## Looking Around A Journey Through Architecture:

**Looking Around** Witold Rybczynski, 1993 An inspired engaging look at what architecture is and how we live and work in it by the acclaimed author of *Home* and *The Most Beautiful House in the World* Rybczynski discusses buildings like the Wexner Center for the Visual Arts demonstrates how architecture actually works and more *Home* Witold Rybczynski, 1987-07-07 Walk through five centuries of homes both great and small from the smoke filled manor halls of the Middle Ages to today's Ralph Lauren designed environments on a house tour like no other one that delightfully explicates the very idea of home You'll see how social and cultural changes influenced styles of decoration and furnishing learn the connection between wall hung religious tapestries and wall to wall carpeting discover how some of our most welcome luxuries were born of architectural necessity and much more Most of all *Home* opens a rare window into our private lives and how we really want to live *The Most Beautiful House in the World* Witold Rybczynski, 1990-07-01 A winning book a pleasure to read a revelation about what architects actually do and how they go about doing it Los Angeles Times Witold Rybczynski takes us on an extraordinary odyssey as he tells the story of designing and building of his own house Rybczynski's project began as a workshop through a series of happy accidents however the structure gradually evolved into a full fledged house In tracing this evolution he touches on matters both theoretical and practical writing on such diverse topics as the distinguished structural descendants of the humble barn the ritualistic origins of the elements of classical architecture and the connections between dress and habitation and between architecture and gastronomy Rybczynski discusses feng shui the Chinese art of placing a home in the landscape and also considers the theories and work of such architects as Palladio Le Corbusier and Frank Lloyd Wright An eloquent examination of the links between being and building *The Most Beautiful House in the World* offers insights into the joys of installing ourselves in a place of establishing a spot where it be safe to dream *An Illustrated Guide to Tactical Diagramming* Sid Heal, 2005-11 This book is not about construction although you will learn about building codes and practices It is not about tactics although the information gained by knowing a floor plan will undoubtedly affect them Instead this book is designed to provide a quick and simple method of confidently determining floor plans by using outside architectural features It assumes no knowledge of construction or tactics and is designed to be useful whether it is read cover to cover or occasionally referred to as a reference It provides time tested tried and true principles that any tactician can use to determine avenues of approach observation and fields of fire obstacles and cover or concealment not to mention where a suspect might be most vulnerable Using this essential tool for quick and clear comprehension of tactical diagramming even a novice tactical planner will learn to use windows doors vents and other clues to confidently determine interior features After reading this book it will be clear that the proverbial glass house is in the mind's eye *An Accidental Journey Through Tibet* Charles Poynton, 2008 *A Theory of Urbanity* Anton Zijderfeld, 2017-09-29 Cities provide for people not just functionally in terms of jobs obligations and practical pursuits but also and above all

emotionally We like some cities and detest others Despite shared rationalizations and common modes of administration and design each city has its own culture A culture is typically human in that it contains all dimensions of the human personal condition from the lowest to the most sublime Urban culture comprises both economic and civic culture and is the source of a city's vitality For today's urban sprawls which have a weak and failing economic and civic culture the task of the urban administration and various economic and civic organizations is to strengthen conditions that can prevent the emergence of urban anomie With suburbanization the edge city and the emergence of cyberspace some argue that cities as integrated places of working and living are things of the past Zijderfeld argues that people are and remain social animals who like and need one another's company particularly in their economic socio cultural and political activities Throughout the ages cities have provided the environment in which people fulfill these needs Anton Zijderfeld discusses urban preferences the organizations and ramifications of urbanity the modernization of urban culture the uneasy alliance between urbanity and the interventionist state and the cultural dimensions of urban renewal Zijderfeld sees the economic and civic culture of the city as the centerpiece of contemporary urban management and contemporary urban democracy In this sense the new technology is an ally of the new urban renewal Most postmodern treatises on the end of the city are impressionistic and unsystematic In contrast Zijderfeld puts the qualitative dimensions of city life into focus catching its pulse and cultural rhythms in a systematic context that prior studies have lacked As such it will be of great interest to urban administrators p     *For the Record* Joan Grierson, 2008-03-31 When Marjorie Hill graduated in 1920 as Canada's first girl architect she was entering a profession that had been established in Canada just 30 years earlier For the Record the first history of women architects in Canada provides a fascinating introduction to early women architects presented within the context of developments in both Europe and North America Profiles of the women who graduated from the School of Architecture at the University of Toronto between 1920 and 1960 are illustrated with photographs of their work and include archival material that has never before been published The final chapter on contemporary women in architecture showcases contributions by leading women architects across the country from Halifax to Vancouver to Iqaluit For the Record also provides current information on schools of architecture in Canada and includes a list of other resources to encourage young women who are thinking of pursuing careers in architecture

**William C. Brocklesby: A Connecticut Valley Architect in the Gilded Age** Bill Ranauro, 2023-07-07 The late nineteenth century known commonly as the Gilded Age produced some of the most beautiful yet controversial architecture in America's history The great influencers of the period including Richard Upjohn Henry Hobson Richardson and Charles McKim each spread the gospel of his own architectural style The result was an eclectic mix of styles that some detested but that others embraced Caught in the struggle to find an architecture America could claim as its own Hartford Connecticut architect William Brocklesby carved out his own stylistic path In an age when the taste for ostentation and pretension was adopted by many William Brocklesby produced some of the most dignified and beautiful architecture in

the Connecticut Valley His churches libraries and theaters remain as artistic landmarks throughout western New England and his work at colleges from Hartford to Amherst Massachusetts make for some of the most picturesque college campuses in America This book serves as a companion to the author s earlier book *Asher Benjamin American Architect* Author Artist Taken together the two books provide a view of developments in American architecture from 1790 to 1910 The Architecture of William C Brocklesby Hailing from Hartford Connecticut architect William C Brocklesby 1847 1910 spent his career designing beautiful yet dignified churches libraries and public buildings throughout the Connecticut River Valley and western New England Working in an age when ostentation was the rule rather than the exception Brocklesby maintained a restrained hand in the application of ornament His design of Forbes Library in Northampton Massachusetts stands out as a monument to his ability as a design architect In addition William Brocklesby was among a handful of nineteenth century architects who made the Connecticut River Valley the birthplace of the prototypical American college campus Working largely within the vision of the famed American landscape architects Andrew Jackson Downing and Frederick Law Olmstead Brocklesby and others built campuses that were meant to mimic the traditional New England village Through the designs of the college buildings by Peabody and Stearns and William Brocklesby Smith College s architectural history traces the development of late nineteenth century styles National Register of Historic Places Inventory

Architecture Depends Jeremy Till, 2013-02-08 Polemics and reflections on how to bridge the gap between what architecture actually is and what architects want it to be Architecture depends on what On people time politics ethics mess the real world Architecture Jeremy Till argues with conviction in this engaging sometimes pugnacious book cannot help itself it is dependent for its very existence on things outside itself Despite the claims of autonomy purity and control that architects like to make about their practice architecture is buffeted by uncertainty and contingency Circumstances invariably intervene to upset the architect's best laid plans at every stage in the process from design through construction to occupancy Architects however tend to deny this fearing contingency and preferring to pursue perfection With Architecture Depends architect and critic Jeremy Till offers a proposal for rescuing architects from themselves a way to bridge the gap between what architecture actually is and what architects want it to be Mixing anecdote design social theory and personal experience Till's writing is always accessible moving freely between high and low registers much like his suggestions for architecture itself
