*Senses of the Empire* Eleanor Betts, 2017-02-24 The Roman empire afforded a kaleidoscope of sensations Through a series of multisensory case studies centred on people places buildings and artefacts and on specific aspects of human behaviour this volume develops ground-breaking methods and approaches for sensory studies in Roman archaeology and ancient history Authors explore questions such as what it felt like and symbolised to be showered with saffron at the amphitheatre why the shape of a dancer's body made him immediately recognisable as a social outcast how the dramatic

gestures loud noises and unforgettable smells of a funeral would have different meanings for members of the family and for bystanders and why feeling the weight of a signet ring on his finger contributed to a man's sense of identity A multisensory approach is taken throughout with each chapter exploring at least two of the senses of sight hearing smell taste and touch The contributors' individual approaches vary reflecting the possibilities and the wide application of sensory studies to the ancient world Underlying all chapters is a conviction that taking a multisensory approach enriches our understanding of the Roman empire but also an awareness of the methodological problems encountered when reconstructing past experiences

**Experimental Psychology, Cognition, and Human Aging** Donald H. Kausler,2012-12-06 This book is a major revision and extension of my earlier book Experimental Psychology and Human Aging which appeared in 1982 The intervening years have seen a remarkable expansion of psychological research on human aging especially on topics dealing with cognition They have also seen research on cognitive aging gain increasing importance within the mainstream of basic cognitive research As my lecture notes for my course in the psychology of aging grew so did my apprehension regarding the task ahead of me in revising the first edition The research explosion in cognitive aging forced several major changes in content from the first to the second edition Two chapters on learning and memory in the first edition were necessarily expanded to six chapters in the present edition Similarly the single prior chapter on perception and attention became two chapters as did the single prior chapter on thinking Another change from the first edition is in the addition of some review of the effects of abnormal aging on various cognitive processes particularly in regard to memory functioning To keep the revision within reasonable length some sacrifices had to be made The multiple chapters on methodology and theory in the first edition were condensed into the present single chapter However the major topics from the first edition were retained and in fact added to by the inclusion of important topics and issues that emerged over the past eight years      The Social, Cultural, and Political Discourses of
