Introduction to Intercultural Economics Rongxing Guo,2012-04-23 This book presents a methodological framework
for the analysis of intercultural issues frequently misinterpreted by existing theories It uses a challenge and response theory
of cultural development to examine the relationship between different natural disasters and threats and the developments of
ancient civilizations The spatial interaction of ancient civilizations is assessed and four non linear patterns of intercultural
dynamics are presented Our empirical analyses of the four major ancient civilizations the Mesopotamian the Egyptian the
Indus and the Chinese focus on intercultural influences as well as how they have shaped the spatial dynamics of the world as
a whole This book also examines various aspects of intercultural economic influences such as those of culture on
international trade Evidence from a broad panel of nations supports the presumption that high income trade partners will be
less sensitive to the measures of cultural dissimilarity than low income trade partners between which cultural dissimilarity
leads to barriers to international trade The treatment of linguistic and religious factors as continuous variables in this book
has improved past studies in which language was treated as one or more dummy variables and religion was ignored
