## Thirteen Studies in the Theory and Practice of History

"In this delightful collection of essays Miss Wedgwood explores the relationships between history, imagination, art, and literature. And then demonstrates her beliefs in a series of seventeenth-century studies. . . . She is, and this no one can doubt, the outstanding woman historian of our day."

—J. H. Plumb in the

**Semiotics Continues to Astonish** Paul Cobley, John Deely, Kalevi Kull, Susan Petrilli, 2011-07-27 Peirce's 1906 proposal that the universe as a whole even if it does not consist exclusively of signs is yet everywhere perfused with signs is a thesis that better than any other sums up the life and work of Thomas A Sebeok inventor of semiotics as we know it today Semiotics the doctrine of signs has a long and intriguing history that extends back well beyond the last century two and a half millennia to Hippocrates of Cos It ranges through the teachings of Augustine Scholastic philosophy the work of Peirce and Saussure Yet a fully fledged doctrine of signs with many horizons for the future was the result of Sebeok's work in the twentieth century The massive influence of this work as well as Sebeok's convening of semiotic projects and encouragement of a huge number of researchers globally which in turn set in train countless research projects is difficult to document and has not been assessed until now This volume using the testimonies of key witnesses and participants in the semiotic project offers a picture of how Sebeok through his development of knowledge of endosemiotics phytosemiotics biosemiotics and sociosemiotics enabled semiotics in general to redraw the boundaries of science and the humanities as well as nature and culture

**Placing the South** Michael O'Brien, 2007 *Placing the South* offers a selection of work published between 1985 and 2005 by one of the most incisive historians and literary critics of the South The pieces seek to situate the South in a variety of contexts and offer a compelling defense of what Kwame Anthony Appiah has called rooted cosmopolitanism This is a mode of understanding based on respect for what is local and an awareness that regionalism is not enough Hybridity in both culture and literature is inescapable and desirable The first section of the book *Placing* contains three comparative analyses that look at how regionalism has recently been conceptualized globally how the modern South has acquired pertinence for those outside the United States and how the relationship between Britain and the South has worked The second section *Ideologies* scrutinizes political ideas freedom imperialism nationalism racial ideology which have transformed American discourse The third section *Forms* examines genre and how the South has been constructed and reconstructed by such literary forms as autobiography biography history and

literary history The final section Writers contains critical appreciations of political thinkers novelists poets critics historians and sociologists important to southern intellectual life Taken together the essays offer a robust analysis of a dynamic region Michael O'Brien is professor of American intellectual history at University of Cambridge and a fellow at Jesus College He is the author of *Conjectures of Order Intellectual Life and the American South 1810-1860* and other books

**Lives, Works & Transformations** Robert R. Kirsch, 1978 *History of Psychiatry and Medical Psychology* Edwin R. Wallace, John Gach, 2010-04-13 Most of the prefatory issues are extensively elaborated upon in the Prolegomenon which also contains the complete references to the texts and authors discussed below Nevertheless the Preface would be grossly incomplete without touching on some of these issues books and scholars Too many of this book's chapters e.g. Mora's Marx's D.B. Weiner's examine and reference important earlier as well as contemporary general histories of psychiatry and specialized monographs in German French Italian and Spanish Also in his 1968 *Short History of Psychiatry* discussed below Ackerknecht pp. xi-xii references important nineteenth and earlier twentieth century psychiatric histories in English French and German Such citations will of course not be repeated here Finally thanks to several publishers re- editions of dozens of classical psychiatric texts one can consult their bibliographies as well See Prolegomenon for references to these splendid series In a rough and ready sense medical history began in classical Greece for example *On Ancient Medicine* While traditionally included in the Hippocratic corpus this text seems more likely to have been written by a non or even anti Hippocratic doctor Moreover the Hippocratic and other schools were hardly as secular as we now suppose *On Epilepsy* for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease
