs, health issues and addresses and fax numbers for important services are updated. Guidance is offered on currency, transportation, communications, bringing children into China and other issues. Based on the first hand reports of hundreds of academic visitors to China and original research by the authors, this book will be useful to anyone planning to live and work in China: students, researchers and teachers and their visiting family members as well as business professionals. models of democratization that dominate current Chinese intellectual trends Analyzing the political implications of these models the author considers how the theories may be put into practice in order to develop an appropriately Chinese conception of democracy     Contesting Citizenship in Urban China Dorothy J. **Comparative Politics** Jeffrey Kopstein, Mark Lichbach, Stephen E. Hanson, 2014-07-21 Twelve in depth case studies of the EU and countries across the globe written by the leading country specialists and combining insights of cutting edge institutional analysis and deep study of national histories explore how the concepts of interests identities and institutions shape the politics of nations and regions The country studies trace the global and historical contexts of political development and examine the diverse pathways that countries have taken in their quest to adapt to the competitive pressures of twenty first century globalization These country studies constitute the overarching framework of the text addressing the larger question why are countries ruled and governed so differently Free of heavy handed jargon Comparative Politics inspires thought provoking debate among introductory students and specialists alike and encourages students to engage in real comparative analysis In this new edition all twelve country studies have been rewritten and the first two theory chapters have been updated to reflect the latest research in the field     *Political Party Systems and Democratic Development in East and Southeast Asia* Wolfgang Sachsenröder, Ulrike E. Frings, 2018-08-16 First published in 1998 this is the second of two volumes which will be of great value to scholars and students of politics in East and Southeast Asia A rich readable reference tool they offer extensive surveys of the history structure culture legal context and financing as well as the progress travails and prospects of political parties and electoral systems in 13 countries The excellent introduction and the detailed country case studies demonstrate the wide range of political experiences in Asia Rather than affirm the thesis of a common set of Asian values hostile to democracy they show that in much of East and Southeast Asia people want the political choice and accountability that come from free and fair electoral competition with open effective political parties     *Area Bibliography of China* Richard T. Wang, 1997 A combination of scholarly commercial and popular interests has generated a large quantity of literature on every aspect of Chinese life during the past two decades This bibliography reflects these combined interests it is broken up into sections by subject headings and cross references refer the researcher to related topics
