Rise Of Asia:

China's Rise in Asia Robert G. Sutter, 2005-04-14 China's rapid military and economic growth has fuelled a steady stream of analysis and debate about the PRC's motivations and objectives regarding the United States. Yet until now there has not been a sustained single authored assessment in English of China's expanding influence in Asia in the post Cold War period. Respected analyst Robert G. Sutter draws on his extensive experience in the region to explore the current debate on China's rise and its meaning for U.S. interests by examining in detail China's current and historical relations with the key countries of Asia. He finds a range of motivations underlying China's recent initiatives. Some incline Chinese policy to be cooperative with the United States, others to be competitive and confrontational. Sutter's nuanced study shows that U.S. power and influence continue to dominate Asia and play a critical role in determining China's cooperative or confrontational approach. He argues that the Bush administration's policies of firmness and cooperation have encouraged China to stay on a generally constructive track in the region.

The Rise of Asia Frank B. Tipton, 1998-05-29 The shifting balance of economic power away from Western Europe and the United States and towards East and Southeast Asia, firstly Japan then the small Tiger economies and now the larger nations of Southeast Asia and China, the potential Dragons, has provoked anger, dismay and a search for the secrets of growth and for lessons to be learned. *The Rise of Asia* brings together recent scholarship analysing the process of economic, social and political development in East and Southeast Asia from the mid nineteenth century to the present day.

The Rise and Decline of the Asian Century Christopher Lingle, 2019-03-25 First published in 1997, this volume reflects an attempt to put order in the place of what appears to be chaos amidst East Asia's rapid dash toward economic development. With experiences of Turkey during and after martial law, Italy during the Red Brigades, England during the Winter of Discontent, post-Franco Spain's stumbling embrace of democracy, Poland in the beginning of the solidarity movement, South Africa in the crumbling of apartheid, China during the early student protests and Europe when the Iron Curtain was lifted, Christopher Lingle applies these ideas to modern developments in East Asia, providing an intriguing counter-intuitive, refreshing take on its economies.

The Rise of China Jun Tsunekawa, 2009 **Rise of China** Hsin-Huang Michael Hsiao, Cheng-Yi Lin, 2009-01-21 This book examines every aspect of Beijing's strategies ranging from political, economic and social challenges to the Taiwan and Hong Kong issues to the implications of these strategies in terms of China's place within the Asia Pacific and indeed within the world system.

The Rise of Asia Prema-chandra Athukorala, 2010-07-12 *The Rise of Asia* examines emerging trends and patterns of foreign trade and investment in Asia with a view to contributing to the policy debate on how development strategies should be adopted in response to challenges to economic globalization. The existing body of knowledge in this subject area has predominantly been shaped by the experiences of the newly industrialized countries (NICs) in East Asia. This volume is inspired by the conviction that generalization from the NIC experience is hazardous because the on-going process of economic globalization over the past

two decades has dramatically transformed the international context of national development policy making Moreover as embracing market albeit at varying degree and rapidly has now become an Asia wide phenomenon it is vital to look at the issues from a broader relational perspective paying attention to opportunities for intra regional division of labour within the wider context of global economic integration This book will be of interest to students and scholars with an interest in Asian studies economics political economy and globalization *There Goes the Neighbourhood* Michael Wesley, 2011 For the first time in history Australia will be uncomfortably close to the designs and demarches of competing great powers In the years ahead we will no longer be too small to make a difference In his book Wesley points to the key economic and political issues that we need to be considering right now as a western country geographically and economically tied to Asia and urgently calls for a renewed public engagement and debate

The Rise of East Asia Mark T. Berger, Douglas A. Borer, 1997 There is great interest in the Pacific Century and what its implications for the future will be The rapid economic growth of East Asia was already setting the region apart from the rest of the world by the 1970s By the 1980s the trend was seen to have spread southward to Thailand Malaysia and Indonesia while China's provinces had also become integral to the regional economic boom In this exciting new study many of the ideas and expectations associated with the Pacific Century are placed under critical scrutiny The book includes studies of particular countries such as China Japan South Korea Vietnam Indonesia and Malaysia There is analysis of economic and political trends in the region the reasons behind its rise and its importance on a global scale The rise of East Asia represents an historic turning point with immense significance world wide This book will be of interest to anyone concerned about the new approaches to and the debate about the rise of east Asia and the coming of the Pacific Century

Rise and Decline of the Asian Century Christopher Lingle, 1998-12-31 Before the spectacular economic catastrophes that have recently befallen the newly emergent economies of Asia notably those of Korea and Thailand it was fashionable amongst economists to speak of an impending Asian century in which the Asia Pacific region would supplant America as the centre of gravity for world affairs Conventional wisdom held that the high growth rates enjoyed by the Asian tiger economies would continue relentlessly even spreading within the region while Western institutions by contrast would decline irreversibly

Fault Lines in a Rising Asia Chung Min Lee, 2016-04-19 Asia has already risen by most hard power measures But without an understanding of the downsides of Asia's rise the conventional narrative is incomplete misleading and inaccurate Chung Min Lee explores the fundamental dichotomy that defines contemporary Asia While the region has been an unparalleled economic success it is also home to some of the world's most dangerous diverse and divisive challenges Contrary to prevailing wisdom he says Asia's rise doesn't mean the demise of the West Asia's rise over the past four decades is one of the most significant geopolitical and geoeconomic developments in world affairs as evinced by China's and more recently India's accelerated economic growth Yet the conventional narrative of Asia's rise is incomplete if not misleading given the fundamental dichotomy that defines contemporary Asia a region with unparalleled

economic success but also home to the world's most dangerous diverse and divisive security military and political challenges. How the strategically consequential Asian states manage to ameliorate or even overcome traditional geopolitical tinderboxes across the Taiwan Strait, the Korean Peninsula and the Indian subcontinent and new zones of strategic competition such as the South China Sea is to go on to have a profound impact on the shaping of regional order well into the 21st century.

Sustaining Economic Growth in Asia Jeremie Cohen-Setton, Thomas Helbling, Adam S. Posen, Changyong Rhee, 2018-12-01. Economic growth, inflation and interest rates have declined in Asia just as they have in the United States and Europe. This volume explores the relevance to several Asian economies of the diagnosis known as secular stagnation. Leading experts on the region discuss the fiscal and monetary policy challenges of reviving growth without generating domestic financial imbalances. The essays on innovation, demographics, spillovers and various policy proposals are accompanied by case studies focusing on Japan, South Korea, China, India and Indonesia.

Rising Asia and American Hegemony Paul Hong, Young Won Park, 2020-02-07. This book provides an overview of evolving patterns of trade partnership with historical perspective. It presents changing requirements of industry competitiveness and explains the vital relationships between trade partnerships and industry competitiveness. As well, it further examines the interactive relationships between trade partnerships and industry competitiveness. In recent years, with decreasing strategic alliances among nations and less visibility of international governance mechanisms, e.g. WTO and counter to globalization, preferential trade agreements and free trade agreements have proliferated among nations. At the same time, industrial competitiveness is becoming a serious strategic policy priority of nations both advanced and emerging economies. Theoretical discussion focuses on the practices of global network capabilities for the top of the pyramid (ToP) and base of the pyramid (BoP). Special focus is on trade partnerships and industry competitiveness in the Asian economies: China, Japan, South Korea, India, Indonesia, three ASEAN nations, Vietnam, Thailand and Malaysia and Mexico. Extensive industry and firm level case studies discuss ToP and BoP interface capabilities in the form of manufacturing and services life cycle management which extends value creation and delivery of manufacturing and services. This extension integrates the cloud ecosystem such as timely data information knowledge flows via the virtual world and ground value chains such as the flow of complex real goods and services in the visible world.

From Far East to Asia Pacific Brian P. Farrell, S.R. Joey Long, David Ulbrich, 2022-07-18. The years 1900 to 1954 marked the transformation from an exotic colonized Far East to a more autonomous prominent Asia Pacific. This anthology examines the grand strategies of great powers as they vied for influence and ultimately hegemony in the region. At the turn of the twentieth century, the main contestants included the venerable British Empire and the aspiring Japan and United States. The unwieldy leviathan of China, the European imperial holdings in Southeast Asia and the expanses of the western Pacific emerged as battlegrounds in literal and geopolitical terms. Other less powerful nations such as India, Burma, Australia and French Indochina also exercised agency in crafting grand strategies to further their interests and in their interactions with those great powers. Among the

many factors affecting all nations invested in the Asia Pacific were such traditional elements as economics military power and diplomacy as well as fluid traits like ideology culture and personality The era saw the decline of British and European influence in the Asia Pacific the rise and fall of Japanese imperialism the emergence of American primacy the ongoing struggle for independence in Southeast Asia and China's resurrection as a contender for hegemony Great powers shifted and so too did their grand strategies

Transnational Education Crossing 'Asia' and 'the West' Le-Ha Phan, 2016-10-04 In this book Phan Le Ha identifies and discusses four growing self sustained sustaining fundamental phenomena in transnational education TNE namely 1 the planned evolving and transformative mediocrity behind the endorsement of English medium education legitimized by the interactive Asia the West relationship 2 the strategic employment of the terms Asia Asian and West Western by all stakeholders in their perceptions and construction of choice quality rigour reliability and attractiveness of programs courses and locations 3 the adjusted desire for an imagined and often misinformed West among various stakeholders of transnational education and 4 the assigned and self realized ownership of English by otherwise normally on the margin groups of speakers A focus on how these phenomena impact questions of identity and desire in TNE is a running theme The above phenomena are discussed against the backdrop of the rise of Asia sentiment and how this sentiment has played out in interactions and relationships between the West and Asia and among Asian institutions and various entities Phan Le Ha's examination of the identified phenomena in TNE has been informed by her multi layered engagement with the dialectic of the Asia the West relationship her critical take on certain pro Asia and decolonisation scholarship and her interdisciplinary and multidisciplinary approach to theorise the field and the specific topic under scrutiny Phan Le Ha shows that the current Asia chooses not necessarily by force but largely by will and often with an informed and well articulated agency to go with the idea of the West and often desires an affiliation with the West either directly or indirectly something that is getting more intense in the context of globalization regionalization and commercialization of education The rise of Asia has made the idea of the West even more looked for in Asia TNE in Asia in many ways is the transforming and dynamic transit point a layover that facilitates entry into a wanted destination the West and or the idea of the West The West and Asia need one another more than ever in the context of the internationalization and commercialization of higher education What's more the West and Asia have hardly ever been mutually exclusive but have

rather been in an eventful love and obsession relationship with each other This is the very dialectic proposition that Phan Le Ha takes throughout this book while paying specific attention to transnational higher education in the greater Asian region including the Middle East following her several research projects conducted in the region since 2005 to date Transnational Education Crossing the West and Asia explores English Internationalisation of Higher Education and Identity Increasing Academic Monolingualism and English only Package Transnational Education and Dream Realization From the Philippines to Vietnam From Afghanistan to Dubai From Everywhere in Asia to Thailand Desiring International Transnational Education Theorisation of Key Concepts and Next Steps from Here The book will be of interest to researchers in the field of transnational education Asia education and education policy

The Rise of Korean Leadership G. Ikenberry, J. Mo, Mo Jongryn, 2013-11-25 South Korea has emerged as a new middle power playing a significant role in a wide range of important global issue areas and supporting liberal international order with its leadership diplomacy The growing role played by new powers like Korea calls into question the prevailing view that global governance is polarized with emerging powers challenging the liberal international order established by the United States and its European allies after World War II As the case of Korea shows large developing countries like the BRICS are not the only emerging powers active in global governance Newly developed or high income developing countries like South Korea Turkey and Mexico are also active emerging powers taking new initiatives setting agendas and mediating conflicts between rival groups on the global stage Because these high income developing countries have advanced under and benefited from the liberal international order they see a great stake in its stability and show a willingness to protect it Liberal internationalist developing countries are joining the expanding list of middle powers who contribute to the maintenance of liberal international order as niche players and system supporters
