Rise Of The Luftwaffe 1918 194:

The Rise of the Luftwaffe: Forging the Secret German Air Weapon, 1918-1940 Herbert Molloy Mason, 1973

The Rise of the Luftwaffe, 1918-1940 Herbert Molloy Mason, 1973 The Rise of the Luftwaffe, 1918-1940 Herbert Mason, 2016-11-08 The campaign in Poland proved the Luftwaffe to be the Wehrmacht's loudest trumpet. The rest of the world was stunned at the overrunning of sixty thousand miles of courageously defended terrain in only twenty six days. In the winter of 1918 Germany's conquerors set about rendering the Reich forever incapable of waging war. The existing German Air Service of nearly 15 000 planes was to be scrapped; the treaty of Versailles would ensure that no military aircraft would ever be flown in Germany again. But less than a generation later Europe shook before the threat of the Luftwaffe believed to be the most powerful air force in the world. The Rise of the Luftwaffe tells how it happened. Denied warplane factories and flying schools in their homeland the Germans built them in Russia and it was there that they trained an elite pilot corps. At home state sponsored gliding schemes gave a new generation of pilots their first taste of the air and clandestine factories ostensibly making perambulators or washing machines turned out warplanes. As confidence grew and the actual restrictions on German aviation eased so a new dimension was added to the bluff. Germany's re-occupation of the Rhineland was carried out under cover of planes lacking guns and ammunition; the Luftwaffe's apparent capability was exaggerated by the use of stripped down versions of fighters in speed record attempts. Now instead of concealing the existence of their air power from the rest of Europe the Germans were concealing its limitations. Herbert Molloy Mason charts every step of the subterfuge and ingenuity by which the transformation was brought about. He describes the pioneering of new developments such as the Stuka dive bomber and the proving of this secretly trained and created air force first in the Spanish Civil War and later against Poland and France. At the same time he explodes some of the myths of German technical and organizational superiority: meddling by Hitler, bickering between designers and bureaucrats and ineptitude by the morphine addicted Goering cost the Luftwaffe a war winning strategic bomber force and jet fighters even before World War II began. Praise for Herbert Molloy Mason. Worth taking seriously. Earl F Ziemke. Herbert Molloy Mason 1927 2013 was a noted writer of military history and wrote sixteen books including The Lafayette Escadrille and To Kill Hitler. He lived in San Antonio Texas with his wife who was an artist. Flak Edward B. Westermann, 2001. Air raid sirens wail, searchlight beams flash across the sky and the night is aflame with tracer fire and aerial explosions as Allied bombers and German anti aircraft units duel in the thundering darkness. Such cinematic scenes played out with increasing frequency as World War II ground to a close. Were more than mere stock material for movie melodramas. As Edward Westermann reveals they point to a key but largely unappreciated aspect of the German war effort that has yet to get its full due. Long the neglected stepchild in studies of World War II air campaigns German flak or anti aircraft units have been frequently dismissed by American, British and German historians and by veterans of the European air war as ineffective weapons that wasted valuable materiel and

personnel resources desperately needed elsewhere by the Third Reich Westermann emphatically disagrees with that view and makes a convincing case for the significant contributions made by the entire range of German anti aircraft defenses During the Allied air campaigns against the Third Reich well over a million tons of bombs were dropped upon the German homeland killing nearly 300 000 civilians wounding another 780 000 and destroying more than 3 500 000 industrial and residential structures Not surprisingly that aerial Armageddon has inspired countless studies of both the victorious Allied bombing offensive and the ultimately doomed Luftwaffe defense of its own skies By contrast flak units have virtually been ignored despite the fact that they employed more than a million men and women were responsible for more than half of all Allied aircraft losses forced Allied bombers to fly far above high accuracy altitudes and thus allowed Germany to hold out far longer than it might have otherwise Westermann's definitive study sheds new light on every facet of the development and organization of this vital defense arm including
