**Anti-Blackness and Public Schools in the Border South** Claude Weathersby, Matthew D. Davis, 2019-09-01 This new book on Black public schooling in St Louis is the first to fully explore deep racialized antagonisms in St Louis Missouri It accomplishes this by addressing the white supremacist context and anti Black policies that resulted In addition this work attends directly to community agitation and protest against racist school policies The book begins with post Civil War schooling of Black children to the important Liddell case that declared unconstitutional the St Louis Public Schools The judicial wrangling in the Liddell case its aftermath and community reaction against it awaits a next book by the authors of *Anti blackness and public schools* **The Education of Blacks in the South, 1860-1935** James D. Anderson, 2010-01-27 James Anderson critically reinterprets the history of southern black education from Reconstruction to the Great Depression By placing black schooling within a political cultural and economic context he offers fresh insights into black commitment to education the peculiar significance of Tuskegee Institute and the conflicting goals of various philanthropic groups among other matters Initially ex slaves attempted to create an educational system that would support and extend their emancipation but their children were pushed into a system of industrial education that presupposed black political and economic subordination This conception of education and social order supported by northern industrial philanthropists some black educators and most southern school officials conflicted with the aspirations of ex slaves and their descendants resulting at the turn of the century in a bitter national debate over the purposes of black education Because blacks lacked economic and political power white elites were able to control the structure and content of black elementary secondary normal and college education during the first third of the twentieth century Nonetheless blacks persisted in their struggle to develop an educational system in accordance with their own needs and desires **The Paradox of Southern Progressivism, 1880-1930** William A. Link, 2000-11-09 Focusing on the cultural conflicts between social reformers and southern communities William Link presents an important reinterpretation of the origins and impact of progressivism in the South He shows that a fundamental clash of values divided reformers and rural southerners ultimately blocking the reforms His book based on extensive archival research adds a new dimension to the study of American reform movements The new group of social reformers that emerged near the end of the nineteenth century believed that the South an underdeveloped and politically fragile region was in the midst of a social crisis They recognized the environmental causes of social problems and pushed for interventionist solutions As a consensus grew about southern social problems in the early 1900s reformers adopted new methods to win the support of reluctant or indifferent southerners By the beginning of World War I their public

crusades on prohibition health schools woman suffrage and child labor had led to some new social policies and the beginnings of a bureaucratic structure By the late 1920s however social reform and southern progressivism remained largely frustrated Link's analysis of the response of rural southern communities to reform efforts establishes a new social context for southern progressivism He argues that the movement failed because a cultural chasm divided the reformers and the communities they sought to transform Reformers were paternalistic They believed that the new policies should properly be administered from above and they were not hesitant to impose their own solutions They also viewed different cultures and races as inferior Rural southerners saw their communities and customs quite differently For most local control and personal liberty were watchwords They had long deflected attempts of southern outsiders to control their affairs and they opposed the paternalistic reforms of the Progressive Era with equal determination Throughout the 1920s they made effective implementation of policy changes difficult if not impossible In a small scale war rural folk forced the reformers to confront the integrity of the communities they sought to change *Inequity in Education* Debra Meyers, Burke Miller, 2009-01-01

Korstad, James L. Leloudis, 2011-01-20 When Governor Terry Sanford established the North Carolina Fund in 1963 he saw it as a way to provide a better life for the tens of thousands whose family income is so low that daily subsistence is always in doubt Illustrated with evocative photographs by Billy Barnes *To Right These Wrongs* offers a lively account of this pioneering effort in America's War on Poverty Robert Korstad and

James Leloudis describe how the Fund s initial successes grew out of its reliance on private philanthropy and federal dollars and its commitment to the democratic mobilization of the poor Both were calculated tactics designed to outflank conservative state lawmakers and entrenched local interests that nourished Jim Crow perpetuated one party politics and protected an economy built on cheap labor By late 1968 when the Fund closed its doors a resurgent politics of race had gained the advantage led by a Republican Party that had reorganized itself around opposition to civil rights and aid to the poor The North Carolina Fund came up short in its battle against poverty but its story continues to be a source of inspiration and instruction for new generations of Americans

**The American South** William J. Cooper Jr., Thomas E. Terrill, Christopher Childers, 2016-11-17 In *The American South A History* Fifth Edition William J Cooper Jr and Thomas E Terrill demonstrate their belief that it is impossible to divorce the history of the South from the history of the United States The authors analysis underscores the complex interaction between the South as a distinct region and the South as an inescapable part of America Cooper and Terrill show how the resulting tension has often propelled section and nation toward collision In supporting their thesis the authors draw on the tremendous amount of profoundly new scholarship in Southern history Each volume includes a substantial bibliographical essay completely updated for this edition which provides the reader with a guide to literature on the history of the South This volume contains updated chapters and tables

**Black Scholar** Wayne J.

Urban,2008-07-01 In *Black Scholar* Wayne J Urban chronicles the distinguished life and career of the historian teacher and university administrator Horace Mann Bond Urban illuminates not only the man and his accomplishments but also the many issues that confronted him and his colleagues in black education during the middle decades of the twentieth century After covering the major events of Bond s youth Urban follows him from his student years at Lincoln University and the University of Chicago through his work for the Julius Rosenwald Fund to his subsequent administrative leadership at several black institutions including Fort Valley State College Lincoln University and Atlanta University Among the many details Urban discusses are Bond s prodigious early output of scholarly books and articles his enduring concern about the biases of intelligence testing his work on preparing the NAACP s court brief for the *Brown v Board of Education* case and his career long interest in what he felt were the affinities between modern day Africans and African Americans the one struggling to break free from colonialism the other from segregation

**Appalachia on Our Mind** Henry D. Shapiro,2014-03-30 *Appalachia on Our Mind* is not a history of Appalachia It is rather a history of the American idea of Appalachia The author argues that the emergence of this idea has little to do with the realities of mountain life but was the result of a need to reconcile the otherness of Appalachia as described by local color writers tourists and home missionaries with assumptions about the nature of America and American civilization Between 1870 and 1900 it became clear that the existence of the strange land and peculiar people of the southern mountains challenged dominant notions about the basic homogeneity of the American people and the progress of the United States toward achieving a uniform national civilization Some people attempted to explain Appalachian otherness as normal and natural no exception to the rule of progress Others attempted the practical integration of Appalachia into America through philanthropic work In the twentieth century however still other people began questioning their assumptions about the characteristics of American civilization itself ultimately defining Appalachia as a region in a nation of regions and the mountaineers as a people in a nation of peoples In his skillful examination of the invention of the idea of Appalachia and its impact on American thought and action during the early twentieth century Mr Shapiro analyzes the following the discovery of Appalachia as a field for fiction by the local color writers and as a field for benevolent work by the home missionaries of the northern Protestant churches the emergence of the problem of Appalachia and attempts to solve it through explanation and social action the articulation of a regionalist definition of Appalachia and the establishment of institutions that reinforced that definition the impact of that regionalistic definition of Appalachia on the conduct of systematic benevolence especially in the context of the debate over child labor restriction and the transformation of philanthropy into community work and the attempt to discover the bases for an indigenous mountain culture in handicrafts folksong and folkdance

**Education for Liberation** Joe M. Richardson,Maxine D. Jones,2015-09-30 *Education for Liberation* completes the study Dr Richardson published in 1986 as *Christian Reconstruction The American Missionary Association and Southern Blacks 1861 1890* by continuing the account of the

American Missionary Association AMA from the end of Reconstruction to the post World War II era Even after the optimism of Reconstruction was shattered by violence fraud and intimidation and the white South relegated African Americans to segregated and disfranchised second class citizenship the AMA never abandoned its claim that blacks were equal in God's sight that any backwardness was the result of circumstance rather than inherent inferiority and that blacks could and should become equal citizens with other Americans The organization went farther in recognition of black ability humanity and aspirations than much of 19th and 20th century white America by publicly and consistently opposing lynching segregation disfranchisement and discrimination The AMA regarded education as the means to full citizenship for African Americans and supported scores of elementary and secondary schools and several colleges at a time when private schooling offered almost the only chance for black youth to advance beyond the elementary grades Such AMA schools with their interracial faculties and advocacy for basic civil rights for black citizens were a constant challenge to southern racial norms and trained thousands of leaders in all areas of black life

Self-Taught Heather Andrea Williams, 2009-11-20 In this previously untold story of African American self education Heather Andrea Williams moves across time to examine African Americans relationship to literacy during slavery during the Civil War and in the first decades of freedom Self Taught traces the historical antecedents to freedpeople's intense desire to become literate and demonstrates how the visions of enslaved African Americans emerged into plans and action once slavery ended Enslaved people Williams contends placed great value in the practical power of literacy whether it was to enable them to read the Bible for themselves or to keep informed of the abolition movement and later the progress of the Civil War Some slaves devised creative and subversive means to acquire literacy and when slavery ended they became the first teachers of other freedpeople Soon overwhelmed by the demands for education they called on northern missionaries to come to their aid Williams argues that by teaching building schools supporting teachers resisting violence and claiming education as a civil right African Americans transformed the face of education in the South to the great benefit of both black and white southerners

The Laurinburg Institute Elizabeth Munroe Jones, 2024-08-27 For the white race it is almost impossible to comprehend what it took to lift blacks from the state of brutal slavery to their rightful place in society Indeed we are still grappling with that problem today Starting from scratch has new meaning when you look at the beginnings of Booker T Washington and Emmanuel and Tinny McDuffie the founders of the Laurinburg Normal and Industrial Institute in 1904 How far they came has to be measured against where they began Emmanuel McDuffie the son of none became the symbolic father of many He did not flee to the relative safety of the North after the war but plunged deeper into the divided and often dangerous South He was determined to build a place where he his family and his race could stand and thrive This 119 year history of the oldest private black prep school in the United States comes alive through extensive interviews and records now uncovered for the first time Accounts of Jazz musician Dizzy Gillespie and NBA Hall of Famers Sam Jones and Charlie Scott among many distinguished graduates and faculty

members paint a vivid picture Ranked sixth nationwide among high schools in producing the most NBA players Laurinburg Institute also sent more than 60 players to Division I college basketball teams all across the county At least 50 000 students built a new world based on the firm foundation of Laurinburg Institute and four generations of the McDuffie family

*Dangerous Donations* Eric Anderson, Alfred A. Moss, 1999 *Dangerous Donations* explores the important limitations on the power of these foundations and their agents The northern philanthropies had to move cautiously and conservatively seeking the cooperation of southern whites whenever possible They believed African Americans could not be excluded from education and must be prepared for productive participation in the South whatever its social system for the safety of the region and the nation as a whole Copyright Libri GmbH All rights reserved
