Ritual Healing in Suburban America Meredith B. McGuire, 1998      *Ritual Healing in Suburban America* Meredith B. McGuire, Debra Kantor, 1988 Many Americans believe that people who practice folk healing are uneducated and too poor to afford conventional medical care Contrary to this popular belief Meredith McGuire finds that a large number of college educated middle class suburbanites participate in a variety of nonmedical healing groups In suburban New Jersey people practice such diverse alternatives as psychic healing New Age therapies naturopathy Christian Science Transcendental Meditation reflexology acupuncture yoga Jain meditation Therapeutic Touch reflexology shiatsu rebirthing and occult therapies McGuire places these various healing groups into broader categories according to their traditional sources of inspiration and their beliefs about healing power She then looks at the participants diverse ideas about health and illness By locating alternative healing in the context of these beliefs she shows the many ways the adherents experience ritual healing From publisher s description      *Genealogies of Shamanism* Jeroen W Boekhoven, 2011 Cover Table of contents Acknowledgements 1 Approaching shamanism 2 Eighteenth and nineteenth century interpretations 3 Early twentieth century American interpretations 4 Twentieth century European constructions 5 The Bollingen connection 1930s 1960s 6 Post war American visions 7 The genesis of a field of shamanism America 1960s 1990s 8 A Case Study Shamanisms in the Netherlands 9 Struggles for power charisma and authority a balance Bibliography Index      A Diagnosis for Our Times Matthew Schneirov, Jonathan David Geczik, 2012-02-01 Despite having one of the most advanced systems of medicine in the world American consumers are increasingly turning to alternative medicine Through a study of two alternative health networks one New Age and the other conservative Christian A Diagnosis for Our Times examines the health regimes followed by clients of alternative practitioners the way people find meaning in non Western and pre modern health traditions and the relationship between alternative health and other movements for change In sharp contrast with other work on this subject this book characterizes alternative health as a social movement and a cultural laboratory where people discover new values and new ways of living that may have larger implications The authors discover surprising commonalities between the cultural left and the religious right when it comes to healthcare and they evaluate the potential of alternative health to contribute to a new healthcare paradigm      *The Concise Dictionary of Religion* Irving Hexham, 1993-12      Theorising Religion John Walliss, 2017-10-24 Religion is controversial and challenging Whilst religious forces are powerful in numerous societies they have little or no significance for wide swaths of public or private life in other places The task of theoretical work in the sociology of religion is therefore to make sense of this apparently paradoxical situation in which religion is simultaneously significant and insignificant The chapters of Part One consider the classical roots of ideas about religion that dominated sociological ways of thinking about it for most of the twentieth century Each chapter offers sound reasons for continuing to find theoretical inspiration and challenge in the sociological classics whilst also seeking ways of enhancing and extending

their relevance to religion today Part Two contains chapters that open up fresh perspectives on aspects of modern post modern and ultra modern religion without necessarily ignoring the classical legacy The chapters of Part Three chart new directions for the sociological analysis of religion by fundamentally re thinking its theoretical basis by extending its disciplinary boundaries and by examining previously overlooked topics Images of Issues Joel Best,2017-09-29

Constructionist theory describes and analyzes social problems as emerging through the efforts of claimsmakers who bring issues to public attention By typifying a problem and characterizing it as a particular sort claimsmakers can shape policymaking and public response to the problem Th is new edition of Images of Issues addresses claimsmaking in the 1990s featuring such issues as fathers rights stalking sexual abuse by the clergy hate crimes multicultural education factory farming and concluding with an expanded discussion of the theoretical debate over constructionism **Jesus as Healer**

Jan-Olav Henriksen ,Karl Olav Sandnes ,2016 Healings and miracles play a prominent role in the New Testament accounts of Jesus life and ministry In the Western Christian tradition however Jesus works of healing tend to be downplayed and understood as little more than a demonstration of his divine power In this book Jan Olav Henriksen and Karl Olav Sandnes draw on both contemporary systematic theology and New Testament scholarship to challenge and investigate the reasons for that oversight They constructively consider what it can mean for Christian theology today to understand Jesus as a healer to embrace fully the embodied character of the Christian faith and to recognize the many ways in which God can still be seen to have a healing presence in the world **Religion** Meredith B. McGuire,2008-04-10

In this insightful examination of religions in their local and global context the author shows how analyzing religions social context helps us understand individuals lives social movements national and ethnic politics and widespread social changes Well researched and theory based the text is filled with intriguing anecdotes empirical data thought provoking discussions of both mainstream and nonofficial religions and historical and contemporary examples that illustrate the interplay between religion and society across cultures This volume takes an integrated approach to examining religion and includes cross cultural historical and methodological viewpoints Readers will learn to identify the complex interactions between religion and societal contexts as well as the ways in which these interactions shape individuals communities national politics and the world **New**

**Religious Movements and Comparative Religion** Olav Hammer,Karen Swartz,2024-02-28 This Element provides an introduction to a number of less frequently explored approaches based upon the comparative study of religions New religions convey origin myths present their particular views of history and craft Endtime scenarios Their members carry out a vast and diverse array of ritual activities They produce large corpuses of written texts and designate a subset of these as a sacrosanct canon They focus their attention on material objects that can range from sacred buildings to objects from the natural world that are treated in ritualized fashion The reason for this fundamental similarity between older and newer religions is briefly explored in terms of the cognitive processes that underlie religious concepts and practices A final section returns to the issue

of how such shared processes take specific shapes in the context of modern Western societies      *Music, Health and the Body* Poonam Bala, 2024-09-11 *Music Health and the Body* Cross Cultural Perspectives focuses on the role of music in understanding new dimensions of health and healing through a unique relationship between identity social interactions and the human body under the overarching paradigm of culture The recent Covid 19 pandemic also has highlighted the significance of social and individual factors in people's perception of and their ability to cope with the pandemic situation globally through music Based on interdisciplinary themes and contributions from highly qualified international cohort of scholars the volume will command attention amongst historians ethnologists musicologists sociologists anthropologists psychotherapists and other scholars in arts and humanities      Culture and Health Michael Winkelman, 2008-12-05 *Culture and Health* offers an overview of different areas of culture and health building on foundations of medical anthropology and health behavior theory It shows how to address the challenges of cross cultural medicine through interdisciplinary cultural ecological models and personal and institutional developmental approaches to cross cultural adaptation and competency The book addresses the perspectives of clinically applied anthropology trans cultural psychiatry and the medical ecology critical medical anthropology and symbolic paradigms as frameworks for enhanced comprehension of health and the medical encounter Includes cultural case studies applied vignettes and self assessments      *God's Daughters* R.
