Sense Of Common Ground:

A Sense of Common Ground Fazal Sheikh, 1996 *Teaching the Arts Behind Bars* Rachel Marie-Crane Williams, 2003

America's two million incarcerated men, women and youth live in a hidden, isolated world filled with depression, anxiety, hostility and violence. But the nation's soaring prison population has not been forgotten by a dedicated network of visual artists, writers, poets, dancers, musicians and actors who teach the arts in correctional settings. This anthology compiles the narratives of several accomplished arts in corrections teachers who share their personal experiences, philosophies and bittersweet anecdotes as well as practical advice, survival skills and program evaluation guidelines. *Teaching the Arts Behind Bars* is an invaluable tool for artists, program administrators and corrections professionals and a testament to the power of creative expression in promoting communication, positive social interaction, inner healing and self-esteem.

Clusivity Anna Ewa Wiczorek, 2014-09-18

Dealing with the concepts of inclusion and exclusion encoded linguistically both implicitly and explicitly, this book develops an original framework for the analysis of these phenomena in political discourse. The approach taken situates political discourse in a broader context of social and psychological relations between groups and their members, which influence the manner in which the speaker's message is constructed and construed by individuals. The present study proposes a pragmatic cognitive model which underlies and explains the discursive representation of belongingness and dissociation in terms of the conceptual location of various discourse entities in the Discourse Space of Chilton (2005). The model in question is concerned with three mechanisms which combined form a fully fledged apparatus for the analysis of the legitimising power of association and dissociation in political discourse through positive self and negative other presentation tactics. The study is a theoretical enterprise which however includes a comprehensive empirical part whose aim is to evaluate and confirm the theoretical assumptions made. The focus is essentially on the relationship between the speaker and the addressees and the speaker's attempt to maintain it discursively. Thus *Clusivity: A New Approach to Association and Dissociation in Political Discourse* will appeal to discourse analysts, pragmaticians and cognitive analysts as well as to political and social sciences analysts, social psychologists, journalists and speechwriters.

Meaning and Publicity Manning Richard N., 2017-12-21

The papers collected in this volume all discuss the ways and extent to which the determinants of meaning must be public. In the philosophy of language there are currently two main traditions concerning the relationship between meaning and public phenomena. According to one tradition, language is public in principle so that there can be nothing to the meaning of linguistic expressions that cannot be accounted for in terms of the behaviour in context of linguistic subjects. According to the other tradition, linguistic meaning is determined by the content of the mental representations that are expressed in overt speech acts. On such views, the properties of the mental are prior to language and linguistic meaning should be explained by appeal to mental concepts. These divergent traditions leave us with a question: Is linguistic meaning to be explained on the basis of a pre-linguistic biological or mental capacity which goes public in overt

speech or is it to be explained on the basis of public behaviour in context which goes private in thought and which determines the contents of the mental
