The Future of Unions and Worker Representation

Anthony Forsyth, 2022-01-13 This book charts the path to revitalisation for trade unions in Australia the USA the UK and Italy It examines the examples of innovation and digital campaigning that are enabling unions to build new forms of worker power and overcome decades of declining membership wrought by neoliberalism globalisation and hostility from employers and the state The study evaluates the responses of unions in each country to falling membership levels since the 1980s It considers the US organising model and its adoption in Australia and the UK comparing this with the strategies of Italian unions which have been more deliberately focused on precarious and migrant workers The increasing reliance of US unions on community alliances as seen in the Fight for 15 and similar campaigns is scrutinised along with new union prototypes like Hospo Voice in Australia the Independent Workers Union of Great Britain and SI Cobas in Italy The book includes an in depth analysis of union responses to the gig economy in the four countries and the emergence of self organised worker collectives to combat this exploitative business model The vital role played by unions in defending the interests of workers during the COVID 19 pandemic is also examined As well as highlighting the most successful union initiatives to meet the challenges of the past 30 years the book assesses the strengths and deficiencies of the legal framework for union representation in the four nations It identifies the labour law reforms needed to rebuild collectivism but argues that more is needed than favourable laws This cross national study provides a rich basis for identifying the combination of reforms strategies and linkages required to ensure that unions can remain relevant for a new generation of digitally active workers

Us and Them? Bridget Anderson,2013-03-22 Us and Them explores the distinction between migrant and citizen through using the concept of the community of value The community of value is comprised of Good Citizens and is defined from outside by the Non Citizen and

from the inside by the Failed Citizen that is figures like the benefit scrounger the criminal the teenage mother etc While Failed Citizens and Non Citizens are often strongly differentiated the book argues that it is analytically and politically productive to consider them together Judgments about who counts as skilled what is a good marriage who is suitable for citizenship and what sort of enforcement is acceptable against illegals affect citizens as well as migrants Rather than simple competitors for the privileges of membership citizens and migrants define each other through sets of relations that shift and are not straightforward binaries The first two chapters on vagrancy and on Empire historicise migration management by linking it to attempts to control the mobility of the poor The following three chapters map and interrogate the concept of the national labour market and UK immigration and citizenship policies examining how they work within public debate to produce us and them Chapters 6 and 7 go on to discuss the challenges posed by enforcement and deportation and the attempt to make this compatible with liberalism through anti trafficking policies It ends with a case study of domestic labour as exemplifying the ways in which all the issues outlined above come together in the lives of migrants and their employers
