Risky Behavior Among Youths An Economic Analysis:

Risky Behavior among Youths Jonathan Gruber, 2009-02-15 Every day young people engage in risky behaviors that affect not only their immediate well being but their long term health and safety These well honed essays apply diverse economic analyses to a wide range of unsafe activities including teen drinking and driving smoking drug use unprotected sex and criminal activity Economic principles are further applied to mental health and performance issues such as teenage depression suicide nutritional disorders and high school dropout rates Together the essays yield notable findings price and regulatory incentives are critical determinants of high risk behavior suggesting that youths do apply some sort of cost benefit calculation when making decisions the macroeconomic environment in which those decisions are made matters greatly and youths who pursue high risk behaviors are significantly more likely to engage in similar behaviors as adults This important volume provides both a key data source for public policy makers and a clear affirmation of the usefulness of economic analysis to our understanding of risky behavior

The Economics of Crime Rafael Di Tella,Sebastian Edwards,Ernesto Schargrofsky,2010 This title presents a survey of the crime problem in Latin America which takes a very broad and appropriately reductionist approach to analyse the determinants of the high crime levels focusing on the negative social conditions in the region including inequality and poverty and poor policy design such as relatively low police presence The chapters illustrate three channels through which crime might generate poverty that is by reducing investment by introducing assets losses and by reducing the value of assets remaining in the control of households

Paying the Tab Philip J. Cook,2011-06-27 What drug provides Americans with the greatest pleasure and the greatest pain The answer hands down is alcohol The pain comes not only from drunk driving and lost lives but also addiction family strife crime violence poor health and squandered human potential Young and old drinkers and abstainers alike all are affected Every American is paying for

alcohol abuse Paying the Tab the first comprehensive analysis of this complex policy issue calls for broadening our approach to curbing destructive drinking Over the last few decades efforts to reduce the societal costs curbing youth drinking and cracking down on drunk driving have been somewhat effective but woefully incomplete In fact American policymakers have ignored the influence of the supply side of the equation Beer and liquor are far cheaper and more readily available today than in the 1950s and 1960s Philip Cook s well researched and engaging account chronicles the history of our attempts to legislate morality the overlooked lessons from Prohibition and the rise of Alcoholics Anonymous He provides a thorough account of the scientific evidence that has accumulated over the last twenty five years of economic and public health research which demonstrates that higher alcohol excise taxes and other supply restrictions are effective and underutilized policy tools that can cut abuse while preserving the pleasures of moderate consumption Paying the Tab makes a powerful case for a policy course correction Alcohol is too cheap and it s costing all of us *Ebook: Adolescence*

Steinberg,2016-04-16 *Ebook Adolescence* **The Developing Person Through Childhood and Adolescence** Kathleen Stassen Berger,2005-10-19 This text presents theory research practical examples and controversial issues in a way that inspires students to think about development addressing the individual s role in both the community and the wider world This second edition contains revised chapters on adolescence and new research into brain development **Meta Analysis of Crime and Deterrence** Thomas Rupp,2008 *Violence and Trauma in the Lives of Children* Joy D. Osofsky,Betsy McAlister Groves,2018-08-09 Explains the neurological emotional and behavioral impacts of violence and trauma experienced by newborns infants children and teenagers Traumatic events known as adverse childhood experiences ACEs can affect children physically mentally and emotionally sometimes with long term health and behavioral effects Abuse neglect exposure to community and domestic violence and household dysfunction all have the potential to alter brain development and behavior but few people are able to recognize or respond to trauma in children Given the prevalence of childhood exposure to violence with one in four children ages 5 to 15 living in households with only moderate levels of safety and nurturance and infants and children ages 0 to 3 comprising the highest percentage of those maltreated it is imperative that students and professionals alike be able to identify types and consequences of violence and trauma This book provides readers with the information they need in order to know how to detect and prevent ACEs and to help children who have lived through them **Insights in the Economics of Aging** David A. Wise,2017-03-20 The fraction of the population over age sixty five in many developed countries is projected to rise in some cases sharply in coming decades This has drawn growing interest to research on the health and economic circumstances of individuals as they age Many individuals are retiring from paid work yet they are living longer than ever Their well being is shaped by their past decisions such as their saving behavior as well as by current and future economic conditions health status medical innovations and a rapidly evolving landscape of policy incentives and supports The contributions to Insights in the Economics of Aging uncover how financial physical and emotional well being are

integrally related The authors consider the interactions between financial circumstances in later life such as household savings and home ownership physical circumstances such as health and disability and emotional well being including happiness and mental health

Decision-Making Process around Teenage Motherhood Miriam Müller,2019-11-27 The objective of this study is to understand the perceptions beliefs and influencing factors that may lead to different fertility outcomes among young women in Nicaragua a country with one of the highest adolescent fertility rates in Latin America The results are based on qualitative data collected in urban areas Miriam Müller reveals that two structural constraints affect women's choices and their capacity to actively participate in defining their life paths poverty and traditional gender norms This book contributes to the discussion of intergenerational transmission of poverty by disentangling the mechanisms behind decision making around teenage motherhood and by describing the consequences of these decisions

Controlling Crime Philip J. Cook,Jens Ludwig,Justin McCrary,2011-08-22 Criminal justice expenditures have more than doubled since the 1980s dramatically increasing costs to the public With state and local revenue shortfalls resulting from the recent recession the question of whether crime control can be accomplished either with fewer resources or by investing those resources in areas other than the criminal justice system is all the more relevant Controlling Crime considers alternative ways to reduce crime that do not sacrifice public safety Among the topics considered here are criminal justice system reform social policy and government policies affecting alcohol abuse drugs and private crime prevention Particular attention is paid to the respective roles of both the private sector and government agencies Through a broad conceptual framework and a careful review of the relevant literature this volume provides insight into the important trends and patterns of some of the interventions that may be effective in reducing crime

Economics in the Twenty-First Century Robert Chernomas,Ian Hudson,2016-06-16 Economics has always been nicknamed the dismal science but today the field seems a little more dismal than usual as governments social movements and even students complain that the discipline is failing to make sense of the major economic problems of the day In Economics in the Twenty First Century Robert Chernomas and Ian Hudson demonstrate how today's top young economists continue to lead the field in the wrong direction The recent winners of the John Bates Clark medal economics's baby Nobel have won that

award for studying important issues such as economic development income inequality crime and health Examining their research Chernomas and Hudson show that this work focuses on individual choice ignores the systematic role of power in the economic system and leads to solutions that are of limited effectiveness at best and harmful at worst An accessible summary of the latest debates in economics Economics in the Twenty First Century takes on what is missing from mainstream economics why it matters and how the discipline can better address the key concerns of our era
