Biosemiotic Literary Criticism W. John Coletta, 2021-08-24 This volume is based to a large extent on the understanding of biosemiotic literary criticism as a semiotic model making enterprise For Jurij Lotman and Thomas A Sebeok nature writing is essentially a model of the relationship between humans and nature Timo Maran biosemiotic literary criticism itself a form

of nature writing and thus itself an ecological niche making enterprise will be considered to be a model of modeling a model of nature naturing Modes and models of analysis drawn from Thomas A Sebeok and Marcel Danesi s Forms of Meaning Modeling Systems Theory and Semiotic Analysis as well as from Timo Maran s work on modeling the environment in literature Edwina Taborsky s writing on Peircean semiosis and of course Jesper Hoffmeyer s formative work in biosemiotics are among the most important organizing elements for this volume *Film Text Analysis* Janina Wildfeuer, John A.

Bateman, 2016-10-04 This book examines film as a multimodal text and an audiovisual synthesis bringing together current work within the fields of narratology philosophy multimodal analysis sound as well as cultural studies in order to cover a wide range of international academic interest The book provides new insights into current work and turns the discussion towards recent research questions and analyses representing and constituting in each contribution new work in the discipline of film text analysis With the help of various example analyses all showing the methodological applicability of the discussed issues the collection provides novel ways of considering film as one of the most complex and at the same time broadly comprehensible texts *Evolutionary Perspectives on Imaginative Culture* Joseph Carroll, Mathias Clasen, Emelie Jonsson, 2020-08-28 This pioneering volume offers an expansive introduction to the relatively new field of evolutionary studies in imaginative culture Contributors from psychology neuroscience anthropology and the humanities probe the evolved human imagination and its artefacts The book forcefully demonstrates that imagination is part of human nature Contributors explore imaginative culture in seven main areas Imagination Evolution Mechanisms and Functions Myth and Religion Aesthetic Theory Music Visual and Plastic Arts Video Games and Films Oral Narratives and Literature Evolutionary Perspectives on Imaginative Culture widens the scope of evolutionary cultural theory to include much of what culture means in common usage The contributors aim to convince scholars in both the humanities and the evolutionary human sciences that biology and imaginative culture are intimately intertwined The contributors illuminate this broad theoretical argument with comprehensive insights into religion ideology personal identity and many particular works of art music literature film and digital media The chapters Imagination the Brain s Default Mode Network and Imaginative Verbal Artifacts and The Role of Aesthetic Style in Alleviating Anxiety About the Future are licensed under the terms of the Creative Commons Attribution 4 0 International License <http://creativecommons.org/licenses/by/4.0/> *The Sense of Rhythm* Giulia Ceriani, 2023-08-28 This new edition published for the first time in English brings semiotician Giulia Ceriani s research to English speaking students and researchers across disciplines The Sense of Rhythm serves as a foundation for interdisciplinary research creative practices and a unique semiotic approach to the study of rhythm *Patterns of Rationality* Tommaso Bertolotti, 2015-04-29 This book proposes an applied epistemological framework for investigating science social cognition and religious thinking based on inferential patterns that recur in the different domains It presents human rationality as a tool that allows us to make sense of our physical or social surroundings It shows that the resulting cognitive activity produces a broad spectrum of outputs such

as scientific models and experimentation gossip and social networks but also ancient and contemporary deities The book consists of three parts the first of which addresses scientific modeling and experimentation and their application to the analysis of scientific rationality Thus this part continues the tradition of eco cognitive epistemology and abduction studies The second part deals with the relationship between social cognition and cognitive niche construction i e the evolutionarily relevant externalization of knowledge onto the environment while the third part focuses on what is commonly defined as irrational thus being in a way dialectically opposed to the first part Here the author demonstrates that the irrational can be analyzed by applying the same epistemological approach used to study scientific rationality and social cognition also in this case we see the emergence of patterns of rationality that regulate the relationships between agents and their environment All in all the book offers a coherent and unitary account of human rationality providing a basis for new conceptual connections and theoretical speculations

Aquinas and Radical Orthodoxy Paul J. DeHart, 2012 *Aquinas and Radical Orthodoxy* investigates the encounter of the most vibrant and controversial trend in recent theology with the greatest Christian thinker of the Middle Ages The book describes Radical Orthodoxy e t m s orientation and highlights those anti secular strategies and intellectual influences that have shaped its appeal to Aquinas It surveys the emergence of the particular picture of Aquinas especially associated with the leaders of Radical Orthodoxy John Milbank and his student Catherine Pickstock along with the scholarly disputes which prompted and followed that development The book then undertakes a detailed investigation of the pivotal publications on Aquinas of those two authors laying out their difficult theories in clear language carefully examining the texts of Aquinas to which they appeal and challenging their interpretations on a number of fundamental points Topics covered include analogical language and knowledge of God the role of metaphysics within theology the relation of cognition to the divine archetypes of things the possibility of human apprehension of God e t m s essence the nature of substance and speculation on the Trinity The conclusion reflects on those elements suppressed by the Radical Orthodox reading of Aquinas their constructive philosophical and theological possibilities and the challenges they present to the Radical Orthodox project

Poiesis and Enchantment in Topological Matter Xin Wei Sha, 2013-12-06 A groundbreaking conception of interactive media inspired by continuity field and process with fresh implications for art computer science and philosophy of technology In this challenging but exhilarating work Sha Xin Wei argues for an approach to materiality inspired by continuous mathematics and process philosophy Investigating the implications of such an approach to media and matter in the concrete setting of installation or event based art and technology Sha maps a genealogy of topological media that is of an articulation of continuous matter that relinquishes a priori objects subjects and egos and yet constitutes value and novelty Doing so he explores the ethico aesthetic consequences of topologically creating performative events and computational media Sha s interdisciplinary investigation is informed by thinkers ranging from Heraclitus to Alfred North Whitehead to Gilbert Simondon to Alain Badiou to Donna Haraway to Gilles

Deleuze and Félix Guattari Sha traces the critical turn from representation to performance citing a series of installation events envisioned and built over the past decade His analysis offers a fresh way to conceive and articulate interactive materials of new media one inspired by continuity field and philosophy of process Sha explores the implications of this for philosophy and social studies of technology and science relevant to the creation of research and art Weaving together philosophy aesthetics critical theory mathematics and media studies he shows how thinking about the world in terms of continuity and process can be informed by computational technologies and what such thinking implies for emerging art and technology

KONSULT Gregory L. Ulmer, 2019-02-02 A motto guiding Gregory L Ulmer's career is from the poet Basho not to follow in the footsteps of the masters but to seek what they sought The responsibility of humanities disciplines today is to do for the digital apparatus social machine what the classical Greeks did for alphabetic writing Ulmer frames online learning as a mode of invention heuristics beginning with the invention of konsult itself Konsult Theopraxis describes the invention of a genre of learning that is to digital media what Plato's dialogue was to alphabetic writing The Greeks invented the practices of writing rhetoric and logic native to the new institution of school the Academy fostering a new behavior of selfhood Socrates Ulmer adopts this historical precedent as a relay an inventory for what must be invented again today a genre of learning an educational institution identity behavior The insight of electracy is that each apparatus augments and institutionalizes one of the primary faculties of human intelligence *theoria* in literacy *praxis* in orality *poiesis* in electracy Needed today are not practices of writing but theopraxis of media The analytical information economy of literacy required separation and isolation siloing of institutionalized intelligence The multimodality of electracy enables syncretism of faculties into holistic performance thinking doing making knowledge purpose affect The interface metaphor of Plato's dialogue was an oral conversation during which the illiterate interlocutor is introduced to dialectical reason as *Idea* The interface metaphor of konsult is scientific consulting during which anelectrate students encounter plasmatic desire as simulacrum This new learning is organized around an updating of Justice native to electracy

[Understanding Violence](#) Lorenzo Magnani, 2024-06-22 This book offers a philosophical account of violence engaged with both empirical and theoretical debates in disciplines such as cognitive science sociology psychiatry anthropology political theory evolutionary biology and theology The primary thesis is that violence is intertwined with morality and typically enacted for moral reasons To show this the book compellingly demonstrates how morality operates to trigger and justify violence and how people in their violent behaviors can engage and disengage with discrete moralities The author's fundamental account of language and in particular its normative aspects is particularly insightful as regards extending the range of what is to be understood as violence beyond the domain of physical harm By employing concepts such as coalition enforcement moral bubbles cognitive niches overmoralization and military intelligence the book aims to spell out how perpetrators and victims of violence systematically disagree about the very nature of violence The author's original claim is that disagreement can be understood naturalistically

described by an account of morality informed by evolutionary perspectives as well This book helps us come to terms with the fact that we are intrinsically violent beings To acknowledge this condition and our stupefying capacity to inflict harm is a responsibility we must face up to such understanding could ultimately be of help in order to achieve a safer ownership of our destinies by individuating and reinforcing those cognitive firewalls that would prevent violence from always escalating and overflowing This second edition is thoroughly revised and integrated with two new chapters to cover new aspects of violence and its understanding such as the role of looting finance in facilitating violent outcomes and the attack to scientific cognition and human creativity

Semiotic Ideologies Massimo Leone,2024-10-02 This book offers a comprehensive exploration of language and semiotic ideologies focusing on how societies construct meaning through verbal and non verbal communication It distinguishes itself by adopting a novel approach that bridges linguistics semiotics and anthropology The research dives into uncharted territory shedding light on the intricate connections between language culture and cognition offering a perspective less common in traditional linguistics or semiotics Throughout the book the reader will encounter rare illustrative examples showcasing the rich tapestry of human communication Additionally previously undisclosed historical data adds depth to the analysis providing fresh insights This work is designed for scholars seeking a deeper understanding of meaning making processes and their cultural variations It also serves as a resource for those interested in the complex interplay of language and semiotics in everyday life

Narrative Complexity Marina Grishakova,Maria Poulaki,2019-08-01 The variety in contemporary philosophical and aesthetic thinking as well as in scientific and experimental research on complexity has not yet been fully adopted by narratology By integrating cutting edge approaches this volume takes a step toward filling this gap and establishing interdisciplinary narrative research on complexity Narrative Complexity provides a framework for a more complex and nuanced study of narrative and explores the experience of narrative complexity in terms of cognitive processing affect and mind and body engagement Bringing together leading international scholars from a range of disciplines this volume combines analytical effort and conceptual insight in order to relate more effectively our theories of narrative representation and complexities of intelligent behavior This collection engages important questions on how narrative complexity functions as an agent of cultural evolution how our understanding of narrative complexity can be extended in light of new research in the social sciences and humanities how interactive media produce new types of narrative complexity and how the role of embodiment as a factor of narrative complexity acquires prominence in cognitive science and media studies The contributors explore narrative complexity transmitted through various semiotic channels embedded in multiple contexts and experienced across different media including film comics music interactive apps audiowalks and ambient literature

The Logic of Social Practices Raffaella Giovagnoli,Robert Lowe,2020-02-04 This book reports on cutting edge research concerning social practices Merging perspectives from various disciplines including philosophy biology and cognitive science it discusses theoretical aspects of social behavior along with models to investigate them and also

presents key case studies Further It describes concepts related to habits routines and rituals and examines important features of human action such as intentionality and choice exploring the influence of specific social practices in different situations Based on a workshop held in June 2018 at the 6th World Congress of Universal Logic UNILOG2018 in Vichy and including additional invited chapters the book offers fresh insights into the fields of social practice and the cognitive computational and philosophical tools to understand them *Gombrowicz's Grimaces* Ewa Plonowska Ziarek,1998-01-29 This timely and much needed critical study is devoted to the writing of Witold Gombrowicz one of the most important Slavic writers in the twentieth century Written from a variety of theoretical perspectives ranging from poststructuralism to queer theory and postcolonialism this book examines the complexity of Gombrowicz s texts in the context of the current reappraisals of the mixed legacies of modernism By situating Gombrowicz s work in relation to Eastern and Western European as well as Argentinean cultures Gombrowicz s *Grimaces* rethinks the significance of literary modernism in light of philosophical modernity queer sexuality subaltern identities and limits of national culture Starting with the considerations of Gombrowicz s aesthetics and his philosophical interests this book addresses the ways in which the experience of cultural displacement Gombrowicz s exile in Argentina and France informs his literary career and ends with a discussion of the cultural implications of Gombrowicz s philosophy of form for his critique of nationalism and the explorations of queer eroticism On the Order of Chaos Mark S. Mosko, Frederick H. Damon,2005 The essays in this volume collectively transform perspectives previously experienced as divergent conflicting and inconsistent into a common and complex orientation to problems central to the natural and social sciences involving transitions between order and disorder Jacket
