State Responsibility, Climate Change and Human Rights

under International Law Margaretha Wewerinke-Singh, 2019-03-21 The last decade has witnessed an increasing focus on the relationship between climate change and human rights Several international human rights bodies have expressed concern about the negative implications of climate change for the enjoyment of human rights and the Paris Agreement is the first multilateral climate agreement to refer explicitly to states human rights obligations in connection with climate change Yet despite this there are still significant gaps in our understanding of the role of international human rights law in enhancing accountability for climate action or inaction As the Paris Agreement has shifted the focus of the climate change regime towards voluntary action and the humanitarian impacts of climate change are increasingly being felt around the world accountability for climate change has become an increasingly salient issue This book offers a timely and comprehensive analysis of the legal issues related to accountability for the human rights impact of climate change drawing on the state responsibility regime It explains when and where state action relating to climate change may amount to a violation of human rights and evaluates various avenues of legal redress available to victims The overall analysis offers a perceptive insight into the potential of innovative rights based climate actions to shape climate and energy policies around the world

Corporate Obligations under International Law Markos Karavias, 2013-11-28 This book examines the extent to which international law places obligations directly on corporate entities It is often argued that corporations are bound by inter alia the same human rights and environmental obligations that states have This book examines the source of these supposed obligations in treaty law international custom and in internationalized contracts to determine whether they really can be transposed to corporations so easily The focus of the book is on the regulation by international law of private corporate conduct It examines whether corporate obligations namely obligations binding directly upon a corporation under positive international law have indeed emerged and if so whether corporations may be systemically included in the predominantly state centric framework of international law It investigates the challenges facing international law as a result of the potential emergence of corporate obligations and engages in a structural analysis of what corporate obligations under international human rights law might entail Ultimately it warns against conceptualizing corporations as both holders and potential violators of human rights explaining why they are not automatically bound by the same obligations that are imposed on states

international law which provides guidance on how due diligence obligations can be better conceptualized Drawing inspiration from these developments the book analyses how extraterritorial human rights due diligence obligations could operate in practice and foster global human rights protection

The EU's Human Rights Responsibility Gap Joyce De Coninck, 2024-11-14 Can the EU be held legally responsible for its contributions to human rights harms in its Integrated Border Management policy Or do systemic legal design flaws in the EU's human rights responsibility regime give rise to a significant responsibility gap This book delves into these pressing questions offering a transversal analysis of applicable legal frameworks under international and EU law Divided into three parts the book first analyses the international and EU human rights responsibility frameworks revealing both normative incongruency as well as liability incongruency Part two applies these frameworks to specific illustrations within the four tiers of the EU's Integrated Border Management exposing the critical points where responsibility falters Building on these findings and drawing from shared responsibility and relationality theories part three briefly introduces Relational Human Rights Responsibility as an alternative method to ascertaining human rights responsibility of the EU specifically and international organisations more generally

International Law Obligations on Climate Change Mitigation Benoit Mayer, 2022-07-11 Recent years have witnessed exciting developments in international negotiations litigation and scholarship about climate change but doctrinal research in the field remains in its infancy In particular little is known about how fast states are required to limit and reduce their greenhouse gas emissions The first part of the book identifies the relevant obligations through an analysis of treaties custom and other sources of international law Beyond express quantified commitments contained for instance in nationally determined contributions the book sheds light on the existence of general obligations of due diligence While these general obligations are difficult to interpret they are often more demanding The second part explores how these general obligations can be applied objectively for instance by a court in concrete cases Instead of an improbable judicial assessment of a state s requisite level of mitigation action the book shows the possibility of assessing a state s conduct based on the measures that general mitigation obligations entail These measures relate to corollary duties of cooperation vigilance and consistency This book presents a first comprehensive doctrinal study of states obligations on climate change mitigation It shows that such obligations arise not only from climate treaties but also from customary international law unilateral declarations and possibly human rights treaties It also explores the interactions between these multiple obligations

Public-Private Partnerships and Responsibility under International Law Lisa Clarke, 2014-03-21 Partnerships between the public and private sectors are an increasingly accepted method to deal with pressing global issues such as those relating to health Partnerships comprised of states and international organizations public sector and companies non governmental organizations research institutes and philanthropic foundations

private sector are forming to respond to pressing global health issues. These partnerships are managing activities that are normally regarded to be within the domain of states and international organizations such as providing access to preventative and treatment measures for certain diseases or improving health infrastructure within certain states to better manage the growing risk of disease. In the shadow of the success of these partnerships lies however the possibility of something going wrong and it is to this shadow that this book sheds light. This book explores the issue of responsibility under international law in the context of global health public private partnerships. The legal status of partnerships under international law is explored in order to determine whether or not partnerships have legal personality under international law resulting in them being subject to rules of responsibility under international law. The possibility of holding partnerships responsible in domestic legal systems and the immunity partnerships have from the jurisdiction of domestic courts in certain states is also considered. The obstacles to holding partnerships themselves responsible leads finally to an investigation into the possibility of holding states and or international organizations as partners and or hosts of partnerships responsible under international law in relation to the acts of partnerships. This book will be of interest to those researching and working in areas of global governance especially hybrid public private bodies the responsibility under international law of states and international organizations and also global health. It provides doctrinal clarification and practical guidance in a developing field of international law.

Obligations Erga Omnes and International Crimes André de Hoogh, 2023-12-18. This book provides a comprehensive analysis of the law of State responsibility. It addresses fundamental questions such as which subjects of international law are entitled to invoke the responsibility of the author state, the forms of reparation demands which may be made and the means and counter measures including the use and level of force which may be employed to enforce demands. Audience: Academics and researchers in international law. *State Responsibility in the International Legal Order* Katja Creutz, 2020-09-24. The book analyzes State responsibility in international law from a holistic and critical perspective. *Complicity and its Limits in the Law of International Responsibility* Vladyslav Lanovoy, 2016-09-22. This book examines the responsibility of States and international organizations for complicity aid or assistance in an internationally wrongful act. Despite the recognition of responsibility for complicity as a rule of customary international law by the International Court of Justice, this book argues that the effectiveness and utility of this form of responsibility is fraught with systemic and operational limits. These limits include a lack of clarity in its constituent elements, its co existence with primary rules prohibiting complicity and the obligations of due diligence, its implementation and the underlying causal tests, its uncertain relationship to other forms of shared and indirect responsibility and its potential as a form of attribution of conduct. This book submits that the content and elements of this form of responsibility need adjustments to respond more effectively to the phenomenon of complicity in international affairs. Awarded The Paul Guggenheim Prize in International Law 2017.
