in each person a deep human soul yearning to breathe free and to love an essence an intrinsic goodness a wholeness I did not. Rather it seems like each and every unique element of human behavior one's abilities and one's desires can be destroyed by some brain lesion while leaving a uniquely human person behind. Not only are there losses but behaviors emerge at times that are not seen in people with intact brains but which still reveal a human attempting to cope. I do feel that I saw and still see in each such person something intrinsically human but not the same thing in each.
