Jalland, Wilfrid. Prest, 2009-07-15. *Body and Mind* pays tribute to one of Australia's most outstanding and influential historians, F. B. Barry Smith. Barry has made pioneering contributions to the political, social, and cultural histories of Britain and Australia, and these essays range across the fields he made his own, especially the interconnected histories of medicine, body, and ideas/mind. The editors bring together several generations of Barry's admirers, colleagues, friends, and pupils, including Joanna Bourke writing on war and industrial trauma, Peter Edwards on the Agent Orange controversy, Pat Jalland on death in the London Blitz, and Phillipa Mein Smith on the idea of Australasia. *Body and Mind* is a salute to the inestimable work and the life and times of F. B. Smith.

Ignorance and Surprise Matthias Gross, 2021-08-03. The relationship between ignorance and surprise and a conceptual framework for dealing with the unexpected, as seen in ecological design projects. Ignorance and surprise belong together: surprises can make people aware of their own ignorance. And yet, perhaps paradoxically, a surprising event in scientific research, one that defies prediction or risk assessment, is often a window to new and unexpected knowledge. In this book, Matthias Gross examines the relationship between ignorance and surprise, proposing a conceptual framework for handling the unexpected and offering case studies of ecological design that demonstrate the advantages of allowing for surprises and including ignorance in the design and negotiation processes. Gross draws on classical and contemporary sociological accounts of ignorance and surprise in science and ecology and integrates these with the idea of experiment in society. He develops a notion of how unexpected occurrences can be incorporated into a model of scientific and technological development that includes the experimental handling of surprises. Gross discusses different projects in ecological design, including Chicago's restoration of the shoreline of Lake Michigan and Germany's revitalization of brownfields near Leipzig. These cases show how ignorance and surprise can successfully play out in ecological design projects and how the acknowledgment of the unknown can become a part of decision making. The appropriation of surprises can lead to robust design strategies. Ecological design, Gross argues, is neither a linear process of master planning nor a process of trial and

error but a carefully coordinated process of dealing with unexpected turns by means of experimental practice

**Religion in Cormac McCarthy's Fiction** Manuel Broncano, 2013-11-20 This book addresses the religious scope of Cormac McCarthy's fiction one of the most controversial issues in studies of his work Current criticism is divided between those who find a theological dimension in his works and those who reject such an approach on the grounds that the nihilist discourse characteristic of his narrative is incompatible with any religious message McCarthy's tendencies toward religious themes have become increasingly more acute revealing that McCarthy has adopted the biblical language and rhetoric to compose an apocryphal narrative of the American Southwest while exploring the human innate tendency to evil in the line of Herman Melville and William Faulkner both literary progenitors of the writer Broncano argues that this apocryphal narrative is written against the background of the Bible a peculiar Pentateuch in which Blood Meridian functions as the Book of Genesis the Border Trilogy functions as the Gospels and No Country for Old Men as the Book of Revelation while The Road is the post apocalyptic sequel This book analyzes the novels included in what Broncano defines as the South Western cycle from Blood Meridian to The Road in search of the religious foundations that support the narrative architecture of the texts

**The Serendipity Mindset** Christian Busch, 2020-06-09 Good luck isn't just chance it can be learned and leveraged and The Serendipity Mindset explains how you can use serendipity to make life better at work at home everywhere Many of us believe that the great turning points and opportunities in our lives happen by chance that they're out of our control Often we think that successful people and successful companies and organizations are simply luckier than the rest of us Good fortune serendipity just seems to happen to them Is that true Or are some people better at creating the conditions for coincidences to arise and taking advantage of them when they do How can we connect the dots of seemingly random events to improve our lives In The Serendipity Mindset Christian Busch explains that serendipity isn't about luck in the sense of simple randomness It's about seeing links that others don't combining these observations in unexpected and strategic ways and learning how to detect the moments when apparently random or

unconnected ideas merge to form new opportunities Busch explores serendipity from a rational and scientific perspective and argues that there are identifiable approaches we can use to foster the conditions to let serendipity grow Drawing from biology chemistry management and information systems and using examples of people from all walks of life Busch illustrates how serendipity works and explains how we can train our own serendipity muscle and use it to turn the unexpected into opportunity Once we understand serendipity Busch says we become curators of it and luck becomes something that no longer just happens to us it becomes a force that we can grasp shape and hone Full of exciting ideas and strategies The Serendipity Mindset offers a clear blueprint for how we can cultivate serendipity to increase innovation influence and opportunity in every aspect of our lives
