Right Hand Of Sleep:

The Right Hand of Sleep John Wray, 2002-05-14 This extraordinary debut novel from Whiting Writers Award winner John Wray is a poetic portrait of a life redeemed at one of the darkest moments in world history Twenty years after deserting the army in the first world war Oskar Voxlauer returns to the village of his youth Haunted by his past he finds an uneasy peace in the mountains but it is 1938 and Oskar cannot escape from the rising tide of Nazi influence in town He attempts to retreat to the woods only to be drawn back by his own conscience and the chilling realization that the woman whose love might finally save him is bound to the local SS commander Morally complex brilliantly plotted and heartbreakingly realized The Right Hand of Sleep marks the beginning of an important literary career

Ultradian Rhythms in Life Processes David Lloyd, Ernest L. Rossi, 2012-12-06 Profound progress has been made in the fields of chronobiology and psychobiology within the past decade in theory experiment and clinical application This volume integrates these new developments on all levels from the molecular genetic and cellular to the psycho social processes of everyday life We present a balanced variety of research from workers around the globe who discuss the fundamental significance of their approach for a new understanding of the central role of ultradian rhythms in the self organizing and adaptive dynamics of all life processes The years since the publication of *Ultradian rhythms in physiology and behavior* by Schultz and Lavie in 1985 have seen a burgeoning realization of the ubiquity and importance of ultradian rhythms within and between every level of the psychobiological hierarchy The experimental evidence lies scattered through a disparate literature and this volume attempts albeit in a highly selective manner to bring together some of the different strands The editors are very conscious of the omission of many important current aspects e g we have not included any of the fascinating and indeed long and well established experiments with plants Bunning 1971 1977 Guillaume and
