Letter Writing in Late Modern Europe Marina Dossena, Gabriella Del Lungo Camiciotti, 2012 In recent years there has been a renewed interest in correspondence both as a literary genre and as cultural practice and several studies have appeared mainly spanning the centuries between Early and Late Modern times However it is between the eighteenth and nineteenth centuries that the roots of contemporary usage begin to evolve thanks to the circulation of new educational materials and more widespread schooling practices In this volume chapters representing diverse but complementary methodological approaches discuss linguistic and discursive practices of correspondence in Late Modern Europe in order to offer material for the comparative cross linguistic analyses of patterns occurring in different social contexts The volume aims to provide a general and solid methodological structure for the study of largely untapped language material from a variety of comparable sources and is expected to appeal to scholars and students interested in the linguistic history of epistolary writing practices as well as to all those interested in the more recent history of European languages **Respectability and**

the London Poor, 1780-1870 Lynn MacKay, 2015-10-06 The population of London soared during the Industrial Revolution and the poorer areas became iconic places of overcrowding and vice Focusing on the communities of Westminster MacKay shows that many of the plebeian populace retained traditional working class pursuits such as gambling drinking and blood sports **Morale and Discipline in the Royal Navy during the First World War** Laura Rowe, 2018-08-30 In contrast to

the voluminous literature on trench warfare few scholarly works have been written on how the First World War was experienced at sea The conditions of war challenged the Royal Navy's position within British national identity and its own service ethos This challenge took the form of a dialogue fuelled by fear of civil unrest between the discourses of paternalism from above and democratism from below Laura Rowe explores issues of morale and discipline using the contemporary language of discipline to shed light on key questions of how the service was able to absorb indiscipline with marked success through a subtle web of loyalties history ethos traditions and customs which were rooted in older notions of service but moulded by the new conditions of total war In so doing she provides not only a new methodological framework for

understanding morale but also military discipline and leadership **Britain and Ireland** Jürgen Kramer, 2022-11-01 Britain and Ireland recounts the history of the two states the United Kingdom of Great Britain and Northern Ireland and the Republic of Ireland and four nations the Irish the Welsh the Scottish and the English from prehistory to the present Chapters are organised chronologically starting in 4000 BCE coming through the Roman occupation the Reformation the Industrial Revolution and the formation of the British Empire Coming up to the present day this new edition has expanded material on post 1800 Irish history with particular emphasis on the Famine Home Rule the Irish Civil War partition the Troubles the Good Friday Agreement and the Brexit fallout Later chapters also have increased emphasis on national

Endurance Running William Bridel, Pirkko Markula, Jim Denison, 2015-10-05 Running is a fundamental human activity and holds an important place in popular culture. In recent decades it has exploded in popularity as a leisure pursuit with marathons and endurance challenges exerting a strong fascination. *Endurance Running* is the first collection of original qualitative research to examine distance running through a socio-cultural lens with a general objective of understanding the concept and meaning of endurance historically and in contemporary times. Adopting diverse theoretical and methodological approaches to explore topics such as historical conceptualizations of endurance, lived experiences of endurance running and the meaning of endurance in individual lives, the book reveals how the biological, historical, psychological and sociological converge to form contextually specific ideas about endurance running and runners. *Endurance Running* is an essential book for anybody researching across the entire spectrum of endurance sports and fascinating reading for anybody working in the sociology of sport or the body, cultural studies or behavioural science.

Inventing Pollution Peter Thorsheim, 2018-04-16 Going as far back as the thirteenth century Britons mined and burned coal. Britain's supremacy in the nineteenth century depended in large part on its vast deposits of coal which powered industry, warmed homes and cooked food. As coal consumption skyrocketed, the air in Britain's cities and towns filled with ever greater and denser clouds of smoke. Yet for much of the nineteenth century few people in Britain even considered coal smoke to be pollution. *Inventing Pollution* examines the radically new understanding of pollution that emerged in the late nineteenth century, one that centered not on organic decay but on coal combustion. This change, as Peter Thorsheim argues, gave birth to the smoke abatement movement and to new ways of thinking about the relationships among humanity, technology and the environment. Even as coal production in Britain has plummeted in recent decades, it has surged in other countries. This reissue of Thorsheim's far-reaching study includes a new preface that reveals the book's relevance to the contentious national and international debates which aren't going away anytime soon around coal, air pollution, more generally, and the grave threat of human-induced climate change.

Madame Tussaud Pamela Pilbeam, 2006-08-10 Tussaud's catered for the public's fascination with monarchy, whether Henry VIII and his wives or Queen Victoria, as well as for their love of history, acting as an accessible and enjoyable museum. This work looks at Madame Tussaud herself and her exhibition as part of the wider history of wax modelling and of popular entertainment.

Bricks of Victorian London Peter Hounsell, 2022-11-01 Many of London's Victorian buildings are built of coarse-textured yellow bricks. These are London stocks produced in very large quantities all through the nineteenth century and notable for their ability to withstand the airborne pollutants of the Victorian city. Whether visible or, as is sometimes the case, hidden behind stonework or underground, they form a major part of the fabric of the capital. Until now little has been written about how and where they were made and the people who made them. Peter Hounsell has written a detailed history of the industry which supplied these bricks to the

London market offering a fresh perspective on the social and economic history of the city In it he reveals the workings of a complex network of finance and labour From landowners who saw an opportunity to profit from the clay on their land to entrepreneurs who sought to build a business as brick manufacturers to those who actually made the bricks the book considers the process in detail placing it in the context of the supply and demand factors that affected the numbers of bricks produced and the costs involved in equipping and running a brickworks Transport from the brickfields to the market was crucial and Dr Hounsell conducts a full survey of the different routes by which bricks were delivered to building sites by road by Thames barge or canal boat and in the second half of the century by the new railways The companies that made the bricks employed many thousands of men women and children and their working lives homes and culture are looked at here as well as the journey towards better working conditions and wages The decline of the handmade yellow stock was eventually brought about by the arrival of the machine made Fletton brick that competed directly with it on price Brickmaking in the vicinity of London finally disappeared after the Second World War Although its demise has left little evidence in the landscape this industry influenced the developme

The Slump John Stevenson,Chris Cook,2013-10-18 One of the most relentlessly brilliant studies of twentieth century Britain these young historians have found a marvellous theme and stuck to it Theirs is the glory Professor Arthur Marwick History The 1930s remembered as the decade of dole queues and hunger marches mass unemployment the means test and the rise of fascism also saw the development of new industries the growth of comfortable suburbia and rising standards of living for many In Britain in the Depression the authors look behind the legends for an objective and timely reassessment as Britain again struggles with the economic and spiritual ills of recession and unemployment

Eradicating Ecocide Polly Higgins,2010-12-01 In Eradicating Ecocide international environment lawyer and activist Polly Higgins sets out to demonstrate in no uncertain terms how our planet is fast being destroyed by the activities of corporations and governments facilitated by compromise laws that offer insufficient deterrence She offers a solution that is radical but as she explains absolutely necessary The recent Mexican Gulf oil spill is a compelling reminder of the consequences of un checked ecocide Higgins advocates the introduction of a new international law against Ecocide It would become the 5th Crime Against Peace and would hold to account heads of corporate bodies that are found guilty of perpetrating ecocide The opportunity to implement this law represents a crossroads in the fate of humanity we can accept this one change and in doing so save our ecosystem for future generations or we can continue to destroy it risking future brutal war over disappearing natural resources This is the first book to explain that we all have a commanding voice and the power to call upon all our governments to change the existing rules of the game

Higgins presents examples of laws in other countries which have succeeded in curtailing the power of governments corporations and banks and made a sudden and effective change demonstrating that her proposal is not impossible Eradicating Ecocide is a crash course on what laws work what doesn't and what else is needed to prevent the imminent disaster of global collapse Eradicating Ecocide provides a comprehensive overview of what needs to be done in order to prevent ecocide It is a book providing a template of a body of laws for all governments to implement which applies equally to smaller communities and anyone who is involved in decision making American Umpire Elizabeth Cobbs Hoffman,2013-03-04 Commentators call the United States an empire occasionally a benign empire sometimes an empire in denial often a destructive empire In American Umpire Elizabeth Cobbs Hoffman asserts instead that America has performed the role of umpire since 1776 compelling adherence to rules that gradually earned broad approval and violating them as well
