Digital Modernism Heritage Lexicon Cristiana Bartolomei, Alfonso Ippolito, Simone Helena Tanoue Vizioli, 2021-08-11 The book investigates the theme of Modernism 1920-1960 and its epigones as an integral part of tangible and intangible cultural heritage which contains the result of a whole range of disciplines whose aim is to identify, document and preserve the memory of the past and the value of the future. Including several chapters, it contains research results relating to cultural heritage more specifically Modernism and current digital technologies. This makes it possible to record and evaluate the changes that both undergo: the first one from a material point of view, the second one from the research point of view, which integrates the traditional approach with an innovative one. The purpose of the publication is to show the most recent studies on the modernist lexicon 100 years after its birth, moving through different fields of cultural heritage from different forms of art to architecture, from design to engineering, from literature to history, representation and restoration. The book appeals to scholars and professionals who are involved in the process of understanding, reading and comprehension, the transformation that the places have undergone within the period under examination. It will certainly foster the international exchange of knowledge that characterized Modernism. **The Body of Nature and Culture** R.
