**To Rule the Skies** Brent D Ziarnick,2021-02-15 To Rule the Skies General Thomas S Power and the Rise of Strategic Air Command in the Cold War fills a critical gap in Cold War and Air Force history by telling the story of General Thomas S Power for the first time Thomas Power was second only to Curtis LeMay in forming the Strategic Air Command SAC one of the premier combat organizations of the twentieth century but he is rarely mentioned today What little is written about Power describes him as LeMay s willing hatchet man uneducated unimaginative autocratic and sadistic Based on extensive archival research General Power seeks to overturn this appraisal Brent D Ziarnick covers the span of both Power s personal and professional life and challenges many of the myths of conventional knowledge about him Denied college because his middle class immigrant family imploded while he was still in school Power worked in New York City construction while studying for the Flying Cadet examination at night in the New York Public Library As a young pilot Power participated in some of the Army Air Corps most storied operations In the interwar years his family connections allowed Power to interact with American Wall Street millionaires and the British aristocracy Confined to training combat aircrews in the United States for most of World War II Power proved his combat leadership as a bombing wing commander by planning and leading the firebombing of Tokyo for Gen Curtis LeMay After the war Power helped LeMay transform the Air Force into the aerospace force America needed during the Cold War A master of strategic air warfare he aided in establishing SAC as the Free World s Big Stick against Soviet aggression Far from being unimaginative Power led the incorporation of the nuclear weapon the intercontinental ballistic missile the airborne alert and the Single Integrated Operational Plan into America s deterrent posture as Air Research and Development Command commander and both the vice commander and commander in chief of SAC Most importantly Power led SAC through the Cuban Missile Crisis in 1962 Even after retirement Power as a New York Times bestselling author brought his message of deterrence through strength to the nation Ziarnick points out how Power s impact may continue in the future Power s peerless but suppressed vision of the Air Force and the nation in space is recounted in detail placing Power firmly as a forgotten space visionary and role model for both the Air Force and the new Space Force To Rule the Skies is an important contribution to the history of the Cold War and beyond

Command and Control Eric

Schlosser, 2014-08-26 The Oscar shortlisted documentary *Command and Control* directed by Robert Kenner finds its origins in Eric Schlosser's book and continues to explore the little known history of the management and safety concerns of America's nuclear arsenal. A devastatingly lucid and detailed new history of nuclear weapons in the U.S. Fascinating. Lev Grossman, TIME Magazine. Perilous and gripping. Schlosser skillfully weaves together an engrossing account of both the science and the politics of nuclear weapons safety. San Francisco Chronicle. A myth-shattering exposé of America's nuclear weapons. Famed investigative journalist Eric Schlosser digs deep to uncover secrets about the management of America's nuclear arsenal. A groundbreaking account of accidents, near misses, extraordinary heroism, and technological breakthroughs. *Command and Control* explores the dilemma that has existed since the dawn of the nuclear age: How do you deploy weapons of mass destruction without being destroyed by them? That question has never been resolved, and Schlosser reveals how the combination of human fallibility and technological complexity still poses a grave risk to mankind. While the harms of global warming increasingly dominate the news, the equally dangerous yet more immediate threat of nuclear weapons has been largely forgotten. Written with the vibrancy of a first-rate thriller, *Command and Control* interweaves the minute-by-minute story of an accident at a nuclear missile silo in rural Arkansas with a historical narrative that spans more than fifty years. It depicts the urgent effort by American scientists, policy makers, and military officers to ensure that nuclear weapons can't be stolen, sabotaged, used without permission, or detonated inadvertently. Schlosser also looks at the Cold War from a new perspective, offering history from the ground up, telling the stories of bomber pilots, missile commanders, maintenance crews, and other ordinary servicemen who risked their lives to avert a nuclear holocaust. At the heart of the book lies the struggle amid the rolling hills and small farms of Damascus, Arkansas, to prevent the explosion of a ballistic missile carrying the most powerful nuclear warhead ever built by the United States. Drawing on recently declassified documents and interviews with people who designed and routinely handled nuclear weapons, *Command and Control* takes readers into a terrifying but fascinating world that until now has been largely hidden from view. Through the details of a single accident, Schlosser illustrates how an unlikely event can become unavoidable, how small risks can have terrible consequences, and how the most brilliant minds in the nation can only provide us with an illusion of control. Audacious, gripping, and unforgettable, *Command and Control* is a tour de force of investigative journalism, an eye-opening look at the dangers of America's nuclear age.

Red Moon Rising Matthew Brzezinski, 2024-09-04 A vivid behind-the-scenes history of the Cold War's space race between the Soviets and Americans following the launch of Sputnik. In his exuberant narrative of the superpower space race, Brzezinski tells the story of American and Soviet decisions with remarkable dramatic, even cinematic, flair. The New York Times Book Review. In *Red Moon Rising*, Matthew Brzezinski recounts the dramatic behind-the-scenes story of the fierce battles on earth that preceded and followed the launch of Sputnik on October 4, 1957. He takes us inside the Kremlin, the White House, secret military facilities, deep cover, safe houses, and the halls of Congress to bring to life the Russians and Americans who feared

and distrusted their compatriots at least as much as their superpower rivals Drawing on original interviews and new documentary sources Brzezinski tells a story rich in the paranoia of the time and the combatants include three U S presidents survivors of the gulag corporate chieftains ambitious apparatchiks rehabilitated Nazis and a general who won the day by refusing to follow orders The true story of the birth of the space age has never been told in such vivid detail and Red Moon Rising brings it memorably to life A spectacular and accessible history of the space race Brzezinski displays depth insight and showmanship USA Today Brzezinski is a wonderfully colorful writer combining a scientific plotline with the history and characters of a Cold War thriller The Times London The writing is fast paced and crisp the stakes high and the tension palpable from the first pages of this high flying account of the early days of the space race between the U S and U S S R Publishers Weekly starred review Comparable to Paul Dickson s Sputnik Shock of the Century Brzezinski s speedy narrative of the first satellite slings readers from launch pads to conference rooms A kinetic rendition of Sputnik this will score with spaceflight buffs Booklist

*Shaping U.S. Military Forces for the Asia-Pacific* Michael R. Kraig, 2014-06-04 The first twenty years of post Cold War US defense and diplomatic policies toward Asia have looked a good deal like the previous 50 namely continued deterrence based upon overwhelming offensive military predominance In East Asia all powers harbor common and divergent interests based on fragmented nationalist identities and complex economic interdependence In this multipolar Asian system new Chinese military capabilities could support both the wish to secure its own interests as well as a more expansive vision for regional leadership which might harbor a destabilizing geopolitical agenda How the United States addresses this reality via military procurements and employment concepts for the Asian theater could either detract from or enhance crisis stability The US defense establishment must reorient its force posture to save money manage conflicts of interest and prevent future interstate crises This analysis provides a framework for how the United States should ideally structure and use military power so as to best support the diplomatic resolution of conflicting interests without resorting to full scale warfare It also critiques the usual Western military focus on offensive strategic predominance in force postures itself often fuelled by the unrealistic pursuit of the opponent s complete submission via victory in decisive battles

**Assured Destruction** David Bath, 2020-03-15 Assured Destruction Building the Ballistic Missile Culture of the U S Air Force documents the rapid development of nuclear ballistic missiles in the United States and their equally swift demise after the Cuban Missile Crisis revealing how these drastic changes negatively influenced both the Air Force and the missile community David W Bath contends that the struggle to create and control nuclear ballistic missiles threatened both the dominance of the United States during an intensifying Cold War and the strategic airpower mission of the newly created Air Force The book details the strenuous efforts required to create and prepare a missile arsenal before the Cuban Missile Crisis which occurred only five years after the first missile was declared operational It uses the personal recollections of former missileers and the professional military education theses they wrote to highlight some of the concerns that have faced the

missileers who operated and worked on these powerful weapons from 1957 to the present The highlight of the book however is the personal stories of the missileers who served during the missile crisis revealing the efforts that they went to in order to prepare these unique and untried weapons for what many thought might become the third world war
