The Papers of Benjamin Franklin Benjamin Franklin, 2024-01-02 This volume in the venerable Papers of Benjamin Franklin covers March 16 through September 12, 1785, Franklin's final days as minister to France and his voyage home. This volume covers Franklin's final months as minister to France and his voyage back to America. He received his long-awaited permission from Congress to return home, accepted the king's parting gift of a miniature portrait surrounded by diamonds, settled his accounts, and arranged passage for himself and his two grandsons on a ship bound from England to Philadelphia. Franklin instructed the French government on the culinary uses of maize and wrote a lengthy eye-witness account of China that includes directions for making tofu. His last public act in France was signing the Prussian American Treaty of Commerce, which contained three unprecedented articles: the two he wrote in 1782 guaranteeing protections during wartime for noncombatants and a third guaranteeing humane treatment for prisoners of war. On the English coast, Franklin met with his Loyalist son William and witnessed William's signing over his American property to his son William Temple Franklin. Aboard the London Packet, Franklin wrote three scientific papers, including the copiously illustrated *Maritime Observations*. His original line drawings are reproduced here for the first time. The volume ends with an appendix containing supplementary documents from the French mission. **Utopia's Garden** E. C. Spary, 2010-12-15 The royal Parisian botanical garden, the Jardin du Roi, was a jewel in the crown of the French Old Regime, praised by both rulers and scientific practitioners. Yet unlike many such institutions, the Jardin not only survived the French Revolution but by 1800 had become the world's leading public establishment of natural history. The *Muséum d'Histoire Naturelle*. E. C. Spary traces the scientific, administrative, and political strategies that enabled the foundation of the *Muséum*, arguing that agriculture and animal breeding rank alongside classification and collections in explaining why natural history was important for French rulers. But the *Muséum*'s success was

also a consequence of its employees Revolutionary rhetoric by displaying the natural order they suggested the institution could assist in fashioning a self educating self policing Republican people Natural history was presented as an indispensable source of national prosperity and individual virtue Spary s fascinating account opens a new chapter in the history of France science and the Enlightenment Catalog of the Library of the Academy of Natural Sciences of Philadelphia Academy of Natural Sciences of Philadelphia.
